

Fluor Hanford's Scope of Work.

Fluor Hanford's current scope of work centers around providing support to the Hanford site, and the other DOE Prime contractors that are on site. Our support efforts include: Maintaining the basic infrastructure, central support services such as security forces, fire stations and telecommunication networks and General Materials inventory, which can be purchased impulsively and reactionary. Fluor Hanford's current scope of work is not typically forecasted nor planned in advance.

The following lists are the products and services Fluor Hanford typically procures. These products and services are what's needed to support our internal operations and several project areas.

If you're interested in doing business with Fluor Hanford, we recommend you continue to monitor Fluor Hanford's internet website for further developments or potential request for proposals. All RFP's are posted to the website within 24 hours of receipt from our Contracting Officers. Before replying to an RFP, please ensure your company has already registered in our vendor database as well as with the Central Contractor Registration website. If you have questions please contact Fluor Hanford's Supplier Advocacy Office at 509-376-4697.
