11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offers is extended. is not extended. Offers must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended, by one of the following methods: (a) By completing Items 8 and 15, and returning _____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGEMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment you desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

13. THIS ITEM ONLY APPLIES TO MODIFICATION OF CONTRACTS/ORDERS. IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

CHECK ONE	A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.
X	B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(b).
	C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:
	D. OTHER (Specify type of modification and authority)

E. IMPORTANT: Contractor is not. is required to sign this document and return _____ copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)
The purpose of this modification is to increase the FY 19 funding allotment. \$56,000.00 in incremental funds is added to the contract on CLIN 10.

Section B contract is attached incorporating the above funding changes.
The Total amount of funding for this contract has been increased from \$35,872,553.29 to \$35,928,553.29.

The 2019 PEMP is formally added to this contract in Section J.9 and by attachment.

There are no other changes.
Delivery Location Code: 00603

B.03	LIMITATION OF GOVERNMENT’S OBLIGATION	B-6

SECTION B - SUPPLIES OR SERVICES PRICES / COST

B.01 TYPE OF CONTRACT – ITEMS BEING ACQUIRED

This is a hybrid contract that includes Fixed-Price with Award Fee, Labor-Hour, and Cost Reimbursement Contract Line Items (CLINS) for the purpose of providing analytical laboratory services at the Department of Energy (DOE) Hanford 222-S Laboratory located in the 200 West Area of the Hanford Site near Richland, Washington. The Contractor shall provide all services required to operate, manage and maintain the Hanford 222-S Laboratory as described in Section C, Description/Specifications/Performance Work Statement (PWS). Specifically, DOE requires a Contractor to provide services that include, but are not limited to: receiving, handling, analyzing, and storing samples; performing special tests; and reporting results. This acquisition supports the Hanford Site tank cleanup program and other site clean-up projects. Samples sent to the 222-S Laboratory typically consist of highly radioactive or hazardous waste materials in gas, liquid, semi-solid or solid matrix form.

B.02 PRICE SCHEDULE

Base Period: Months 1 through 24

CLIN	SCHEDULE OF SUPPLIES/SERVICES	QUANTITY	UNIT OF MEASURE	UNIT PRICE	EXTENDED AMOUNT
00001	Contract Transition – Fixed Price	1	Lump Sum		\$ <u>334,187.94</u>
00002	Routine Analytical Services ¹ – Fixed Price	22	Months	\$604.641.95	\$13,302,122.82
00003	Award Fee ²	1	Lump Sum		\$ <u>334,514.09</u>
00004	Surges in Analytical Services ³ – Labor Hour	1	Lump Sum ⁵		\$ <u>264,726.53</u>
00005	Pensions and Other Benefit Plans ⁴ – Cost Reimbursement	1	Lump Sum		\$ 3,473,500.00
	Total Price – Base Period				\$ <u>17,672,991.69</u>

(a) The Total Available Award Fee for the Base Period is as follows:

PERFORMANCE PERIOD	AVAILABLE AWARD FEE
21 September 2015 through 20 September 2017	Subtotal A: \$ <u>142,770.95</u>

3 through 12 Months from the end of Contract Transition ²	
13 through 24 Months from the end of Contract Transition ²	Subtotal B: \$ <u>188,881.14</u>
Total Available Award Fee CLIN 00003 (Subtotal A and Subtotal B)	\$ <u>334,514.09</u>

(b) The Not to Exceed Amount for CLIN 00004 is as follows:

Base Period – Months 3 through 12			
Labor Category	Estimated Direct Productive Labor Hours (DPLH)	Fixed Unit Rate	Extended Amount
Hot Cell Supervisor	100	\$ <u>49.11</u>	\$ <u>4,910.91</u>

Total Contract Price – CLINs 00001 through 00017	<u>\$52,295,762.77</u>
--	------------------------

Price Schedule Notes:

1. Work under the Contract Transition and Routine Analytical Services CLINs: 00001, 00002, 00006, 00010, 00014 shall be performed on a Fixed Price basis.
2. Available award fee only applies to CLINs 00002, 00006, 00010 and 00014.
3. The estimated cost in CLINs 00004, 00008, 00012, and 00016 is for surges in analytical services that may occur. All work performed under these CLINs shall be on a labor hour basis. This work is not included in the Fixed Price CLINs identified in Note 1 above. All work performed under these CLINs shall be authorized by the Contracting Officer prior to performing the work. The Fixed Unit Rate is a fully burdened labor rate.
4. Work associated with Pensions and Other Benefits Plans CLINs: 00005, 00009, 00013, and 00017 are to be performed on a Cost Reimbursable basis with no Award Fee.
5. The Lump Sum Amount of CLINs 00004, 00008, 00012 and 00016 refers the Not-to-Exceed amounts.

B.03 LIMITATION OF GOVERNMENT’S OBLIGATION

- (a) This contract's CLIN 00001, CLIN 00002, CLIN 00006, CLIN 00010, and CLIN 00014 have traditional Federal Acquisition Regulation fixed prices and contract terms and conditions, with the exceptions that: CLIN 00001, CLIN 00002, CLIN 00006, CLIN 00010, and CLIN 00014 or all may be incrementally funded; and if a CLIN is incrementally funded, in the event of termination before it is fully funded the Government's maximum liability for the CLIN will be the lower of the amount of funds allotted to the CLIN or the amount payable to the Contractor per the Termination for Convenience (Fixed-Price) clause of this contract. For each CLIN there is
- 1) a fixed price for the action;
 - 2) a fixed amount of work that corresponds to the fixed price;
 - 3) a planned funding schedule that corresponds to the fixed price and the fixed amount of work;
 - 4) no Government obligation to the Contractor until the Government allots funds to the contract for the action;
 - 5) if the Government allots funds, a maximum Government obligation, including any termination obligations, to the Contractor equal to the allotted funds; and
 - 6) an obligation that the Government will pay the Contractor for the work the Contractor performs for which funds were allotted based on the price of the work performed, not the costs the Contractor actually incurs.
- (b) For each CLIN
- 1) the Government's maximum obligation, including any termination obligations and obligations under change orders, equitable adjustments, or unilateral or bilateral contract modifications, at any time is always less than or equal to the total amount of funds allotted by the Government to the contract for the CLIN;
 - 2) the Contractor explicitly agrees it reflected (that is, included or could have included an additional amount) in its offered price and in the subsequent negotiated fixed price for each of the fixed-price CLINs included in this contract:
 - i. the added complexity, challenges, and risks (including all risks, costs or otherwise, associated with termination as articulated in this clause) to which the Contractor is subject due to the incremental funding arrangement established in this clause; and
 - ii. the specific risk that in the event of termination of an incrementally funded CLIN before the CLIN is fully funded, the Contractor could receive less than the Termination for Convenience (Fixed-Price) clause of this contract would allow, that is, because the maximum Government obligation for a fixed-price CLIN is the allotted funds for the CLIN, the Contractor will receive the lower of the allotted funds or what the Termination for Convenience (Fixed-Price) clause of this contract would allow.
 - 3) the Contractor is not authorized to continue work beyond the point at which the total amount payable by the Government, which is the price of the services the allotted funds cover, equals the total amount allotted to the contract for the services;
 - 4) if funds become available and the Government's need continues, the Government will allot funds periodically to the CLIN, the Contractor will provide a fixed amount of work for the funds allotted, and the Government will pay the Contractor based on the price of the fixed amount of work. The Government will not pay the Contractor based on the costs the Contractor incurs in performing the work; and
 - 5) the Contractor agrees to provide the fixed amount of work for the fixed price identified in the contract's Section B, Supplies or services and prices/costs, and in accordance with the delivery schedule identified in the contract's Section F, Deliveries or performance, provided the Government provides the funding per or earlier than the Planned Funding Schedule in paragraph (n) of this clause. At any time, the cumulative amount of funds

allotted is the fixed price for the cumulative fixed amount of work identified with the funds.

- (c) For each CLIN
 - 1) The fixed price (of both the entire CLIN and of the current cumulative amount of funds allotted to the CLIN at any time during contract performance) is not subject to any adjustment on the basis of the Contractor's cost experience;
 - 2) The contract places the maximum risk and full responsibility on the Contractor for all costs and resulting profit or loss; and
 - 3) If the Government meets the entire Planned Funding Schedule,
 - i. the cumulative amount of funds allotted will equal the CLIN's fixed price and
 - ii. the Contractor must provide the work the contract requires for the CLIN.
- (d) The fixed price for each CLIN is listed in Section B of this contract.
- (e) The Planned Funding Schedule for each CLIN is in paragraph (n) of this clause. The sum of the planned funding for each CLIN equals the fixed price of the CLIN.
- (f) The Actual Funding Schedule for each CLIN is in paragraph (o) of this clause. It specifies the actual amount of funds allotted and presently available for payment by the Government separately for CLIN 00001, CLIN 00002, CLIN 00006, CLIN 00010, and CLIN 00014 and the work to be performed for the funds allotted.
 - 1) The Contractor may bill against a CLIN only after the Government has allotted funds to the CLIN and the Contractor has delivered the services and earned amounts payable for the CLIN.
 - i. The Contractor may bill only the lower of the two preceding amounts, that is, the lower of allotted funds or amount payable.
- (g) If during the course of this contract the Government is allotting funds to a CLIN per or earlier than the Planned Funding Schedule, this contract to that point will be considered a simple fixed-price contract for that CLIN regardless of the rate at which the Contractor is, or is not, earning amounts payable, and
 - 1) The Government's and the Contractor's obligations under the contract for the CLIN—with the exception that the Government's obligation for the CLIN is limited to the total amount of funds allotted by the Government to the CLIN and similarly the Contractor is not authorized to continue work beyond the point at which the total amount payable by the Government equals the total amount allotted—will be as if the CLIN were both fixed price and fully funded at time of contract execution, that is, the Contractor agrees that: it will perform the work of the contract for that CLIN; and neither the fixed-price for the CLIN nor any other term or condition of the contract will be affected due to the CLIN's being incrementally funded.
 - i. The Contractor agrees, for example, if the Government allots funds to a CLIN per or earlier than all of the funding dates in the Planned Funding Schedule for the CLIN, the Government has met all of its obligations just as if the CLIN were fully funded as of the time of contract execution and the Contractor retains all of its obligations as if the CLIN were fully funded as of the time of contract execution, while at the same time the Contractor is not authorized to continue work beyond the point at which the total amount payable by the Government equals the total amount allotted to the contract; consequently, if the Contractor earns amounts payable at any time in performing work for the CLIN that exceed the total amount of funds allotted by the Government to the contract for the CLIN
 - A. it (not the Government) will be liable for those excess amounts payable
 - B. it will remain liable for its obligations under every term or condition of the contract and

specified in this clause, or from any person other than the Contracting Officer, shall affect the amount allotted by the Government to this contract for a CLIN, which will remain at all times the Government's maximum liability for a CLIN. In the absence of the specified notice, the Government is not obligated to reimburse the Contractor for any amounts payable earned for a CLIN in excess of the total amount allotted by the Government to this contract for a CLIN, whether earned during the course of the contract or as a result of termination.

