Appendix - A

Supporting Information for CERCLA Groundwater Operable Units

M. J. Hartman

Under the *Comprehensive Environmental Response, Compensation, and Liability Act* (CERCLA), the groundwater and vadose zone beneath contaminated portions of the Hanford Site are divided into 11 groundwater operable units. Figure 1.0-1 in Section 1.0 of the main text shows the locations of these units and related groundwater interest areas on the Hanford Site. The interest areas are defined informally to aid in planning, scheduling, and data interpretation.

Tables A.1 through A.17 list the constituents, monitoring wells, and the frequency of sampling for each operable units required by sampling and analysis plans or other documentation. The tables also indicate whether the wells were sampled as scheduled during fiscal year 2007.

In many cases, wells are sampled for additional constituents not strictly required by the plans. Those constituents are not listed in the tables of this appendix, but data files accompanying this report include all required and supplemental data.

(a) Well not listed in DOE/RL-2001-49 but added to FY 2007 sampling schedule.
3-xx = To be sampled triennially (every three years); xx indicates the fiscal year of sampling for specified analyte.
A = To be sampled annually.
FY = Fiscal year.
TOC = Total organic carbon.
TOX = Total organic halides.

Table A.13. Monitoring Wells, Aquifer Tubes, and Constituents for 200-PO-1 Operable Unit (adapted from DOE/RL-2003-04^(a))

| Well or Aquifer Tube Name | Contaminants of Concern | | | | | | | Supporting Constituents | | | | Sampled as Scheduled in FY 2007 |

(a) Some wells added in anticipation of Rev. 2 of DOE/RL-2003-04.
(b) Anions - Analytes include but not limited to nitrate.
(c) Metals - Analytes include but not limited to chromium, manganese, and vanadium.
3-xx = To be sampled triennially (every three years); xx indicates the fiscal year of sampling for specified analyte.
A = To be sampled annually.
ICP = Inductively coupled plasma.
VOA = Volatile organic analyses.
