John Ciucci

CH2M Hill Plateau Remediation Company

P.O. Box 1600 MSIN H7-30

Richland, WA 99352

Dear Ms. Charboneau and Mr. Ciucci,

Reducing the risk to human health and the environment from the Plutonium Finishing Plant (PFP) has been a significant issue for the Hanford Advisory Board (Board) for many years. Given the recent successes in addressing PFP cleanup, we wish to congratulate all those who have participated in the successful decontamination and demolition of the PFP plant, both past and present.

Especially, the Board wishes to congratulate and recognize the outstanding accomplishments of the hands-on workforce. They have labored safely, hour after hour, in challenging and difficult conditions to remove the plutonium from contaminated gloveboxes, the critically damaged McCluskey Room, and other equipment for repackaging and offsite shipment. Their efforts exemplify the very best of professional and technically-initiated cleanup activities.

We look forward to the successful demolition of PFP to “slab on grade” and are confident that it can be completed safely and successfully by the well-trained, experienced workforce currently on the job.

Gratefully,
