**Contractor:** CH2M HILL Plateau Remediation Company (CHPRC)

**Contract:** Plateau Remediation Contract **Contract Number:** DE-AC06-08RL14788

**Award Period:** October 1, 2020, through January 24, 2021

**Basis of Evaluation:** Performance Evaluation and Measurement Plan

**Award Fee Available: $8,160,000**

**Award Fee Earned:**

Subjective: $2,805,000 (of $4,080,000 available)
Objective: $3,554,000 (of $4,080,000 available
Total: $6,359,000 (of $8,160,000 available; earned approximately 78% of total award fee available)

The Contractor met or exceeded the majority of performance goals and objectives for the performance period.

**Significant Achievements:**

- The Plateau Remediation Contract was transitioned to the Central Plateau Cleanup Company from Oct. 5, 2020 - Jan. 24, 2021. The contractor's preparation for transition and collaborative relationship with the incoming contractor provided for a smooth transition.
- Continued effective COVID-19 pandemic response and integration with other Hanford contractors.
- Conducted cumulative impact modeling that supports DOE decisions on CERCLA and RCRA cleanup and operations, as well as strategic initiatives.
- Obtained approval for the scope, cost, schedule and start of construction on the Waste Encapsulation Storage Facility Modification Project, which will help prepare the facility to support the transfer of cesium and strontium capsules to dry storage.
- Sustained Integrated Disposal Facility infrastructure modifications and environmental permitting in support of the Direct Feed Low Activity Waste mission.
- Treated over 840 million gallons of contaminated groundwater.
- Provided outstanding support for completing the Hanford Composite Analysis Draft A, which includes technical analysis to support making decisions on how to safely dispose of waste on the Hanford Site.
- Maintained excellent safety performance during the first four months of FY 2021 with a recordable case rate of 0.0 (Fiscal year-to-date) compared to the DOE-EM goal of 1.1 and a days away, restricted or transferred (DART) rate of 0.0 (Fiscal year-to-date) versus the DOE-EM goal of 0.6. The 12-month rolling average

recordable case rate and DART rate through the end of December 2020 were both 0.27.
- Consistently provided early delivery of required reports, submittals, and inventory information to support DOE-RL Materials Control and Accountability regulatory and reporting requirements.

**Areas for Improvement:**

- Compliance with 10 CFR § 719.17 to provide the Department with its fiscal year Legal Management Budget, as well as a reconciliation to the prior year's budget
- Facility nuclear safety documentation quality and timeliness
- Aging Structures Project management in the areas of planning and execution
- Performance of required subcontract audits
