

FORM 3		DANGEROUS WASTE PERMIT APPLICATION										I. EPA/State I.D.. No.																					
												W	A	7	8	9	0	0	0	8	9	6	7										
FOR OFFICIAL USE ONLY																																	
Application Approved		Date Received (month/ day / year)			Comments																												
II. FIRST OR REVISED APPLICATION																																	
Place an "X" in the appropriate box in A or B below (mark one box only) to indicate whether this is the first application you are submitting for your facility or a revised application. If this is your first application and you already know your facility's EPA/STATE I.D. Number, or If this is a revised application, enter your facility's EPA/STATE I.D. Number in Section I above.																																	
A. First Application (place an "X" below and provide the appropriate date)																																	
<input type="checkbox"/> 1. Existing Facility (See instructions for definition of "existing" facility. Complete item below.) <input type="checkbox"/> 2. New Facility (Complete item below.)																																	
<table border="1"> <tr> <td>MO</td> <td>DAY</td> <td>YEAR</td> </tr> <tr> <td>03</td> <td>22</td> <td>1943</td> </tr> </table>		MO	DAY	YEAR	03	22	1943	*For existing facilities, provide the date (mo/day/yr) operation began or the date construction commenced. (use the boxes to the left)										<table border="1"> <tr> <td>MO</td> <td>DAY</td> <td>YEAR</td> </tr> <tr> <td></td> <td></td> <td></td> </tr> </table>		MO	DAY	YEAR				For new facilities, provide the date (mo/day/yr) operation began or is expected to begin							
MO	DAY	YEAR																															
03	22	1943																															
MO	DAY	YEAR																															
<small>*The date construction of the Hanford Facility commenced</small>																																	
B. Revised Application (Place an "X" below and complete Section I above)																																	
<input checked="" type="checkbox"/> 1. Facility has an interim Status Permit <input checked="" type="checkbox"/> 2. Facility has a Final Permit																																	
III. PROCESSES – CODES AND DESIGN CAPACITIES																																	
A. Process Code – Enter the code from the list of process codes below that best describes each process to be used at the facility. Ten lines are provided for entering codes. If more lines are needed, enter the codes(s) in the space provided. If a process will be used that is not included in the list of codes below, then describe the process (including its design capacity) in the space provided on the (Section III-C).																																	
B. Process Design Capacity – For each code entered in column A enter the capacity of the process.																																	
1. Amount – Enter the amount. 2. Unit of Measure – For each amount entered in column B(1), enter the code from the list of unit measure codes below that describes the unit of measure used. Only the units of measure that are listed below should be used.																																	
PROCESS				PROCESS CODE				APPROPRIATE UNITS OF MEASURE FOR PROCESS DESIGN CAPACITY																									
STORAGE:																																	
Container (barrel, drum, etc.) Tank Waste pile Surface impoundment Containment building storage*				S01 S02 S03 S04 S06				Gallons or liters Gallons or liters Cubic yards or cubic meters Gallons or liters Cubic yards or cubic meters*																									
DISPOSAL:																																	
Injection well Landfill Land application Ocean disposal Surface impoundment				D80 D81 D82 D83 D84				Gallons or liters Acre-feet (the volume that would cover one acre to a Depth of one foot) or hectare-meter Acres or hectares Gallons per day or liters per day Gallons or liters																									
TREATMENT:																																	
Tank Surface impoundment Incinerator				T01 T02 T03				Gallons per day or liters per day Gallons per day or liters per day Tons per hour or metric tons per hour; gallons per hour or liters per hour																									
Other (use for physical, chemical, thermal or biological treatment processes not occurring in tanks, surface impoundments or incinerators. Describe the processes in the space provided; Section III-C.)				T04				Gallons per day or liters per day																									
Unit of Measure		Unit of Measure Code		Unit of Measure		Unit of Measure Code		Unit of Measure		Unit of Measure Code

Gallons Per Day		U		Liters Per Hour		H																											

III. PROCESSES – CODES AND DESIGN CAPACITIES (continued)

Example for Completing Section III (shown in line numbers X-1 and X-2 below): A facility has two storage tanks; one tank can hold 200 gallons and the other can hold 400 gallons. The facility also has an incinerator that can burn up to 20 gallons per hour.