- (l) Change orders, equitable adjustments, unilateral or bilateral contract modifications, or similar actions shall not be considered increases in the Government's maximum liability or authorizations to the Contractor to exceed the amount allotted by the Government for a CLIN unless they contain a statement increasing the amount allotted.
- (m) Nothing in this clause shall affect the right of the Government to terminate this contract for convenience or default.
- (n) Planned Funding Schedule

ATTACHMENT J.3 - HANFORD SITE SERVICES AND INTERFACE REQUIREMENTS MATRIX

Services listed in the *Hanford Site Services and Interface Requirements Matrix* (Matrix) shall be performed in accordance with the Section H Clause entitled, *Hanford Site Services and Interface Requirements Matrix*.

All services are provided during the Hanford alternate work schedule (AWS) defined as 7:00 a.m. to 4:30 p.m. Monday through Thursday and 7:00 a.m. to 3:30 p.m. on standard Site Fridays unless otherwise noted. Hanford Site contractors can request work outside of this schedule by providing a statement of work and requesting that scope as a usage-based service.

Note: The terms ASTC and LAT&S refer to the Laboratory Analysis and Testing Services contractor.

Legend for Matrix – The Legend for the primary Matrix users/providers is as follows:

MSC	Mission Support Contract(or)
PRC	Plateau Remediation Contract(or)
TOC	Tank Operations Contract(or)
WTP	Waste Treatment and Immobilization Plant (Contractor)
RCCC	River Corridor Closure Contract(or)
Other Site Users	Examples include: Occupational Health Services Contractor (OHSC), Analytical Services and Testing Contractor (ASTC), Energy Savings Performance Contractor (ESPC), Pacific Northwest National Laboratory (PNNL) [activities located on the Hanford Site], Laundry Services Contractor, DOE, etc.

Types of Interfaces –

1. Information (I): knowledge (data, facts, etc) gathered or supplied
2. Physical (P): systems in tangible contact (i.e., ‘pipe-to-pipe’), or a physical exchange of product or materials
3. Service (S): provision of work for another Contractor

Scope/Cost Allocation

Service Description

Physical Security under this activity is for accountable quantities of nuclear and classified materials, including performance testing, intrusion detection, entry/access control, explosive detection, locksmith services, and engineering and maintenance of the physical security and access control systems.

- MSC shall provide Security Representatives for facilities or groups of facilities where there are important safeguards and security (SAS) assets.
- MSC shall develop, or assist in the development of facility asset protection requirements and conduct annual reviews of Asset Protection Agreements.
- MSC shall design security system upgrades for existing facilities with changing requirements and design security systems for new facilities.
- MSC shall provide locksmith support for installation, replacement, and maintenance of locks, keys, and access control systems for the protections of Government property and nuclear materials, including special nuclear materials, classified matter, new facilities and WTP turnover facilities to TOC, etc.
- Hanford Site contractors shall provide the MSC information about SAS arrangements and/or changes prior to new operations commencing, or changing operations or configurations that might alter the performance of existing SAS systems; support the MSC in the development of or update of facility *Asset Protection Agreements*, and requesting locksmith services.

Usage-Based Services

N/A

Direct-Funded Services

Funded through the MSC; provided at no cost to Hanford Site contractors with the exception of physical security upgrades within the facility - these may be shared costs between the MSC and the Hanford Site contractor that has responsibility for the facility.

N/A PNNL

Scope/Cost Allocation

Service Description

Physical security under this activity is for Government property other than nuclear material, special nuclear material, and classified. Physical Security such as fences, locks, etc. through *Asset Protection Agreements*.

- MSC shall develop, or assist in the development of facility asset protection requirements and conduct annual reviews of *Asset Protection Agreements*.
- Hanford Site contractors shall support the MSC in the development of or update of facility *Asset Protection Agreements* and implement those agreements.
- MSC shall provide Technical and Engineering Security services as required for the design and/or turnover of new facilities.

Usage-Based Services

N/A

Direct-Funded Services

MSC bears the cost burden of program administration; Hanford Site contractors bear costs of physical security upgrades. If used by PNNL off Hanford Site, they pay full-cost.

Scope/Cost Allocation

Service Description

The OPSEC Program helps ensure that sensitive information is protected from compromise and secured from unauthorized disclosure, and provides management with necessary information required for sound risk management decisions concerning the protection of sensitive information.

- MSC shall implement a Hanford Site-wide program; assure conformity of implementation with OPSEC standards and requirements; conduct assessment(s) of all Hanford Site facilities having Category I special nuclear material (SNM) (or credible roll-up to Category I SNM); conduct reviews of all Hanford Site facilities that have the potential to process or store classified or sensitive information; and conduct the *Annual Site OPSEC Threat Assessment* and prepare the annual *OPSEC Plan*.
- Hanford Site contractors shall implement their internal OPSEC responsibilities, participate and support Hanford Site-wide OPSEC Working and Awareness groups; provide support to the MSC OPSEC assessments; and support the *Annual Site OPSEC Threat Assessment* and preparation of the annual *OPSEC Plan*.

Usage-Based Services

N/A

Direct-Funded Services

MSC bears the cost of Program administration; Hanford Site contractors/users bear internal implementation costs.

Scope/Cost Allocation

Service Description

The CMPC Program establishes control and accountability requirements for classified matter, marking of classified matter, reproduction, receipt and transmission, and destruction; and, physical protection requirements for classified matter in storage.

- MSC shall provide a centralized CMPC, Classification, Declassification and Unclassified Controlled Nuclear Information (UCNI) Program that includes operation and management of the Classified Document Control Center and management of classified information in the records holding area.
- MSC shall provide trained and authorized personnel to conduct inquiries for incidents of security concern, maintain the reporting database, and assist the contractor in report writing as required.
- Hanford Site contractors shall be responsible for maintaining an updated list of security containers, locations and custodians; support investigation of any incidents of potential or actual compromise of classified; and nominate a sufficient number of Derivative Classifiers and Reviewing Officials who shall be trained and approved by the MSC.

Usage-Based Services

N/A for PNNL

Scope/Cost Allocation

Service Description

A DOE security badge is utilized for all DOE and contractor personnel to gain access to DOE-owned or -leased facilities or areas where DOE-sponsored work is ongoing.

- MSC shall provide badging service for the Hanford Site, which includes manufacture, issuance, destruction, control, and accountability for DOE Standard, Hanford Specific, Temporary, and Personal Identify Verification badges.
- MSC shall coordinate and initiate “STOP ACCESS” procedures, and control and issue private vehicle passes for Property Protection Areas.
- Hanford Site contractors shall obtain badging service from MSC; participate in “STOP ACCESS” program; and obtain vehicle passes from MSC.

Usage-Based Services

Scope/Cost Allocation

Service Description

The Access Authorizations (Security Clearances) Program involves processing, granting, and allowing individuals to retain an access authorization when their official duties require access to classified information or matter, or special nuclear material (SNM).

- MSC shall process all security clearances in support of Hanford Site contractors. These activities include requesting, obtaining, maintaining, downgrading and terminating security clearances, including "Special Access" privileges (e.g., SIGMA). The clearance processing program shall include reviews of each requested clearance action to ensure adequate justification exists and that reporting requirements are met.
- Hanford Site contractors shall request and obtain personnel security clearances, including "Special Access" from the MSC.

Scope/Cost Allocation

Service Description

Site Training Services provides training facility, curriculum, and training delivery services to Federal, contractor, and subcontractor employees in support of the Hanford and PNNL missions consistent with the DOE, local, state, and Federal workforce training requirements.

- MSC shall provide Hanford Site workers (and PNNL, as requested) mandatory standardized training as listed below and optional training as requested to support maintaining a qualified workforce, develop the Annual Training Needs Forecast and Plan, and operate the HAMMER facility.
- MSC shall maintain the employee training records for training provided by MSC.
- MSC shall perform mask fit services for Hanford Site contractors.
- Hanford Site contractors shall provide training priorities, training needs, and input regarding standardized training programs.

Mandatory Standardized Training

1. Hazardous Waste Operations and Emergency Response (HAZWOPER) Training
2. Lockout/tagout of hazardous energy
3. Permit required confined space entry
4. Chronic Beryllium Disease Prevention Program (CBDPP)-
5. Respiratory protection program
6. Hoisting and rigging
7. Fall protection
8. Electrical safety
9. Radiation Safety (e.g., Radiological Worker I and II and Radiological Control Technician training).
10. Criticality Safety
11. Hanford General Employee Training

Usage-Based Services

Site training services, including maintenance of employee training records for training provided by MSC and mask-fit services are usage-based services reimbursed by the user.

Direct-Funded Services

HAMMER base operations for the facility are at no cost to Hanford Site contractors for DOE-EM funded Work Scope.

Scope/Cost Allocation

Service Description

Site Safety Standards are to be used by Hanford Site contractors to ensure common processes for worker safety.

- MSC shall obtain affected Hanford Site contractor approval and establish common safety processes on the Hanford Site as listed below.
- MSC shall maintain a site-wide web-based system with input from other Hanford contractors for sharing operating experiences and lessons learned with a focus on preventing recurrence of safety or reliability events, and to share good work practices in accordance with DOE O 210.2.
- MSC, PRC, and TOC shall work collaboratively and build coalitions with Hanford Site contractors and workers to continue to build a strong and enduring safety culture. Based on input from Hanford Site contractors and workers, the MSC with the PRC and TOC shall identify DOE opportunities to enhance and measure the Hanford safety culture.
- MSC shall manage and administer Hanford Site safety activities/initiatives, such as, Annual Safety Exposition, Hanford Worker Electrical Safety Board, etc., as approved by DOE.
- Affected Hanford Site contractors shall approve common safety standards and develop internal implementing procedures, and participate in Hanford Site safety activities/initiatives, where appropriate, as administered by MSC.
 1. **Common Safety Processes.** Lockout/tagout of hazardous energy
 2. Permit required confined space entry.
 3. Chronic Beryllium Disease Prevention Program (CBDPP).
 4. Respiratory protection program.
 5. Hoisting and rigging
 6. Fall protection.
 7. Electrical safety.
 8. Industrial hygiene exposure records including the generation, common database, and storage.
 9. Employee job task analysis (EJTA) as being implemented on the Hanford site at the present time.
 10. Excavation permits with emphasis on the existing Hanford site system for obtaining excavation permits.
 11. Hazardous Chemical Reporting: Community Right-to-Know with the MSC responsible for obtaining data from other Hanford site contractors, compiling and submitting the required data.

