March 5, 2018

CH1803-02

From: Connie Simiele, Assistant Manager, Plutonium Finishing Plant Recovery

To: CHPRC Employees (please cascade)

Subject: PFP UPDATE: PREVIOUSLY PACKAGED WASTE SHIPMENT ACTIVITIES

Consistent with the approved activities outlined in [this Feb. 20, 2018 message](#), the Plutonium Finishing Plant (PFP) team anticipates beginning to ship previously packaged containers of waste this week. The waste was packaged prior to the December event. The containers will be surveyed and shipped to the Central Waste Complex for storage. Those in the area of the PFP can expect to see shipment of previously packaged waste to occur through May.

I want to thank everyone on the PFP team for their continued flexibility. Frequent updates of PFP activities and bioassay information are posted externally to [Hanford.gov](http://Hanford.gov); this internal [PFP Recovery intranet site](#) has a place where you can ask questions and read responses to already-asked questions.
