Cleanup Progress Update
Hanford Advisory Board

Stacy Charboneau,
Assistant Manager for Safety and Environment,
Department of Energy Richland Operations Office

June 2014
Richland Cleanup Priorities

• Maintain safe, secure and compliant activities, facilities and operations
• Continue River Corridor cleanup, including remediation of 618-10 Burial Ground
• Continue Plutonium Finishing Plant deactivation, decommissioning and demolition
• Continue groundwater pump and treat operations, and implement additional groundwater remedies
Richland Cleanup Priorities

- Continue preparations for 324 Building deactivation, decommissioning, demolition and soil remediation (River Corridor)
- Complete phase one of radioactive sludge project: move sludge from K-West Basin near the Columbia River to interim storage in the Central Plateau
- Move cesium, strontium capsules stored underwater in Waste Encapsulation Storage Facility into dry storage

Safety and Health

Matt McCormick, DOE-RL manager, far left, joins CH2M Hill employees as they raise the VPP Star site flag.

Workers removed hundreds of contaminated process tubes and pipes to support the removal of the 309 test reactor.

Workers are removing gloveboxes and pencil tanks at the high-hazard Plutonium Finishing Plant. Deactivation at the plant is almost 70 percent complete.
Cleanup progress at 100-D Reactor Area

Excavation of two large chromium-contaminated areas near D and DR reactors is complete

- Excavation required digging 85 feet to groundwater
- About 2 million tons of material was excavated
- One-third of the material was contaminated and disposed at Hanford’s onsite landfill
Cleanup progress at the 618-10 Burial Ground

The 618-10 Burial Ground contains both low-level and transuranic waste.

Mockup for VPU remediation

Excavation of the waste trenches
Workers continue to make progress with construction of K-West Basin Modified Annex
Plutonium Finishing Plant

Progress

• 55 of 81 facilities demolished
• 208 of 238 glove boxes removed
• 136 of 196 pencil tank units removed

Challenges

• Crews are preparing to enter the McCluskey Room this summer
• New strategy of removing large glove boxes from the facility
The pipe was part of a demister system that was being dismantled. The demister line being size-reduced inside of the glove bag.
Waste Management – Central Waste Complex
Groundwater

Recent Progress

- Purchased a uranium treatment “skid” for the 200 West Pump and Treat Facility
- Completed TPA milestone to install eight additional monitoring wells at 100-BC-5
- Implemented work plan to support uranium sequestration in the 300 Area

Focus Areas

- Expand pump and treat systems
- Continue progress on decision documents
Completed 2014 Key Performance Goals to Date:

- Complete cleanup of chromium contamination at the 100-D-30 and 100-D-104 waste sites
- Oversee and approve the contract award for remediation of the 300-296 waste site under the 324 Facility
- Complete removal/disposal of the 340 Vault
- Complete the removal/disposal of the Plutonium Recycling Test Reactor and complete above-grade demolition of the 309 Facility
Public Outreach/Involvement Activities

Current/Upcoming Public Involvement Opportunities

- May 29 to June 12: Hanford Workforce Restructuring Plan
- June 4-5: Hanford Advisory Board meeting in Richland
- June 9 to August 11: 60-day comment period on Proposed Plan for cleanup of the 100-F and IU Area
- Public tour season underway

Go to the Hanford Events Calendar section of www.hanford.gov for more information.

State of the Site meetings were held in Seattle, Portland, Hood River and Richland.