Scope/Cost Allocation

Service Description

Ecological Monitoring and Compliance is to achieve compliance with ecological resource-related legal and regulatory requirements; Biota is monitored to assess the abundance, vigor, or condition, and distribution on the Hanford Site.

MSC shall:

- Assess the impacts to biological resources from Hanford Site operations and legacy contaminants to the environment and monitor the abundance, vigor, and distribution of plant and animal populations on the Hanford Site. This includes baseline surveys of protected biological resources, species, and habitats within key areas of the Hanford Site where the majority of routine operations and clean-up are conducted.
- Conduct ecological compliance reviews for Hanford Site contractors.
- Ecological reviews that are required to be conducted outside the Hanford alternate work schedule will not charge overtime to OHC projects.

Hanford Site contractors shall:

- Allow access to the Ecological Monitoring and Compliance activity for the purpose of collecting information and samples.
- Provide ecological information to the MSC from their sampling activities such as CERCLA/RCRA risk assessments.

Usage-Based Services

Ecological reviews are a usage-based service.

32	Radiological Site Services (RSS)	Information / Service	Usage-Based	Mandatory	Provide service to site contractors	Receive service from MSC				

Scope/Cost Allocation

Service Description

Radiological Site Services (RSS) is a documented set of comprehensive and integrated radiological support programs which provide the technical support, dosimetry, data, and records necessary to demonstrate compliance with required radiological monitoring and to verify the adequacy of Site radiological control programs in protecting the health and safety of workers, the public, and the environment. The RSS includes the Hanford External Dosimetry Program (HEDP), the Hanford Internal Dosimetry Program (HIDP), the Hanford Radiological Instrumentation Program (HRIP), and the Hanford Radiological Records Program (HRRP).

MSC shall provide:

- DOELAP accredited external dosimetry services, including technical support, documentation, and dosimeter preparation and processing, based on the types and quantities of external dosimetry required by all key customers.
- DOELAP accredited internal dosimetry services, including technical support, documentation, and analyses, based on the types and quantities of internal dosimetry required by all key customers
- Calibration, maintenance, and repair services as defined in ANSI 323-1978 for a broad range of portable and semi-portable radiological instrumentation, including technical support and documentation, based on the types and quantities of portable and semi-portable radiological instrumentation calibration, maintenance, and repair services required by all key customers.
- Services to maintain, manage, and procure parts or replacements for the existing Hanford Site pool of radiological instruments, including developing processes for necessary replacement, as required by all key customers.
- Performance testing as defined in ANSI 323A-1997, or other standards as requested, to verify instruments continue to meet operational requirements.
- Management and preservation of current and former radiation monitoring records for DOE (and predecessor agencies) employees, Hanford contractors, sub-contractors, and visitors, including records of existing and past Hanford Site radiation dosimetry policies and practices.

On an as-requested basis, MSC will provide dosimetry and bio-assay scheduling, dosimeter distribution, and other services commonly associated with “Dosimetry Operations.” These services will be fully defined in the SOW and agreed upon by the requesting party and MSC.

Hanford Site contractors shall request, and provide requirements for, service.

Service Description

Biological Controls is a service to control noxious weeds, industrial weeds, other vegetation, and animal pests. The program controls vegetation on approximately 2,000 acres, traps and removes animals, and eliminates insect infestations.

- MSC shall provide a Hanford Site-wide biological control program.
- Hanford Site contractors shall request support as needed.

Usage-Based Services

Hanford Site contractors may request additional services beyond direct funded basic service as a usage-based service

Direct-Funded Services

Basic service funded through MSC; provided at no cost to Hanford Site contractors.

Service Description

Motor Carrier Services provides a centralized pool of vehicles and drivers for the on-site or local transportation of freight including hazardous material at the Hanford Site, including radioactive materials and radioactive/mixed waste.

- MSC shall:
 - Manage, schedule, and conduct motor carrier services.
 - Maintain and operate a centralized pool of vehicles and drivers for the on-site and limited local transportation of freight including hazardous and radioactive materials at the Hanford Site.
 - Act as the Hanford Site motor carrier similar to a commercial motor carrier.
 - Provide compressed gas shipments.
 - Pick up at local vendors as directed by their customers.
 - The Hanford Site contractor will prepare freight for shipment (packaging the freight) and provided associated documentation or direct a pick up of freight from a particular Site contractor or vendor.
 - The preferred method for shipment of freight to other DOE site or to commercial vendor(s) is using a commercial motor carrier.
 - Upon mutual agreement, the Contractor may provide a limited number of specialized vehicles to Other Hanford Site Contractors to support the efficient management of resources. Any vehicles provided by the MSC will remain in the MSC Fleet Maintenance Programs.
- Hanford Site contractors who are customers of this service prepare the waste for transport including shipper/receiver agreement documents, transportation documents for packaging, transportation and receipt by the receiving facility.

Service Description

Fleet Services administers and manages a fleet of motorized vehicles and equipment including, but not limited to sedans, pickups, vans, busses, ambulances, tractors, flatbeds, dump trucks, tool vans, utility maintenance vans, cab and chassis, trailers, forklifts, cranes, generators, compressors, excavators, frontend loaders, dozers, wreckers, and fuel tankers.

- MSC shall provide management and coordination, statistical usage tracking, and reporting on GSA-leased vehicles and DOE-owned vehicles/equipment; perform vehicle and equipment repair and modification services as required (e.g., in the 200 Area); and perform record-keeping, vehicle assignment, ensuring vehicle utilization, and excess/disposal of fleet vehicles and parts. Some vehicles are designated as “regulated” due to contamination and are required to be serviced within radiologically-controlled areas.
- MSC shall provide and execute the DOE approval of equipment/vehicle procurements when necessary.
- Hanford Site contractors shall request and provide requirements for service and those using Fleet Services shall provide report input such as the *Transportation Management Scorecard*.

Usage-Based Services

Fleet facilities maintenance, operations support, consumables, fuel delivery, maintenance, parts, and labor for the DOE fleet.

- Vehicle maintenance services, including inventory of or access to parts normally used for routine maintenance.
- Routine preventive maintenance and inspections in accordance with manufacturer specifications, GSA schedules, and OSHA safety regulations
- Vehicle and equipment corrective maintenance, as required to maintain performance and air quality standards.
- Performance of GSA non-reimbursable services, such as in-the-field service calls (including towing).
- Major component repair and reconstruction of failed major operating and drive train components.
- Auto body, glass and upholstery repair services.
- Performance of customer-specified non-maintenance mechanical support, vehicle and equipment modifications, auxiliary equipment installation and transfer, accident damage repair, and special fabrication services.
- Purchase and distribution of bulk fuel to heavy equipment located in the field.

Direct-Funded Services

- Management of the process for the acquisition, control, assignment, and disposal of DOE fleet equipment and GSA vehicles and associated property, which includes general and special purpose equipment.
- Administration of the GSA lease.

Scope/Cost Allocation

Service Description

Roads and Grounds consist of road maintenance, 24/7 snow removal, traffic management, and common grounds maintenance service for the Hanford Site.

Usage-Based Services

- Hanford Site contractors may request additional services for facility specific services, such as, snow removal on sidewalks.

Direct-Funded Services

- MSC shall maintain primary and secondary Hanford Site roadways, to include patching/paving, striping, and other services; perform maintenance of common grounds; and make recommendations to restrict access and make the appropriate notifications of restricted access or closure to DOE and other Hanford Site contractors in the event that roads are unsafe for travel. MSC shall remove snow at primary and secondary roads and at designated facilities, parking lots, and walkways (per the Hanford Snow Removal Plan).
- Maintain the common grounds to ensure public/worker safety and environmental integrity within the 200, 300, and 600 Areas. Activities in this area include perimeter fence/sign maintenance at the Site boundaries; lawn and landscape care; annual inspection and maintenance of gravel pits; general area cleanup; sweeping sidewalks; washing buildings; sweeping general purpose facility parking lots and repairing bumper blocks.

Scope/Cost Allocation

Service Description

Electrical Transmission, Distribution, & Energy Management is the management function of the high voltage electrical utility consisting of a system for providing power to the facilities at the Hanford Site.

- MSC externally supplies electrical power to Hanford Site contractors.
- MSC shall coordinate with other Hanford Site contractors to obtain the following:
 - Energy cost and consumption data for the *Annual Energy Conservation Performance Report*.
 - Energy cost and consumption data for the quarterly Hanford Site energy cost and consumption date entry to EMS4 database.
 - Facility shut down constraints and impacts due to fuel reductions for the *Emergency Conservation Plan*.
 - Facility electrical load information for the annual electrical load forecast.
 - Other facility electrical or energy information, as needed.
- Hanford Site contractors shall provide input for EMS4 database, annual Energy Conservation Performance Report, Emergency Conservation Plan, and annual electrical load forecast.
- Hanford Site contractors may enter into a service-provider relationship with the MSC and/or other utility providers for the operation, maintenance, and/or closure of all or part of their internal utility systems.
- Hanford Site contractors shall protect Hanford Site systems against disruption and damage during performance of work and support Hanford Site utility operations, maintenance, and closure of a service where appropriate.

Notes:

- The interface point between the MSC electrical distribution system and the Hanford Site contractors' facilities electrical system is routinely the connection at the secondary side of the building service transformer (MSC also owns the electrical meters). However, there may be some facilities where the systems interface is located at a different connection point. The interface points are identified on the electrical utility switching system diagram drawings.
- The 300 Area electrical substation and electrical distribution system will be owned by the RCCC. The RCCC may request MSC to operate and maintain the 300 Area substation and distribution system on a work order basis. Upon completion of the RCCC, or as directed by DOE, the substation/distribution system may be reassigned to the MSC.

