#### Key Positives:

- WAI maintained a 97.7% combined factor for the Delivery, Proficiency Tests, and Holding Times performance-based incentives. Delivery is the on-time delivery of sample analysis results. Proficiency Tests are the tests performed to demonstrate the proficiency of the lab technicians. Holding Times are the time periods that a sample is viable for use in the intended tests. These three items measure how well the lab is performing its assigned work.
- WAI demonstrated active worker participation in safety and health programs by achieving Voluntary Protection Program (VPP) Star status and was awarded a VPP Superior Star in August 2020.

- WAI demonstrated significant integration and coordination in responding to the unprecedented changes to the Hanford Site operations posture as a result of the COVID-19 pandemic.

**Key Areas for Improvement:**

- Continued efforts to ensure lab services are available to support the Hanford mission (e.g., implementation of second shift).
- Continued efforts to build working relationships to support the Hanford mission (e.g. interface plan and analytical services schedule).
