HEALTH & SAFETY EXPO - EXHIBITOR INVITATION

We are offering an invitation to exhibit at the Health & Safety Exposition (EXPO), featuring STEM to be held May 10-11, 2016, at the TRAC Center located in Pasco, Washington. In an effort to revitalize EXPO, we are modifying the approach of this event to include more of a community involvement aspect. For 2016, we have selected the Science, Technology, Engineering, and Math (STEM) Network as our featured topic.

Washington STEM was founded to reimagine and revitalize STEM education for every student in Washington. The goal is for all Washington high school graduates to be STEM literate, prepared to complete post-secondary degrees, and thrive in Washington's STEM-driven workforce and society.

The EXPO planning committee is very excited to be working with Mid-Columbia STEM Network. In conjunction with the featuring STEM as the theme for this year's EXPO, our criteria for exhibits has been modified to support these topics. The goal of EXPO is to engage the community and promote health, safety, science, technology, engineering and mathematics at home and in the workplace. Interactive demonstrations geared to support education are desired to increase participation from local schools.

EXPO still provides a unique opportunity for you to share your expertise and promote the importance of these topics with Hanford employees, their families and the general public. There is no cost for exhibiting at EXPO and the event is free to the public.

We invite you to request an exhibitor booth by reviewing the Guidelines for EXPO Exhibitors and submitting the Exhibit Registration form. Once we have received your request form, you will be notified within seven days if your booth has been accepted. We look forward to having you participate as an exhibitor and being a part of EXPO. For questions or additional information, please email the EXPO Exhibitor Lead @ Richard_J_Debevec@rl.gov or Terri_A_Mc_Evoy@rl.gov, or contact RJ at (509) 376-0004 or Terri at (509) 376-1496.

Sincerely,
Lanette Adams