Usage-Based Services

Direct, mission-related upgrade projects are sub-contracted by MSC and paid by the requesting Hanford Site contractor.

Direct-Funded Services

Basic service funded through MSC; provided at no cost to Hanford Site contractors

Scope/Cost Allocation

Service Description

The Water System function is a water utility service (the geographic areas to be served are the 100, 600, and 200 Areas). The 300 Area and 100N Area water systems are within the scope of the RCCC, along with the 30-inch concrete line supplying the 100F and 100H Areas, and all distribution piping connecting to the concrete main water lines supplying the 100F, 100H, 100D, 100N, and 100B Areas.

- MSC shall manage the water system in accordance with agreements negotiated with the Hanford Site contractor being served and in accordance with guidance documents cited in state regulations for water systems; and maintain the existing *Water System Master Plan*. The Plan shall document a strategy for managing repairs, life extensions, replacements, and deactivations for facilities and equipment for the water systems within the scope of this contract over a ten year planning horizon.
- MSC shall provide a “purveyor” (per the Washington Administrative Code and other state regulations) for MSC water systems.
- MSC shall be responsible for all aspects of the water distribution system only up to and including the first off-valve or demarcation point outside the customer’s facility or complex of facilities. The customer or facility maintains all responsibility for lines downstream of this agreed-upon point. On side-by-side multiple valve isolations and backflow assemblies, the facility assumes responsibility from the discharge side of the downstream isolation valve. For WTP, the demarcation point is the premise isolation backflow prevention at the fence line. For PFP, the demarcation point is the premise isolation backflow assembly.
- MSC shall perform, as requested, backflow preventer testing, water system contaminant monitoring management, and pipeline sanitization for other Hanford Site contractors (e.g., water systems outside of MSC):
- Hanford Site contractors shall input to the *Water System Master Plan* and negotiate agreements for water utility service.
- PRC shall identify priority water line upgrades which would prevent further ground water degradation; MSC shall perform priority water line upgrades to prevent further ground water degradation.
- Upon completion of the RCCC, or at the direction of DOE, the 300 Area water system may be reassigned to the MSC.

Note: The 100K Area and 400 Area Water Systems will be operated and maintained by the PRC.

Usage-Based Services

Direct, mission-related upgrade projects are paid for by the Site contractor requiring the upgrade. For water systems outside of the MSC, water system contaminant monitoring management is a usage-based service reimbursed by the user. Water permits for Hanford Site contractors’ new facilities is a usage-based service.

Direct-Funded Services

Hanford Site-wide water upgrades and Basic Service are funded through MSC; provided at no cost to site contractors.

43	Sewer Systems	Physical Service	Combination of Usage-Based and Direct-Funded	Mandatory	Provide service to site contractors	Receive service from and provide input to MSC	Receive service from and provide input to MSC	Optional	Receive service from and provide input to MSC	Receive service from and provide input to MSC

Scope/Cost Allocation

Service Description

- Sewer system operations provide sewer pumper truck services and collection of sewage through piping for treatment and disposal in subsurface soil absorption systems. The geographic areas to be served are the 600 Area and 200 Area. The 100N Area sanitary sewer system, -100 B Area, C Area, D Area, F Area, H Area, and the 200 Area ERDF sanitary sewer holding tanks, and the 300 Area sanitary sewer system are within the scope of the RCCC. MSC shall operate the Hanford Site sanitary sewer systems, including compliance sampling; maintenance of support structures, systems, and components; and performance of sewer administration duties in accordance with the State of Washington sanitary sewer regulations.
- MSC shall update the existing *Sewer System Master Plan*. The Plan shall document a strategy for managing repairs, life extensions, replacements, and deactivations for facilities and equipment for the sewer systems within the scope of this contract over a ten year planning horizon and shall be updated every two (2) years.
- Hanford Site contractors shall provide input to the *Sewer System Master Plan*.
- Legacy facilities that are returned to service will be treated as a base, unless special circumstances require facility upgrades.

Notes:

- The 100N Area sanitary sewer system, 100 B Area, C Area, D Area, F Area, H Area, and the 200 Area ERDF sanitary sewer holding tanks, and the 300 Area sanitary sewer system are excluded from the scope of this Contract. These sewer systems are within the scope of the RCCC. Upon completion of the RCCC, or at the direction of DOE, utilities assigned to the RCCC, may be reassigned to the MSC.
- The 100K Area and 400 Area sanitary sewer systems will be operated and maintained by the PRC.

Usage-Based Services

Direct, mission-related upgrade projects are paid for by the Hanford Site contractor requiring the upgrade. Hanford Site contractors are responsible for facility-specific upgrades or new facilities sewer tie-ins under their control. Sewer permits for Hanford Site contractor new construction or project upgrades are a usage-based service.

Direct-Funded Services

Hanford Site-wide sewer upgrades and basic service are funded through MSC; provided at no cost to Hanford Site contractors.

Scope/Cost Allocation

Service Description

Sanitary Waste Management and Disposal function consists of waste collected from on-site dumpsters and transport to off-site landfills for disposal. MSC shall pick-up, inspect, and dispose of non-radioactive, non-hazardous dry waste.

- Hanford Site contractors shall request and provide requirements for service.

Usage-Based Services

Delivery and disposal of sanitary waste for roll off boxes is a usage-based service reimbursed by the user.

Direct-Funded Services

- Management and oversight of Hanford sanitary, inert, and demolition waste landfills that are currently in operation or closed.
- Delivery of and disposal of sanitary waste for dumpsters is provided at no cost to Hanford Site contractors

Service Description

Long-term stewardship (LTS) includes all engineered and non-engineered institutional controls designed to contain or to prevent exposures to any potential residual contamination and waste, such as surveillance activities, record-keeping activities, inspections, groundwater monitoring, ongoing pump and treat activities, cap repair, maintenance of entombed buildings or facilities, maintenance of other barriers and containment structures, access control, and posting signs.

- Other prime contractors’ role is to provide input to the MSC by preparing an LTS Transition and Turnover Package (TTP) in accordance with the approved TTP template.
- MSC shall provide for integrated planning of LTS for the entirety of the Hanford Site.
- MSC shall prepare and maintain the *Hanford Long-Term Stewardship Program Plan and Long-Term Surveillance and Maintenance Plans*.
- MSC shall coordinate with DOE-RL and Hanford Site contractors to compile the results of the annual Hanford Site-wide institutional controls assessment, and to conduct the Hanford Site-wide *Comprehensive Environmental Response, Compensation, and Liability Act of 1980* (CERCLA) 5-year reviews including comment response, interim documentation, and lessons learned.
- MSC shall execute LTS for those portions of the Site assigned to the MSC.
- Hanford Site contractors provide information for the *Hanford Long-Term Stewardship Program Plan*, Long-Term Stewardship Surveillance and Maintenance Plans, *Annual NEPA Mitigation Action Plan Accomplishments*, *IC Plan*, CERCLA 5-year reviews, *Site Transition Plans*, and annual site-wide institutional controls assessment.
- Hanford Site contractors will coordinate with the Hanford LTS Program Plan and provide input to the LTS Transition and Turnover Packages for a given parcel or segment of land to DOE and concurrently to the MSC.
- Hanford Site contractors shall coordinate with the MSC in development of CERCLA RODs including institutional controls to achieve consistency with the LTS Plan.
- Hanford Site contractors shall provide information for the Hanford Site Institutional Controls Plan (ICP) in accordance with Hanford Site CERCLA Records of Decision, Hanford Site RCRA post closure plans, and RCRA Permit Corrective Action Modifications.

Usage-Based Services

Scope/Cost Allocation

Service Description

The *Hanford Site Structures List (List)* and *Hanford Site Assignment List* Is the integrated, central inventory of Hanford facilities, structures, and waste sites. DOE Hanford uses these lists for integrated planning of baselines, cost-estimating, reporting DOE Gold Chart metrics, establishing assignment of responsibility for each facility and waste site to site contractors, support to FIMS, HSTD (Hanford Site Technical Data Base), Caretaker, and WIDS. This activity provides for maintenance, configuration control, and upgrading of the Lists.

- MSC shall maintain the *Hanford Site Structures List* and *Hanford Waste Site Assignment List* serving as Administrator of the data, and is responsible for the platform for the data and Site-wide reporting.
- MSC shall be responsible for the Site-wide configuration control process, and shall be responsible for collecting data from Hanford Site contractors in order to meet all mandatory reporting requirements.
- Proposed changes in assignment of facilities must be ratified by DOE.

Hanford Site contractors deliver facilities, structures, and wastes site data and input to the *Hanford Site Structures List* and *Hanford Waste Site Assignment List*. The Hanford Site contractors shall provide data and support to the MSC, for the Hanford Sites contractor’s facilities, waste sites and activities, to support maintenance of the *Hanford Site Structures List* and *Hanford Waste Site Assignment List*, Hanford Site contractors supplying information/ data are responsible for data quality.

Scope/Cost Allocation

Service Description

Property Systems/Acquisition & Materials Management consists of Site-wide processes and procedures for centralized personal property management functions, such as recycling of precious metals and processing equipment that is no longer needed through the excess property system. Tracking of all DOE-owned, contractor-managed property (site-wide) is accomplished by means of decentralized data entry into the primary property management site-wide database (Sunflower Asset Management System [SAMS]). The Program also manages the centralized storage and staging of equipment and inventory through the use of various on-Site warehouses.

- MSC shall provide a Site-wide Personal Property Systems and Materials Management Program that provides for tracking of accountable personal property, management of the property management database (Sunflower Asset Management System [SAMS], including providing Site-wide property management reports) and other related systems; central recycling; excess property dispositioning; and equipment transfers and loans.
- MSC shall manage the (on-site) “stores” inventory warehouses. As required, the MSC shall provide for delivery of inventory items to on-Site locations managed by other contractors. MSC shall manage the supply chain, and evaluate Site-wide demand, usage trends, and programmatic requirements to act as lead in the reduction of existing line item site inventory to the lowest achievable levels.\
- Hanford Site contractors deliver input to MSC to include warehouse requirement needs, Property Information Data Systems (PIDS) data, and Contractor Balanced Scorecard Report data; and deliver property no longer required.

Usage-Based Services

Hanford Site contractors bear costs associated with delivery of excess materials to the central recycling and turn-over of excess property for disposition.

Direct-Funded Services

MSC bears the cost burden of program administration. Hanford Site contractors bear internal implementation costs.

