# Report Contributors

The production of the Hanford Site Environmental Report requires the knowledge, skills, experience, and cooperation of many people and several organizations. The contributions and cooperation, often under demanding time

constraints, of the following individuals are gratefully acknowledged. The lead authors are listed on each main section of the report.

## Bechtel Hanford Inc.

J. W. Badden  
R. J. Landon  
R. A. Lewis  
D. D. Teel  
S. G. Weiss

## Pacific Northwest National Laboratory

J. C. Abbott  
E. J. Antonio  
L. L. Cadwell  
A. T. Cooper  
C. E. Cushing  
R. L. Dirkes  
P. E. Dresel  
B. M. Gillespie  
R. W. Hanf  
D. J. Hoitink  
S. P. Luttrell  
T. L. Page  
G. W. Patton  
R. C. Phillips  
T. M. Poston  
K. R. Price  
K. Rhoads  
K. A. Saldi  
M. A. Simmons  
B. L. Tiller  
B. K. Wise  
M. K. Wright

## Rust Geotech

J. R. Brodeur

## Westinghouse Hanford Company

J. A. Bates  
D. G. Black  
R. J. Cash  
M. W. Cline  
P. J. Davis-Vedder  
C. H. Eccleston  
J. W. Fassett  
R. G. Gant  
B. P. Gleckler  
V. L. Hoefler  
P. H. Jacobsen  
A. R. Johnson  
O. S. Kramer  
G. J. LeBaron  
S. S. Lowe  
B. M. Markes  
D. J. McBride  
S. M. McKinney  
R. M. Mitchell  
A. G. Miskho  
D. H. Nichols  
C. J. Perkins  
P. A. Powell  
T. A. Quayle  
J. S. Schmid  
J. W. Schmidt  
R. L. Smithwick  
L. T. St. Georges  
D. E. Zaloudek

## U.S. Department of Energy, Richland Operations Office

K. V. Clarke

# Acknowledgments

The Pacific Northwest National Laboratory programs described in this report were managed by the Public Safety and Resource Protection Program office under the direction of R. W. Bryce. Environmental samples were collected for Pacific Northwest National Laboratory by Senior Radiation Control Technologists M. E. Almarode, L. L. Belt, L. W. Hankel, J. D. Harrison, J. J. Lopez, D. L. Mackliet, A. M. Marschman, T. Moreno, and J. J. Reck. The environmental monitoring supervisors were S. F. Conley and E. W. Lusty. Technical assistance for sample collection was provided by A. T. Cooper.

The authors appreciate the reviews by R. D. Hildebrand, C. E. Clark, R. F. Guercia, B. A. Ward, C. C. Haass, R. N. Krekel, and P. J. Krupin of the U.S. Department of Energy, Richland Operations Office; T. A. Quayle of Westinghouse Hanford Company; J. L. Erickson of the Washington State Department of Health; and K. R. Price, M. J. Sula, T. J. Gilmore, P. S. Stansbury and S. P. Luttrell of Pacific Northwest National Laboratory; R. H. Gray, R. Brady, T. Green, D. Lazowski, B. Roulston, M. Schoenhals, G. Greenly, K. Mitchell, S. Salen, B. Pankratz, and J. D. Booker, Battelle Pantex (Amarillo Texas).

The Westinghouse Hanford Company Effluent and Near-Facility Monitoring programs described in this report were managed by Environmental Services under the direction of W. T. Dixon and Hanford Technical Services were under the direction of J. D. Williams.

Westinghouse Hanford Company near-facility environmental sampling and surveys were conducted by the Site Surveillance Radiological Control group: D. P. Ellingson, R. Olveda, R. L. Bumgarner, and J. M. Swindoll, managed by R. A. Schieffer with the support of H. A. Besel and K. S. Steffen. Bechtel Hanford Inc. near-facility waste-site surveys were conducted by Thermal Hanford Inc.

Groups and organizations participating in the Westinghouse Hanford Company effluent monitoring program include radiological control technicians and managers, facility operators, cognizant facility environmental engineers, process analytical laboratories, ventilation balance,

and field maintenance. Individuals in these organizations collected and analyzed samples, maintained monitoring and sampling equipment, measured stack flow rates, ensured that facility operations adhered to environmental regulations, and ensured that the effluent data reported are accurate. The Pacific Northwest National Laboratory radioactive airborne effluent data were provided by S. J. Jette and E. G. Damberg. Quantities of nonradioactive materials discharged to the atmosphere were provided by R. E. Johnson. The Comprehensive Environmental Response, Compensation, and Liability Act and Washington Administrative Code reportable spill data were provided by J. R. Culmer.

Quantities of solid, liquid, and hazardous wastes generated and shipped offsite were provided by D. L. Hagel. Qualities of radioactive solid wastes disposed of were compiled by F. M. Coony.

The report was edited by R. E. Schrempf, and publication assistance was provided by D. A. Carrothers. Text processing was provided by K. R. Neiderhiser, with support from T. K. Matthews. Graphics were prepared by D. L. Liddell (Boeing Computer Services) and T. B. Walters (Pacific Northwest National Laboratory) using Environmental Research Systems Institute ARC/INFO. Cover and dividers were designed by R. Muir (Boeing Computer Services). This report was produced using Pagemaker and formatted for the Internet by Pacific Northwest National Laboratory's Electronic Communications team.

Community-operated environmental surveillance stations were managed by local teachers who were responsible for collecting the samples and maintaining the stations. The managers and alternate managers for each station included:

Leslie Groves Park, Richland: C. A. Wagner, Manager and D. R. Johns, Alternate Manager

Basin City Elementary School, Basin City: C. L. Stevenson, Manager, and K. McEachen, Alternate Manager

---

Edwin Markham Elementary School, North Franklin  
County: M. P. Madison, Manager, and K. A. Thomas,  
Alternate Manager

Kennewick: T. Droppo, Manager, and C. Zwiener,  
Alternate Manager

Mattawa: D. Weberling, Manager, and B. Whitehouse,  
Alternate Manager

Othello: J. Oord, Manager and B. Taylor, Alternate  
Manager

Pasco: L. DeWitt, Manager, and J. O'Neill, Alternate  
Manager

Toppenish: P. Alexander, Manager, and D. Brown,  
Alternate Manager.
