

“We’re Reducing Risks”

What you should know about the SNF Project

- ◆ **Ours is a first-of-a-kind project**
 - The complex work we are doing has never been done anywhere in the world
- ◆ **The sooner we move and dry the fuel, the safer the Columbia River and the Northwest region**
- ◆ **We are a Closure Project**
 - We have a clear end date just seven years away
 - Once we finish, our funding can be freed for other cleanup work
- ◆ **SNF Project work assists regional and national economic development**
 - Over half of the total SNF Project dollars go to private companies off the Hanford Site

99070084-26

Equipment for the SNF Project’s Cold Vacuum Drying Facility is being built at Hi-Line Engineering, Inc. in Richland, Washington. Hi-Line is a small independent business earning SNF Project dollars.