Package and deliver TRU to PRC	N/A	Package and deliver TRU to PRC	Except DOE, package and deliver TRU to PRC.
	Scope/Cost Allocation										
	<u>Service Description</u>										

This activity provides for TRU and TRUM certification and loading waste for shipment to the Waste isolation Pilot Plant (WIPP).

- PRC shall receive waste from contractors, provides interim storage if required, certifies waste for shipment, prepares payloads, and loads waste for shipment to WIPP or other DOE Sites.
- Hanford Site contractors shall conduct and budget for packaging (if required by WAC) and transporting waste to PRC, and certify for WIPP and load waste for shipment to WIPP or other DOE Sites.
- CCP will provide, operate, and maintain RTR equipment, drum assay equipment, large box NDE/NDA equipment (if needed), and mobile loading equipment.
- CCP will operate and maintain the Hanford Super-HENC equipment for Standard Waste Box (SWB) assay.
- CCP will operate the Shipping and Receiving Bay within WRAP for TRUPACT loading. PRC will operate and maintain the balance of the WRAP facility.
- CCP will provide the equipment for and perform head space gas sampling (HSGS) and analysis.
- CCP will establish and implement appropriate ESH&Q programs to support CCP activities.
- PRC will perform initial (in-field) assay of retrieved waste, as necessary, to segregate TRU from non-TRU waste.
- PRC will perform all waste repackaging activities.
- PRC will provide facility records, packaging records, and other documents necessary for CCP to prepare waste certification packages.
- PRC will provide the necessary public release clearances for CCP generated documents.
- PRC will provide the infrastructure to support installation and operation of the CCP-provided RTR equipment, drum assay equipment, and mobile loading equipment.
- PRC will provide the facility and infrastructure to support the installation and operation of the large box NDE/NDA equipment, if needed.
- PRC will provide mobile crane and crane operator support for CCP mobile loading equipment.
- PRC shall receive TRU waste from other site users and provide interim storage if required.
- PRC will identify ESH&Q interfaces with CCP.
- Other Hanford Generators of TRU waste will provide TRU waste to PRC that complies with WIPP waste acceptance criteria.

Usage-Based Services

- Waste generators provide funding to PRC for the increment of work resulting from their waste.
- RCCC pays only for TRU treatment and packaging, and TRU transport to PRC.

Direct-Funded Services

PRC provides ready-to-serve capability for TRU waste receipt, storage, and repackaging.

Scope/Cost Allocation

Service Description

This activity provides for maintenance, configuration control, and upgrading of key Hanford Site environmental assessment databases.

- The PRC shall serve as Data Manager for the following information systems:
 - Hanford Environmental Information System (HEIS);
 - Sample Data Tracking (SDT) System;
 - Hanford Well Information System (HWIS);
 - Waste Information Data System (WIDS).
- The Hanford Site contractors shall provide data and support to the PRC, for the Hanford Sites contractor’s facilities and activities, to support maintenance of the above listed Hanford-wide environmental databases. Hanford Site contractors supplying information/ data are responsible for data quality.

ATTACHMENT J.7 - DOE Office of Environmental Management FY 14
Annual Performance Agreement

FY14 Annual Performance Agreement

Page Intentionally Blank

**Office of Environmental Management
FY 2014 Performance Agreement**

The Office of Environmental Management (EM) is working to complete the safe cleanup of the environmental legacy brought about by five decades of nuclear weapons development and government-sponsored nuclear energy research. For FY 2014, EM's commitments advance the program and management goals, priorities, and expectations of the Department of Energy (DOE). They will move us toward a more efficient and effective organization by using a business model that reflects the management philosophy of empowering the Field with the authorities and resources necessary to successfully execute the EM Program mission safely. The "lapse in appropriations" at the beginning of the fiscal year has disrupted work execution and may delay completion of proposed milestones.

This Performance Agreement articulates the link between DOE's Strategic Goals and those of EM. It is intended to communicate the metrics used to measure progress, and convey the commitment of EM's Senior Management to the mission of DOE. This Agreement is the commitment by the EM leadership team to turn ideas into reality and resources into results.

DOE Strategic Plan and EM's Mission

In May 2011, the Department released its Strategic Plan, a document that outlines the broad, cross-cutting and collaborative goals that stretch across our complex. The Strategic Plan is intended to serve as a blueprint for DOE to help address the Nation's energy, environmental, and nuclear challenges through transformative science and technology solutions. At the heart of that plan are the following Departmental goals:

DOE Goal 1: Transform Our Energy Systems. Catalyze the timely, material and efficient transformation of the Nation's energy system and secure U.S. leadership in clean energy technologies

DOE Goal 2: The Science and Engineering Enterprise. Maintain a vibrant U.S. effort in science and engineering as a cornerstone of our economic prosperity with clear leadership in strategic areas

DOE Goal 3: Secure Our Nation. Enhance nuclear security through defense, nonproliferation, and environmental efforts

DOE Goal 4: Management and Operational Excellence. Establish an operational and adaptable framework that combines the best wisdom of all Department stakeholders to maximize mission success

The plan expresses how the Department's missions and programs are designed to bring the best minds and capabilities to bear on important problems. DOE draws on the diverse talents of our federal workforce, scientists and engineers from national laboratories, academia, and the private sector in multidisciplinary teams, striving to find solutions to the most complex and pressing challenges. At the time of this writing, DOE has initiated efforts to develop a new Strategic Plan. Once completed, this Performance Agreement will be updated, as appropriate.

Measuring Progress

EM leadership has developed and assigned specific efforts targeted to further the overall mission of the organization. These management initiatives are each led by an assigned Deputy Assistant Secretary sponsor and will be implemented through a Plan of Action and Milestones (POAM). A review of the

status of these initiatives will be conducted on a bimonthly basis to ensure the organization is on-track to meet these high level commitments:

- Partner with NE to develop a strategy and alternatives for the utilization of WIPP for expanded material and waste forms. Resolve storage and disposition pathways of other waste forms
- Execute a National Academy of Science (NAS) study on Waste Classification in coordination with EM-10
- Complete first shipment of Hanford Tank Waste, considered and classified as TRU, to WIPP
- Complete construction of Low Activity Waste (LAW) facility at Hanford, along with direct feed capability and begin radioactive operations of the LAW facility no later than December 2019
- Complete construction by December 2016 and begin radioactive operations for the Salt Waste Processing Facility by December 2018
- Complete treatment of liquid sodium bearing waste at Idaho and close the four remaining liquid waste storage tanks. Achieve full operations, with high reliability, of IWTU
- Award of Paducah Site Surveillance & Maintenance contract
- Award the Expression of Interest/Request for Offerors for the future use of the Paducah gaseous diffusion plant and facilities and uranium tails
- Complete a site-by-site and contract-by-contract plan to consider and implement (as appropriate) the Deputy Secretary's principles for aligning contract management. Plan should include specific milestones and should include the participation of the relevant field office manager and the relevant DAS
- Review the regulatory framework for each site to determine flexibility in aligning expectations (to include potential new milestones and agreements under discussion) with current and out-year budget projections
- Implement process/procedures for scrap metal recycling to address: 1) clean materials in clean areas, 2) clean material in contaminated areas, and 3) contaminated materials in contaminated areas. Initial approach may focus on nickel recycling
- Prepare an EM analysis to assess the EM HQ and Field workforce/skills mix to justify increasing EM's FTE personnel cap. Prepare a presentation to OMB
- Determine viability of processing graphite matrix coated used nuclear fuel (UNF) at SRS
- Continue Safety Conscious Work Environment (SCWE) training for all HQ EM staff. Develop and implement ongoing Safety Culture sustainment actions based on the information from the safety culture extent of condition review and benchmarking data
- Analyze Infrastructure and Min-Safe activities and costs across EM sites. Establish guidance if necessary
- Continue H-canyon operations in support of non-proliferation activities. Facilitate cost-effective use of the Nation's only large-scale operating chemical and nuclear processing facility and comply with the public law by maximizing utilization of H-canyon facilities

Goals and Metrics

EM's primary responsibility is the safe cleanup of the environmental legacy of research and materials production by DOE and its predecessor agencies for which Congress established the EM Program. Programmatic success will be measured by *what* is accomplished, that is the number of sites restored, quantities of waste treated and disposed of, amounts of soil and groundwater remediated, etc. However, overall success will also be measured by *how* the program is managed, i.e., through critical management goals such as safety performance, project and contract management, and excellence in business management practices. To support this commitment to both improvement and programmatic success, EM has identified the following goals, strategies and metrics specifically for FY 2014. These goals evolve directly from DOE's 2012 Amended Strategic Goals articulated by the Secretary of Energy.

Safety Culture

The safety of EM workers is a core value that is incorporated into every aspect of the EM program. To best protect our workers, EM has a goal of zero accidents or incidents in the work place and to date, has maintained a strong safety record. EM continues to utilize the Integrated Safety Management System to ensure that all work activities are appropriately scoped, analyzed for hazards, comprehensively planned to eliminate or mitigate those hazards, and effectively performed by trained employees. In addition, EM follows DOE Order 226.1B; *Implementation of Department of Energy Oversight Policy* that establishes the philosophy that line management is responsible for ensuring safety when work is performed. EM seeks to continue safety improvements by instituting corrective actions, promoting lessons learned, and developing new or improved processes.

