

RAP Input on FY2016 Budget Priorities (to feed to BCC)

- Comment on budget process (perhaps a separate piece of advice?)
- Priority—stop contamination that is moving (caution with remedy, though)
- Protect human health and the environment
- Danger in prioritizing (“this over this”). TPA agencies are responsible for all cleanup.

Page 1

FY2016 (Continued)

- Useful to see DOE’s priorities first (?)
- Could prioritize timing... but that can imply importance and lead to cutting projects (caution)
- Positive statements (“clean up groundwater”)
- Policy-level approach
- Consider CC-ing OMB on advice (appropriations committee)
