Statement of Work

Effluent Treatment Facility (ETF)

Heat Exchanger Replacement

**DE-AC27-08RV14800, MODIFICATION 289
(Total: Two (2) pages including this cover page)**

ETF Heat Exchanger Replacement

Scope: The scope involves performing the design and field work required to remove the existing heat exchanger and install a replacement heat exchanger that has already been ordered by CH2M Hill Plateau Remediation Company (CHPRC). The preliminary approach includes cutting an opening in the ETF roof, providing roof support as required, removing a number of pipes and pipe supports adjacent to the exchanger, providing temporary pipe supports, rigging and removing the exchanger through the roof, installing the new exchanger, and replacing the pipe and pipe supports and repairing the roof opening. Construction acceptance testing will follow installation.
