Dear Sebastian:

On behalf of the National Analytical Management Program (NAMP) team, I would like to thank you for making a presentation at NAMP 2K. This was our third annual workshop, and we clearly have set a new standard this year. I have received numerous favorable comments about the value of the workshop, and each of you made a significant contribution to the success of the event.

This year, we introduced moderated discussion sessions into the format of the workshop. I was truly impressed with the level of participation from the stakeholders. The candor and openness of the discussion was immeasurably valuable in terms of determining how well our program is responding to the needs of the stakeholder community. The message was loud and clear: NAMP is a successful, progressive program that continues to add value to the complex. I am convinced that with the appropriate support, the program will be able to expand its scope into new areas which will provide even greater benefit to DOE-EM. This is a time of transition for the program, and we will work hard to maintain our focus and momentum as DOE Headquarters responsibility for NAMP is transferred to EM-5. The level of support you have shown through your participation in NAMP 2K is greatly appreciated.

We are currently in the process of assimilating the ideas, suggestions, recommendations and criticisms that were generated at the meeting, and we will be mailing out a final meeting report shortly.

Thanks again for your contributions, and I look forward to working with you in the coming year.

Sincerely,

A handwritten signature in black ink, appearing to read "Stan Morton".

Stan Morton, Director
National Analytical Management Program