Goal 1: Improve safety, security and quality performance towards a goal of zero accidents, incidents, and defects and continue to improve the EM Complex-Wide Safety Culture

Strategies

- Use rigorous management oversight to help ensure EM sites and projects integrate safety, security and quality throughout their lifecycle, including planning, procurement, design, engineering, construction, commissioning, operation, deactivation/decommissioning, and environmental restoration
- Foster a safety culture that promotes quality work in a safe and secure manner by establishing strong leadership behaviors that reflect EM's expectations
- EM will further the implementation of Safety Conscious Work Environment (SCWE) training to all HQ EM staff. Develop and implement ongoing safety culture sustainment actions based on the information from the safety culture extent of condition review and benchmarking data in accordance with DOE's Safety Culture Improvement Implementation Plan
- Develop a transparent relationship with the Defense Nuclear Facilities Safety Board (DNFSB) to expeditiously resolve DNFSB concerns and issues
- For response to formal DNFSB correspondence requiring field input, the Field will submit final products at least 30 days prior to the established formal deliverable due date for Headquarters processing
- Collect key performance metrics that monitor the health of key security programs and equipment to prevent identified adverse outcomes or events, track data, and investigate and address emergent negative trends
- EM will continue to implement its Corporate Quality Program consistent with the quality requirements established in DOE O 414.1D, "Quality Assurance"

Metrics

- Metric 1.01: Maintain an average Total Recordable Case rate of <1.1 and a Days Away from Work, Restricted Work or Transfer case rate of <0.6
- Metric 1.02: Finalize implementation of EM-QA-001 Revision 1 by September 30, 2014, and verify through a HQ assessment of each EM field organization

- Metric 1.03: Ensure at least 80 percent of EM sites and contractors have documented performance metric processes and maintain key performance metrics that monitor the health of key security programs and equipment
- Metric 1.04: Maintain less than 20 percent overdue action items resulting from Defense Nuclear Facilities Safety Board (DNFSB) letters or recommendations
- Metric 1.05: Meet Federal Information Security Management Act (FISMA) requirements in accordance with planned EM activities
- Metric 1.06: Accomplish a web application penetration test of 50 public facing applications throughout the enterprise by September 30, 2014, such that vulnerabilities are discovered and mitigated

Reducing Lifecycle Cost

EM will continue to identify opportunities to make strategic investments that reduce the overall cost of the cleanup program while shortening project and program schedules. The current life-cycle cost estimate for EM is \$274 to \$309 billion. This includes \$100 billion in actual costs from 1997 through 2011, and an additional estimate of \$174 to \$209 billion to complete EM's remaining mission in the timeframe of 2050 to 2062. EM will continue to identify opportunities, including technology development, to reduce the life-cycle cost of its program. In FY 2014, EM plans to continue investing in technologies that might/could reduce life-cycle costs, such as modeling to predict complex behaviors of radionuclides; developing in situ decommissioning sensor performance monitoring; investigating small column ion exchange technology to reduce cost of treating liquid waste; and evaluating the effects of placing heat-generating

Goal 2: Continue cleanup progress in a cost effective manner that is risk-informed, engages stakeholders, applies innovative solutions and provides value to the American taxpayer

radioactive waste in a salt repository.

Strategies

- Reduce risk, lower cost, and accelerate project completion by using the best scientific and technical resources available to ensure the technologies selected for development and deployment are appropriate
- Ensure projects have the tools necessary to succeed in the most efficient manner by working with the Federal staff, contractors, and union representatives to identify their needs
- Use Construction Project Reviews to identify and assist in resolution of key project issues regarding scope, cost, schedule, project risk management, security requirements, and technical approach
- Ensure Construction Project Review recommendations align with contract requirements. Partnership agreements may be considered but are informal
- Continue to implement the Operations Activity Protocol issued as Revision 0, March 15, 2012, conduct quarterly reviews of operations activities and revise as needed based on lessons from implementation
- Work to resolve storage and disposition pathways for HLW and spent nuclear fuel managed by the DOE
- Implement process/procedures for scrap metal recycling to address: 1) clean materials in clean areas, 2) clean material in contaminated areas, and 3) contaminated materials in contaminated areas. Initial approach may be to focus on nickel recycling

- Partner with NE to develop a strategy and alternatives for the utilization of WIPP for NNSA surplus material disposition and expansion of the WIPP mission
- Continue to safely transport and dispose of RH-TRU from Argonne National Laboratory in support of reducing laboratory facility from Category 2 to Category 3 as funding allows
- Reduce the life cycle cost by evaluating and implementing opportunities transferring leasing EM assets for reindustrialization and reutilization especially for renewable energy projects in support of DOE mission
- Work towards substantially completing the Low Activity Waste Vitrification Facility Construction by December 31, 2014
- Expand the use of authorized limits to support a cost effective approach to site remediation and D&D: specifically apply to Gaseous Diffusion Plants, in coordination with Portsmouth and/or Paducah
- Finalize and implement Operation Activity Manager certification program metrics

Metrics

- Metric 2.01: Working with stakeholders, industry and the sites create at least one business model for reindustrialization and reutilization for renewable energy projects on EM lands based on public-private partnership approach
- Metric 2.02: Review the regulatory framework for each site to determine flexibility in aligning expectations with current and out-year budget projections
- Metric 2.03: Complete final evaluation for procurement process to acquire services to deactivate the Paducah Gaseous Diffusion Plant upon turnover from the USEC
- Metric 2.04: Finalize agreement for sale of depleted and off-specification Uranium Hexafluoride Inventories at Paducah and Portsmouth
- Metric 2.05: Initiate an Environmental Assessment (EA) to evaluate the impacts of the receipt, storage and disposition of the German graphite spheres
- Metric 2.06: Conduct two workshops through the National Academy of Sciences on best practices for risk-informing decisions on remedies and closure and post-closure activities
- Metric 2.07: Implement requirement for certification of Operation Activity Managers by December 31, 2013

Achieving Excellence in Contract and Project Management

To ensure that EM delivers the best value for the American taxpayers, the FY 2014 budget request reflects continued improvement in acquisition, contract, and project management. EM will further improve acquisition processes by obtaining early involvement and approvals on various acquisition approaches from DOE senior management, including the Office of Acquisition and Project Management, the Office of the General Counsel, and the Office of Small and Disadvantaged Business Utilization.

EM's continued progress in contract and project management has resulted in EM meeting three of the five criteria needed in order to be removed from the Government Accountability Office's (GAO) High Risk List. One of GAO's remaining concerns is that EM must provide the capacity (people and resources) to address problems. EM's reorganization of February 2012 established project sponsor positions at Headquarters for all capital asset projects Field project and contract management resources will be evaluated to determine and address any gaps in staffing and skills for proper oversight so that any gaps can be addressed. GAO's second remaining concern is that EM must monitor and independently validate the corrective measures that it has taken to help ensure they are both effective and sustainable over the long term. EM's Annual Performance Agreement has been established as a vehicle for measuring,

tracking, and validating progress. EM has also developed a Continuous Improvement Program for Contract and Project Management to guide and monitor improvements.

Goal 3: Improve management of contracts and projects/operations activities with the objective of delivering results on time and within cost

Strategies

- Annually assess contract and project management staffing and skills to build and sustain needed capacity for Federal oversight of EM mission. (*GAO High Risk Criteria*)
- Independently validate the effectiveness and sustainability of contract and project management improvement actions through project and contract management reviews. (*GAO High Risk Criteria*)
- Improve acquisition planning and contract management by adhering to principles described in Deputy Secretary's policy memorandum of December 13, 2012: 1) always seeking to align contractor interest with taxpayer interest; and 2) structuring contracts so that each party bears responsibility for its own actions
- Improve the timeliness of approvals for contract performance baselines, contract modifications, and project/operations activity changes to maintain contract, project/operations activity and budget alignment by ensuring change management requirements and guidance is understood and being followed
- Increase the use of prime contractor small businesses
- Become a stronger owner by ensuring requirements are clearly delineated in the contracts, by holding contractors accountable for delivering results, and by ensuring contractors' performance is fairly documented
- Execute world-class contract and project management, and administration of traditional contracts in accordance with OMB Circular A-123, Federal Acquisition Regulation, Department of Energy Acquisition Regulation, EM Head of Contracting Activity directives to ensure the activities listed below are executed in strict compliance: 1) separation of duties and functions; 2) performance evaluation and measurement; 3) fee determination; 4) timely approval, recording/documentation of changes; 5) resolution of audit findings and other deficiencies; 6) management of acquisition workforce; 7) proper review and certification of business systems; and 8) timely contract closeout
- Make progress in resolving the five oldest outstanding contract changes at each site

Metrics

- Metric 3.01: Achieve the overall prime contract small business goal of 6% for each site with a stretch goal of meeting the current DOE goal
- Metric 3.02: Approve contract performance baselines with work aligned with the contract for the following contracts: 1) DUF6 Conversion Plants; 2) ORP Tank Operations; 3) Waste Treatment and Immobilization Plant project; 4) Salt Waste Processing Facility project; and for all new contracts within 180 days after transition
- Metric 3.03: Implement partnering agreements for the following two contracts: 1) Savannah River Nuclear Solutions; and 2) Idaho Treatment Group
- Metric 3.04: Ensure 90% of capital projects have Federal Project Directors that are certified at the appropriate level assigned to projects not later than CD-3

- Metric 3.05: Complete 16 project peer reviews for active post CD-0 capital projects with TPCs greater than \$10M
- Metric 3.06: Complete a site-by-site and contract-by-contract plan to consider and implement (as appropriate) the Deputy Secretary's principles for aligning contract management
- Metric 3.07: Ensure 95% of contractors maintain their Earned Value Management System certification, when EVMS is required by the contract

Management Excellence

As described in DOE's Strategic Plan, EM's success will require a sustained commitment to management excellence from Headquarters to every site office, service center, laboratory, and production facility. Management principles will be translated into action by focusing on operational and technical excellence. That excellence requires developing the most highly qualified, capable, and flexible federal workforce. Additionally, our management principles require implementation of a performance-based culture that clearly links work to agency goals, hold employees accountable for meeting our mission, and appropriately rewards employees for their efforts. These concepts are represented in EM's fourth goal.

Goal 4: Achieve excellence in leadership and resource management by championing financial stewardship, integrating business processes, optimizing EM culture change, and improving communications with the objective of enhancing accountability and achieving performance results

Strategies

- Use surveys to identify where EM can enhance its customer and stakeholder relationships and implement improvements
- Utilize the results of the Employee Viewpoint Survey to implement actions that will improve all aspects of the EM Workplace and enhance mission execution

Metrics

- Metric 4.01: Analyze Infrastructure and Min-Safe activities and costs across EM sites. Complete Report on the Analysis of Infrastructure And Min-Safe Activities
- Metric 4.02: Prepare an analysis to assess the EM HQ and Field workforce/skills mix and prepare a presentation to OMB by December 2013.
- Metric 4.03: Ensure at least 90% of employees are either on current IDPs or EEPs that align to EM goals and objectives. Review employee Learning and Development progress on a quarterly basis
- Metric 4.04: Develop a strategic framework that integrates leadership culture, employee engagement, safety conscious work environment and diversity and inclusion to implement improvements in organizational culture
- Metric 4.05: Develop an EM complex-wide Human Capital Management Plan to include strategies for Knowledge Transfer
- Metric 4.06: Develop an EM career intern program based on the DOE new Pathways program

Sustainability

As stated in the DOE Strategic Plan, “*The Department is uniquely positioned to lead by example in transforming domestic energy use. Integrating sustainability throughout the Department is an essential aspect of implementing Executive Order 13514, Federal Leadership in Environmental Energy, and Economic Performance, and Executive Order 13423, Strengthening Federal Environmental, Energy, and Transportation Management, as well as related statutes, and meeting or exceeding all required energy management and environmental goals. As stated in the U.S. Department of Energy Strategic Sustainability Performance Plan (SSPP), the Department will reduce greenhouse gas emissions from onsite combustion of fossil fuel, fugitive emissions, and purchased power by 28% and reduce emissions from outside sources—such as business travel and employee commuting—by 13% by 2020. We will strive to exceed these goals at our own facilities by incorporating sustainability into all corporate management decisions, continually improving our operations and existing infrastructure to maximize efficient use of energy and natural resources, and ensuring, whenever built, new facilities are highly energy efficient. We will also meet the new goal on Climate Change Adaptation which has been elevated by the President’s Climate Action Plan in June, 2013*”. The strategies and metrics of EM’s Goal 5 are our responses to the Sustainability challenge.