Line No.	A. Process Code (from list above)			B. process Design Capacity			For Official Use Only			
				1. Amount (Specify)	2. Unit of Measure (enter code)					
X-1	S	0	2	600		G				
X-2	T	0	3	20		E				
1	S	0	2	292,990		L				
2	T	0	1	204,412		V				
3	T	0	4	150		S				
4	S	0	1	946,352		L				
5	S	0	6	35,170		C

7										
8										
9										
10										

C. Space for additional process codes or for describing other process (code "T04"). For each process entered here include design capacity.

The T Plant Complex (T Plant) was constructed in 1943 and began decontamination operations in 1957.

S02

Liquid mixed waste from treatment activities within T Plant enters the T Plant tank system and is stored until transferred to an onsite treatment, storage, and/or disposal (TSD) unit or offsite facility that is capable of managing this waste.

Liquid mixed waste from T Plant treatment activities is currently being stored in 2706-T tank system consisting of tanks 220 and 221. The 221-T tank system consists of six storage tanks: tank 5-6, tank 5-7, tank 5-9, tank 6-1, tank 11-R, and tank 15-1.

The maximum process design capacity for volume of liquid mixed waste that will be stored at T Plant in existing tanks at any time is 292,990 liters (77,400 gallons). The T Plant tank systems will be managed in a manner that ensures that the process design capacity is not exceeded.

T01

Liquid mixed waste that is treated in the T Plant tank system is transferred to an onsite TSD unit or offsite facility that is capable of managing this waste. This treatment process makes the liquid mixed waste more amenable for transfer and/or storage. The maximum tank treatment process design capacity is 204,412 liters per day (54,000 gallons) per day.

T04

Within T Plant, dangerous and/or mixed waste treatment and storage activities can occur in the 2706-T building, 221-T canyon, and in other support facilities and units. Types of treatment that could be required to make the dangerous and/or mixed waste more amenable for storage and/or disposal include those identified in Washington Administrative Code 173-303-380. Treatment of dry and liquid dangerous and/or mixed waste in various sized containers, including railroad cars, could take place in the 221-T canyon, 221-T railroad tunnel, 2706-T building, 214-T storage building, and in other support structures and storage units located within T Plant's TSD unit boundary. Treatment associated with dry and liquid dangerous and/or mixed waste could include, but is not limited to sorting, segregation, repackaging, neutralization, absorption, macroencapsulation, and compaction. Treatment capability at T Plant can consist of: (1) complete laboratory analysis and characterization of dangerous and/or mixed waste before transferring the waste to an approved onsite TSD unit or offsite facility; or (2) absorb, neutralize, immobilize, encapsulate, or otherwise stabilize the contents of some containers before transfer; (3) sort and segregate mixed waste from low-level waste; (4) prepare the mixed waste to be acceptable for transfer to an onsite TSD unit or offsite TSD facility; and/or (5) meet land disposal restriction requirements for disposal.

Dangerous and/or mixed waste treatment methods could incorporate a variety of technologies to remove mixed waste contamination. The technologies include, but are not limited to, immersion treatment; spray batch treatment; and steam, water, ice, carbon dioxide, chemical, or abrasive blasting. Various types of equipment (e.g., tools, railroad equipment, buses, trucks, automobiles, cranes, earth moving equipment, other large and small pieces of process equipment, or other equipment and debris) can be decontaminated in 2706-T, 221-T, and other support structures within T Plant as needed. Liquid mixed waste generated from the decontamination processes is collected and transferred to the 2706-T tank system or transferred directly to a tanker truck. From this tank system, waste is transferred to an onsite TSD unit and/or offsite TSD facility capable of accepting this waste. The maximum process design capacity for treatment is 150 metric tons (165 tons) per day. [“S” equates to “metric tons” in accordance with WAC 173-303-380(2)(c).]

S01

Storage of dry and liquid mixed and dangerous waste in various sized containers, including railroad cars, could take place in the 221-T canyon, 221-T railroad tunnel, 2706-T, 214-T storage building, and in other support structures and storage units located within the boundaries of T Plant. The containers are stored until transferred to an onsite TSD unit or offsite facility. The maximum container storage process design capacity is 946,352 liters (250,000 gallons).

S06

The designation S06 (containment building/storage) indicates mixed waste is stored in the 221-T canyon, 221-T railroad tunnel, and 2706-T and 2706-TA. This waste is considered to be stored in a containment building subject to the requirements of 40 Code of Federal Regulations (CFR) 265, Subpart DD. The mixed waste consists of waste containers, uncontainerized process equipment, jumpers, and various other items awaiting decontamination, treatment, or repackaging before final disposition. The maximum process design capacity for containment building storage is 35,170 cubic meters (46,000 cubic yards).

