Job Opportunity Number:	222S-006-12
Work Location:	222-S Laboratory, Richland, Washington
Company:	Advanced Technologies and Laboratories International, Inc. (ATL)
Clearance Requirements:	
Phone:	371-1260
Posted:	04/25/2012

Advanced Technologies and Laboratories International, Inc. (ATL), a growing government contractor is seeking a Mid-level Chemist for the 222-S Laboratory on the Hanford site in Richland, Washington.

Responsibilities:

Position is for an Analytical Chemist at the 222-S Laboratory, a DOE laboratory specializing in the analysis of highly radioactive samples. Work location is in the 200W Area of the Hanford Site. Candidate will interface with union represented personnel, chemists, engineers and public. Candidate must be able to qualify as radiological worker.

Job Duties:

- Review analytical data and prepare project reports.
- Coordinate analyses of customer samples, including monitoring of quality requirements.
- Prepare, test, and maintain analytical equipment and procedures.
- Ensure the compliance of the work area and assigned methods to policy and procedural requirements.
- Oversee analytical activities of chemical technologists.
- Possible swing shift.

Required Qualifications:

- Minimum of a BS in Chemistry or related science, 5-10 years related experience is required.
- Must be knowledgeable of wet chemistry, specifically inorganic analytical methods.

Advanced Technologies and Laboratories International, Inc. (ATL), a growing government contractor, is seeking an Entry level Chemist for the 222-S Laboratory on the Hanford site in Richland, Washington.

Responsibilities:

Position is for an Entry level Chemist at the 222-S Laboratory, a DOE laboratory specializing in the analysis of highly radioactive samples. Work location is in the 200W Area of the Hanford Site. Candidate will interface with union represented personnel, chemists, engineers and public. Candidate must be able to qualify as radiological worker.

- Coordinate and arrange sample shipment and receipt, as needed.
- Track samples through the analytical process at the laboratory and update the analytical schedule to reflect the status. Attend the Production Status meeting to share schedule updates and status.
- Initiate disposal of samples using the LIMS system, and oversee the sample disposal process through final disposition
- Ensure the compliance of the work area and assigned methods to policy and procedural requirements.
- Oversee analytical sample tracking and sample location activities of chemical technologists.
- Oversee implementation and operation of barcode reader and/or radio frequency identification (RFID) systems for sample tracking and location.
- Provide backup for chemical management program.

Qualifications:

- BS in Chemistry or related science or equivalent experience required.
- 2 to 5 years lab experience at a minimum.
- Chemistry background preferred.
- Must be organized and able to manage multiple projects and develop quick turn-around strategies.
- Must have excellent interpersonal and writing skills.
- Requires the ability to work independently and take the initiative to handle complex customer and analytical issues.
- Must have strong attention to detail.