Goal 5: Execute the EM Mission in a Sustainable Manner

Strategies

- Meet Executive Order 13514 - reduce energy intensity in agency buildings, by soliciting suggestions from the staff and contractors
- Identify means for reducing the overall EM carbon footprint
- Utilize the Department’s Energy Saving Performance Contract (if viable) or alternative data center optimization practices to reduce the IT data center’s infrastructure footprint while providing state of the art services
- Identify activities that promote climate change adaptation and mitigation
- Work with local jurisdictions, as appropriate, to develop regional partnerships for climate change information sharing and collaboration

Metrics

- Metric 5.01: Promote effective IT energy conservation practices across EM, with at least 3 sites joining, or continuing to participate in, EPA’s “Federal Green Challenge” (FGC) or winning a DOE Sustainability (Green IT) award by September 30, 2014
- Metric 5.02: Utilize DOEGRIT or DC Pro energy efficiency assessment tools at 2 EM data centers to document baseline configurations by September 30, 2014
- Metric 5.03: Reduce EM’s IT data center footprint by 20% by September 30, 2014
- Metric 5.04: Conduct detailed risk or vulnerability assessments, as appropriate, for selected EM site(s)
- Metric 5.05: Update site sustainability plans to address climate change resiliency

Process and Procedure

The Office of Program Planning and Budget will track/monitor the progress on strategies and metrics identified in this agreement and provide periodic reports to EM Management. EM DASs, Field

Managers and Office Directors will update the status of all items on a quarterly basis through the predetermined tracking or reporting systems involving the appropriate field sites as needed. All changes to goals and/or metrics will be fully vetted, documented and used as lessons learned when appropriate. All the results will be evaluated and assessed to ensure success meeting of goals as well as their effectiveness and appropriateness. The results of these assessments will be considered for lessons learned and possible impact on FY 2014 goals.

EM Senior Advisor Support

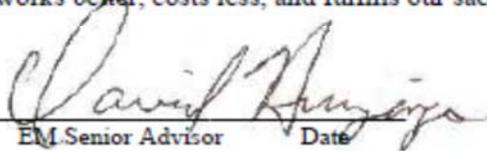

In order to accomplish the goals herein described, it is the EM Senior Advisor's objective to *provide visible, high profile support to:*

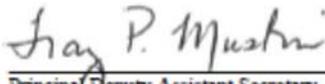

- Ensure that the necessary resources are in place to promote the success of these goals
- Communicate goal achievement and progress periodically through EM Updates, Reports and other media
- Formally recognize superior efforts in achieving goals through incentive awards
- Communicate, negotiate and mitigate responses and issues with senior Department and private sector officials

Office of Environmental Management

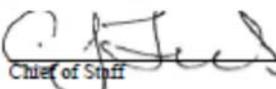

Terms of Agreement

This agreement is intended to improve the internal management of the U.S. Department of Energy's Office of Environmental Management and is not intended to and does not create any right, benefit, trust or responsibility, substantive or procedural, enforceable by law or equity by any party against the U.S. Department of Energy, its agencies, its officers, or any person. This agreement will remain in effect until modified. It is expected that it will be updated as needed to reflect significant changes in budget, policy, personnel or other factors that may affect the accomplishment of objectives. This agreement represents our joint commitment to an EM that works better, costs less, and fulfills our sacred trust to the American People.

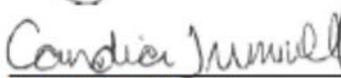

EM Senior Advisor Date

Principal Deputy Assistant Secretary Date 11/7/13

Associate Principal Deputy Assistant Secretary Date 11/20/13

Chief of Staff Date 11/7/13

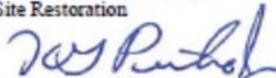

Manager, Carlsbad Field Office Date 11/6/13

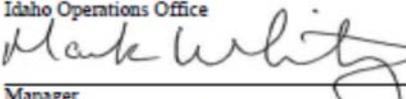

Office of External Affairs Date 11/7/13

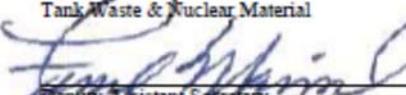

Manager, Consolidated Business Center Date 11/6/13

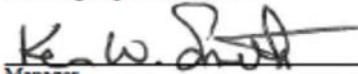

Deputy Assistant Secretary Site Restoration Date 11/25/13

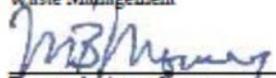

Manager, Idaho Operations Office Date 11/25/2013

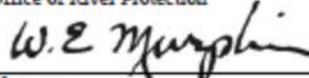

Deputy Assistant Secretary, Tank Waste & Nuclear Material Date 11/16/13

Manager, Oak Ridge Operations Office Date 11/22/13

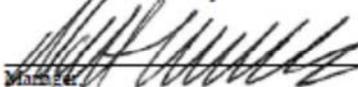

Deputy Assistant Secretary, Waste Management Date 11/25/13

Manager, Office of River Protection Date 11/22/13

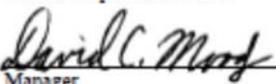

Deputy Assistant Secretary, Safety, Security & Quality Programs Date 11/25/13

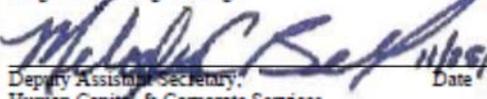

Manager, Portsmouth/Paducah Project Office Date 11/12/13

Deputy Assistant Secretary, Acquisition & Project Management Date Nov 6, 2013

Manager, Richland Operations Office Date 11/25/13

Deputy Assistant Secretary, Program Planning & Budget Date 11/22/13

Manager, Savannah River Site Date 11/6/13

Deputy Assistant Secretary, Human Capital & Corporate Services Date 11/25/13

ETEC

Metrics

- ETEC-01: Complete chemical and radiological soil characterization that defines the nature and extent at the ETEC site by June 30, 2014
- ETEC-02: Complete the Notice of Intent (NOI) and re-Scoping of the NEPA process by April 30, 2014
- ETEC-03: Complete the groundwater characterization for the Area IV responsibilities by September 30, 2014

Idaho

Strategy

- Maintain shipments of TRU waste to WIPP in accordance with WIPP's integrated schedule

Metrics

- INL-01: Begin hot operations of the Idaho Integrated Waste Treatment Unit (IWTU) by June 30, 2014
- INL-02: Initiate treatment of liquid sodium bearing waste by May 30, 2014
- INL-03: Complete exhumation work at the Accelerated Retrieval Project (ARP) II and III facilities by March 30, 2014

LANL

Strategies

- Submit approval of interim work plan on chromium in groundwater
- Resolve litigation on 2010 RCRA Permit

Metrics

- LANL-01: Complete Framework Agreement Legacy TRU Waste Disposal Component: Dispose of 1,106 m³ legacy TRU waste under 3706 TRU Campaign by June 30, 2014
- LANL-02: Submit supplemental interim work plan on chromium in groundwater
- LANL-03: Submit integrated Lifecycle Baseline to Headquarters for approval by July 30, 2014

Moab

Strategy

- Continue efforts to reduce project life cycle costs and reduce the overall project completion schedule

Metrics

- Moab-01: Safely transport and dispose of 650K tons of Uranium Mill Tailings by September 30, 2014
- Moab-02: Continue groundwater cleanup with the extraction of 15,000,000 gallons of water and removal of 250 lbs of uranium by September 30, 2014

Nevada

Strategies

- Continue progress toward closure of approximately 900 subsurface contaminated groundwater sites
- Continue audits and waste certification reviews in support of generator programs to ensure compliance with the Nevada National Security Site Waste Acceptance Criteria

Metric

- NNSS-01: Complete characterization activities for 19 contaminated soil sites and closure of 16 contaminated soil sites

Oak Ridge

Strategy

- Establish a TRU Central Characterization Program through CBFO

Metrics

- ORO-01: Submit integrated lifecycle baseline updates to Headquarters for approval by December 31, 2013
- ORO-02: Obtain agreement from regulators for the siting of the Environmental Management Disposal Facility by September 30, 2014
- ORO-03: Submit CD-1 package for the Outfall 200 project in sufficient time for approval by September 30, 2014
- ORO-04: Complete demolition and waste disposal for four of the remaining six units of the K-25 Building at Oak Ridge's East Tennessee Technology Park by September 30, 2014
- ORO-05: Renegotiate the current STP milestone for construction start of the sludge build out project by September 30, 2014

Office of River Protection

Strategies

- Resolve issues with respect to the High Level Waste Facility sufficiently that plans can be completed and construction ramped up to planned level in FY14
- Continue construction on Analytical Laboratory, Low Activity Waste Facility, and Balance of Facilities
- Define the path forward for the tanks that potentially contain contact-handled TRU waste

Metrics

- ORP-01: Complete the High-Level Waste (HLW) Facility Technical Issue Resolution Plan so that decision can be made on resumption of HLW production engineering and appropriate construction by June 30, 2014
- ORP-02: Complete an initial version of the Interface Control Document (ICD) 19 that provides the waste characterization feed parameters necessary to optimize Full Scale Vessel Testing by September 30, 2014
- ORP-03: Complete hard-heel waste removal from 4 single shell tanks in C Farm by September 30, 2014
- ORP-04: Restart the 242-A Evaporator and conduct 3 evaporator campaigns by July 30, 2014