IV. DESCRIPTION OF DANGEROUS WASTES

- A. Dangerous Waste Number** – Enter the digit number from Chapter 173-303 WAC for each listed dangerous waste you will handle. If you handle dangerous wastes which are not listed in Chapter 173-303 WAC, enter the four-digit number(s) that describes the characteristics and/or the toxic contaminants of those dangerous wastes.
- B. Estimated Annual Quantity** - For each listed waste entered in column A, estimate the quantity of that waste that will be handled on an annual basis. For each characteristic or toxic contaminant entered in column A, estimate the total annual quantity of all the non-listed waste(s) that will be handled which possess that characteristic or contaminant.
- C. Unit of Measure** - For each quantity entered in column B enter the unit of measure code. Units of measure which must be used and the appropriate codes are:

ENGLISH UNIT OF MEASURE	CODE	METRIC UNIT OF MEASURE	CODE
Pounds	P	Kilograms	K
Tons	T	Metric Tons	M

If facility records use any other unit of measure for quantity, the units of measure must be converted into one of the required units of measure taking into account the appropriate density or specific gravity of the waste.

D. Processes

1. Process Codes:

For listed dangerous waste: For each listed dangerous waste entered in column A select the code(s) from the list of process codes contained in Section III to indicate how the waste will be stored, treated, and/or disposed of at the facility.

For non-listed dangerous wastes: For each characteristic or toxic contaminant entered in Column A, select the code(s) from the list of process codes contained in Section III to indicate all the processes that will be used to store, treat, and/or dispose of all the non-listed dangerous wastes that possess that characteristic or toxic contaminant.

Note: Four spaces are provided for entering process codes. If more are needed: (1) Enter the first three as described above; (2) Enter "000" in the extreme right box of item IV-D(1); and (3) Enter in the space provided on page 4, the line number and the additional code(s).

2. Process Description: If a code is not listed for a process that will be used, describe the process in the space provided on the form.

NOTE: DANGEROUS WASTES DESCRIBED BY MORE THAN ONE DANGEROUS WASTE NUMBER - Dangerous wastes that can be described by more than one Waste Number shall be described on the form as follows:

1. Select one of the Dangerous Waste Numbers and enter it in column A. On the same line complete columns B, C, and D by estimating the total annual quantity of the waste and describing all the processes to be used to treat, store, and/or dispose of the waste.
2. In column A of the next line enter the other Dangerous Waste Number that can be used to describe the waste. In column D(2) on that line enter "Included with above" and make no other entries on that line.
3. Repeat step 2 for each other Dangerous Waste Number that can be used to describe the dangerous waste.

Example for completing Section IV (shown in line numbers X-1, X-2, X-3, and X-4 below) - A facility will treat and dispose of an estimated 900 pounds per year of chrome shavings from leather tanning and finishing operation. In addition, the facility will treat and dispose of three non-listed wastes. Two wastes are corrosive only and there will be an estimated 200 pounds per year of each waste.

IV. DESCRIPTION OF DANGEROUS WASTES (continued)

E. Use this space to list additional process codes from Section D(1) on page 3.

V. FACILITY DRAWING Refer to attached drawing(s).

All existing facilities must include in the space provided on page 5 a scale drawing of the facility (see instructions for more detail).

VI. PHOTOGRAPHS Refer to attached photograph(s).

All existing facilities must include photographs (aerial or ground-level) that clearly delineate all existing structures; existing storage, treatment and disposal areas; and sites of future storage, treatment or disposal areas (see instructions for more detail).

VII. FACILITY GEOGRAPHIC LOCATION

This information is provided on the attached drawings and photos.

LATITUDE (degrees, minutes, & seconds)	LONGITUDE (degrees, minutes, & seconds)

VIII. FACILITY OWNER

- A. If the facility owner is also the facility operator as listed in Section VII on Form 1, "General Information," place an "X" in the box to the left and skip to Section IX below.
B. If the facility owner is not the facility operator as listed in Section VII on Form 1, complete the following items:

1. Name of Facility's Legal Owner	2. Phone Number (area code & no.)

3. Street or P.O. Box	4. City or Town	5. St.	6. Zip Code

IX. OWNER CERTIFICATION

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

Name (print or type) Keith A. Klein, Manager U.S. Department of Energy Richland Operations Office	Signature 	Date Signed 2/5/01
--	--	---------------------------

X. OPERATOR CERTIFICATION

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

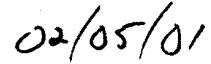

Name (Print Or Type) See attachment	Signature	Date Signed
