Reflexology is based on the premise that the whole body is "mapped" on the feet (or hands) and different areas of the foot correspond to related areas of the body. By stimulating the nerve endings and specific reflex points on the foot, congestion and tension are released. This allows more oxygen and blood flow to the cells and in turn, the related areas of the body are positively affected. As a result, deep relaxation may be attained, toxins eliminated, and the body's natural tendency toward healing and balance is promoted.
