Subject: Continuation of COVID-19 Safety Protocols

THE HANFORD SITE

May 3, 2021

TO: All Hanford Site Employees

SUBJECT: Continuation of COVID-19 Safety Protocols

****PLEASE SHARE THIS MESSAGE WITH THOSE WHO ARE NOT ON COMPUTERS****

As the Centers for Disease Control and Prevention continues to learn more about COVID-19 vaccines and their effectiveness, they have, in some instances, relaxed previously established COVID-19 protective measures. These changes are sure to generate questions among the Hanford Site workforce.

At the Hanford Site, we follow our General Hazard Analyses and have always taken a conservative approach to safety. At this time, there have been no changes to our sitewide COVID-19 safety protocols. DOE and Site contractors continue to monitor the national situation, as well as state and local conditions, to evaluate if and when we should make changes to our sitewide COVID-19 safety protocols and General Hazard Analyses. Until then, Hanford employees are expected to continue to comply with our existing hazard controls. These controls have proven to be effective in protecting our workforce and our overall community. Please be patient as we all continue to learn more about COVID-19 that may allow us to relax our protective measures in the future.

If you have any questions, please contact your line management or safety representative. Thank you for your dedication to safety and the One Hanford mission.
