

PFP Demo

- DOE-RL will provide map showing pipelines, trenches, and cribs
- Potential updates to RAP in November or January and to Board in December

PW 1/3/6 & Central Plateau Plutonium Sites

- Distribute copy of RD/RA work plan
 - Contains updated graphics on plutonium distribution
- Presentation from PNNL “Pu and Am geochemistry at Hanford”
 - November or January
- Committee members to add to framing questions and context, provide to issue managers
- Tank Farms PA/Tank Closure EIS, relationship to plutonium sites
- Plutonium and americium captured by 200 West Pump-and-Treat?
- Tank Farm PA groundwater model assumptions – findings

Critical Infrastructure Issue Framing

- Water, sewer, roads, communications, data, electricity
- Who has responsibility for coordination and control of infrastructure?
 - MSA or Site offices?
 - Is it integrated?
- How does MSA manage and request budget for infrastructure upgrades?
- Fire protection and emergency response
- Functional criteria for lifetime/lifecycle of infrastructure
- Opportunity for coordination of upgrades on Central Plateau with LAWPS
- Infrastructure for institutional controls?
- DOE-RL support needs for both field offices
- Infrastructure – related agency update in December

324 Building

- Request presentation
 - *Timing of presentation tied to agency briefings
- Design for remediation, use of cells
- Structural stability of building and cells
- For regulators: progress towards milestones?
- Status of budget for demo?
- Timeframe for design review

618-10 Update – Framing Questions

- 316-4 crib, comingling of material (plume?)
- When are you done with 618-10?
- What is the schedule, next steps for adjacent sites?

300-FF-5 - Framing Questions

- PNNL report on leachate
- Final treatability test report
- What denotes success?
 - How do you/does it make sense to go after remaining contamination? (The last 10%)
- How does Phase A inform Phase B?
- Sustainability of test, will it stay down?

WA-1 Work Plan – Framing Questions

- Are you going to use an observational approach?
- Use standard POC for human exposure, groundwater, ecological receptors?
- What will go, what will be left?
- Relationship to PFP?

November

- PFP update
- 618-10 update
- 300-FF-5 Rev. 0
- WA-1 work plan
 - Potential presenter: Craig Cameron
- SW-2 Burial Grounds (check with Ecology)
- Site-wide permit update – Rev. 8C and Rev. 9 (potential November or January topic)

January

- WESF – Cs and Sr
- K-Basin sludge
- PFP update
- PNNL PW 1/3/6 geochemistry
- Site-wide permit update – Rev. 8C and Rev. 9 (potential November or January topic)

February

- Critical infrastructure
- 324 Building

FY Q3

- Ecology permit process overview
