

## CHAPTER 11 DISTRIBUTION LIST

The U.S. Department of Energy (DOE) is committed to communicating with the public to ensure that potentially affected communities and other interested parties are given opportunities to receive information on the project and notice of public meetings and to comment. In 2003, the environmental impact statement database used existing site mailing information. Over time, the database has evolved through additions from scoping meetings held in 2003, 2004, and 2006 and draft hearings held in 2010. For example, participants completed and returned registration forms at scoping meetings and hearings on the *Draft Tank Closure and Waste Management Environmental Impact Statement for the Hanford Site, Richland, Washington (TC & WM EIS)*, and individuals or groups submitted comments (containing complete contact information) during the scoping process and comment period for the *Draft TC & WM EIS*; if a record already existed, it was updated. The database was also updated based on feedback from an informational mailer that was sent to stakeholders in October 2008 and October 2011. DOE provided different forums and media for feedback on the distribution list.

DOE provided copies of this *Final TC & WM EIS* to members of Congress; Federal, state, and local elected and appointed government officials; American Indian tribal representatives; environmental and public interest groups; and other organizations and individuals listed in this chapter, including those stakeholders added to the distribution list as a result of the activities listed above.

Approximately 80 copies of the complete *Final TC & WM EIS*, 2,500 copies of the *Final TC & WM EIS* Summary, and 260 compact discs containing the complete *Final TC & WM EIS* were sent to interested parties. Copies will be provided to others upon request and have also been made available on the *TC & WM EIS* website, DOE National Environmental Policy Act website, and DOE Office of River Protection website and in regional DOE public reading rooms and public libraries.
