ANNOUNCEMENT

Department of Energy
Richland Operations Office
P.O. Box 550
Richland, Washington 99352

To: ALL HANFORD SITE EMPLOYEES

Subject: UPDATE ON PLUTONIUM FINISHING PLANT (PFP) RECOVERY

Workers finished the survey of the rental car that was brought to the Hanford Site yesterday. No contamination was detected. The survey was conducted with oversight from DOE in the presence of observers from the Washington Department of Health.

The sole focus at PFP is on the health and safety of the workforce, addressing worker concerns, ensuring that facility, debris and rubble piles are stable, and mitigating the potential for additional contamination spread.

We will continue to update you on recovery actions at PFP and continue to post information on our PFP web page on www.hanford.gov.