Portsmouth/Paducah

Metrics

- PPPO-01: Complete process to support issuance of ROD on CERCLA cell at Paducah
- PPPO-02: Submit to Ohio Environmental Protection Agency (Ohio EPA) the Proposed Plan for the Site-Wide Waste Disposition Evaluation Project by September 30, 2014
- PPPO-03: Establish long term operational parameters and align operational baseline for DUF6 by September 30, 2014
- PPPO-04: Submit to Ohio EPA the Proposed Plan for the Process Buildings and Complex Facilities D&D Evaluation Project by September 30, 2014
- PPPO-05: Disposition Legacy and newly generated LLW & MLLW of 10,000 cubic meters
- PPPO-06: Remove 50 complete cells of process gas equipment from X-326 process building at the Portsmouth Gaseous Diffusion Plant
- PPPO-07: Complete shipment of a combination of 500 converters and compressors from the X-326 process building

Richland

Strategies

- Initiate implementation of beryllium corrective action plan products into the site's Chronic Beryllium Disease Prevention Program (CBDPP)
- Issue the draft natural gas pipeline Environmental Impact Statement for public comment

Metrics

- RL-01: Complete removal of the 174 glove boxes associated with Plutonium Finishing Plant capital asset project
- RL-02: Complete cleanup of 80 waste sites in the Columbia River Corridor
- RL-03: Complete decontamination and demolition of all (11) surplus facilities in the Columbia River Corridor (except 324 Building and 100K)
- RL-04: Remediate 1.8 Billion gallons of contaminated groundwater
- RL-05: Complete a Pretreatment Facility Technical Issue Resolution Plan for the Waste Treatment Plant project that outlines scope and schedule to resume Pre-Treat Facility engineering and return the HLW Facility to construction status by September 30, 2014

Savannah River

Strategies

- Continue processing Used Nuclear Fuel (e.g., Sodium Reactor Experiment (SRE); Material Testing Reactor (MTR); and High Flux Isotope Reactor (HFIR) at H Canyon)
- Dissolve plutonium feedstock in H Canyon to feed HB line for conversion to oxide (for MOX), meeting HB-Line throughput requirements
- Perform activities to reduce the risk to personnel and the environment by reducing the residual plutonium-238 contamination in the F-Area Materials Storage Facility (235-F) as committed in DNFSB Recommendation 2012-1

Metrics

- SRS-01: Dissolve plutonium feedstock in H Canyon at the Savannah River Site to feed HB line for conversion to oxide (for MOX), meeting HB-Line throughput requirements

- SRS-02: Perform activities to reduce the risk to personnel and the environment by reducing the residual plutonium-238 contamination in the F-Area Materials Storage Facility (235-F) as committed in DNFSB Recommendation 2012-1
- SRS-03: Produce 100 canisters of highly radioactive waste with 2 million curies at the Defense Waste Processing Facility at Savannah River by September 30, 2014
- SRS-04: Perform activities to support 46 TRUPACT3 shipments of Legacy CH-TRU Waste out of SRS to the WIPP by September 30, 2014.
- SRS-05: Close Tanks 5 and 6 at the Savannah River Site by September 30, 2014
- SRS-06: Tank waste processed for disposition (mass of sodium): 400 metric tons by September 30, 2014
- SRS-07: Accept FRR and DRR receipts as agreed to with NNSA
- SRS-08: Complete processing Sodium Reactor Experiment (SRE) Fuel and begin treatment of aluminum-clad spent nuclear fuel
- SRS-09: Determine viability of processing graphite matrix coated used nuclear fuel (UNF)
- SRS-10: Complete CPA 100 foot elevation north labyrinths piping installation.
- SRS-11: Implement Savannah River National Laboratory Infrastructure Plan to reduce operational cost by facility and scientific instrument renewal as well as an improved Asset Condition Index

West Valley

Strategy

- Build a dry cask storage system for HLW canisters to permit timely D&D of the site.

Metrics

- WVDP-01: Complete demolition of the Environmental Lab by June 30, 2014
- WVDP-02: Complete fabrication of eight Vertical Storage Casks and eight Multi Purpose Canisters for the High-Level Waste Canister Relocation Project by September 30, 2014
- WVDP-03: Complete Vitrification Cell decontamination and final survey by September 30, 2014

ATTACHMENT J.9 - PERFORMANCE EVALUATION AND MEASUREMENT PLAN

A. INTRODUCTION

This Performance Evaluation and Measurement Plan (PEMP) is the basis for the Laboratory Analysis and Testing Services Contract evaluation of the Contractor's performance on the Award Fee incentives and for presenting an assessment of that performance to the Fee Determining Official (FDO). It describes specific criteria and procedures used to assess the Contractor's performance and to determine the amount of fee earned. Actual performance fee determinations and the methodology for determining fee are unilateral decisions made solely at the discretion of the Government.

The intent of this Plan is to incentivize the highest levels of excellence in specific focus areas -- but not at the expense of basic schedule, safety, or technical performance. Accordingly, no fee will be paid if the Contractor's basic schedule, safety, or technical performance (contract requirements) is less than Very Good. DOE's documented basis for all award-fee determinations will include, at a minimum, a determination whether basic schedule, safety, or technical performance is at a Very Good level. This determination and the methodology for determining the award fee are unilateral decisions made solely at the discretion of the Government.

No Award Fee is available for performance at the Satisfactory level since the contractor is already earning normal profit in its fixed-price amount for such performance.

If the Contractor's performance is considered unacceptable in *any* area of contract performance, the FDO may, at his or her discretion, determine the Contractor's overall performance to be unacceptable and withhold the entire performance fee for the evaluation period.

B. ORGANIZATION

The award fee organization consists of: the Fee Determining Official (FDO); an Award Fee Board (AFB) that consists of the COR as chairperson; the Contracting Officer; other functional area participants; and advisor members.

C. RESPONSIBILITIES

1. Fee Determining Official. The FDO approves the award fee plan and any significant changes. The FDO reviews the recommendation(s) of the AFB, considers all pertinent data, and determines the earned award fee amount for each evaluation period.
2. Award Fee Board: Under the leadership of the AFB Chair, AFB members review performance reports and COR evaluation(s), consider all information from pertinent sources, prepare interim performance reports, and prepare the Fee Recommendation Report to be presented to the FDO. The AFB may also recommend changes to this plan.
3. AFB Recorder. The AFB recorder is responsible for coordinating the administrative actions required by the COR, the AFB and the FDO, including:
 - a. receipt, processing and distribution of reports and evaluations from all required sources;
 - b. scheduling and assisting with internal evaluation milestones, such as briefings; and
 - c. accomplishing other actions required to ensure the smooth operation of the award fee process.

4. CO. The CO is the liaison between Contractor and Government personnel and shall ensure the incentive process is properly administered in accordance with agency regulations. The CO shall also modify the contract in regards to any contractual issues that may arise during the term of the contract.
5. COR. The COR maintains written records of the Contractor's performance in their assigned evaluation area(s) so that a fair and accurate evaluation is obtained. The COR prepares interim and end-of-period evaluation reports as directed by the AFB.

D. FEE ALLOCATION

The available fee for each evaluation period is shown in Attachment 1. The fee earned will be paid based on the Contractor's performance during each evaluation period for the following incentives:

- Incentives 1 through 3: This part is based on consideration of quantitative performance measures as compared to targets specified in this PEMP. The amount of fee allocated to this part is 60% of the total.
- Incentives 4 through 7: This part is based on consideration of Contractor performance in areas that cannot be measured quantitatively, taking into account external factors and conditions. The amount of fee allocated to this part is 40% of the total.

Details are provided in Attachment 1 to the PEMP.

E. FEE EVALUATION PROCESS

The first evaluation period shall commence on the day the Contractor assumes full responsibility for performing work at the 222-S Laboratory as specified in Section C.2.1.9. The Contractor will be evaluated annually to determine eligibility for award fee.

- a. No later than ten (10) calendar days after the end of an evaluation period, the Contractor shall provide the CO with an electronic copy of the Contractor's self-assessment showing an assessment of performance against the evaluation criteria set forth in this PEMP. Where applicable, the self-assessment shall include, as an attachment, calculations showing the quantitative basis for claimed achievements.
- b. No later than twenty (20) calendar days after the end of an evaluation period, COR(S) will prepare and submit an independent assessment of Contractor performance against the evaluation criteria set forth in this PEMP. The assessment will include a validation of any supporting materials the Contractor has provided.
- c. Within approximately sixty (60) calendar days after the end of an evaluation period, the AFB will consolidate COR assessments, validations, and supporting information, and the AFB Recorder will submit an evaluation report and fee recommendation to the FDO. Because this report is pre-decisional, its contents will not be formally shared with the Contractor. If the Contractor and DOE assessments are at significant variance, then the AFB will take whatsoever actions it deems appropriate to gather additional

information from the Contractor and resolve differences.

- d. Within seventy (70) calendar days after the end of an evaluation period or sixty calendar days (60) after receipt of the Contractor's self-assessment, whichever is later, the FDO will make a determination of fee earned and notify the Contractor in writing.
- e. Within thirty (30) calendar days after the FDO determination of fee earned for the evaluation period, the CO will issue a contract modification authorizing payment of the earned fee amount.

F. DOCUMENTATION

The rationale for fee payments will be documented by the AFB and the FDO. When discussions are held by the people listed in Section C above that significantly impact DOE evaluation of Contractor performance, the major conclusions of the discussion and the rationale behind them will be documented in the form of signed and dated notes, minutes, or correspondence. This documentation will be kept by the AFB Recorder until the fee payment is finalized, at which time it will be placed in the contract file of the ORP Contracts and Property Management Division along with the AFB Fee Recommendation and the FDO's Fee Determination Report.

G. COMMUNICATION

The Contractor may request informal feedback on any aspect of its performance during any interface meeting with the CO. In the spirit of open communication and shared goals, DOE will make a good faith effort to respond in a timely manner with complete and actionable advice based on currently known information.

H. FEE PLAN CHANGE PROCEDURE

The PEMP will be unilaterally established by the Government. The initial PEMP and any subsequent revisions shall be provided to the Contractor not later than thirty (30) calendar days prior to the start of the evaluation period to which the revisions apply. The PEMP may be revised unilaterally by the Government at any time during the period of performance. The Contractor may recommend changes to the CO no later than 60 days prior to the beginning of the new evaluation period.

All significant changes are approved by the FDO; however, the AFB Chairperson may approve other changes. Examples of significant changes include changing evaluation criteria, adjusting weights to redirect the Contractor's emphasis to areas needing improvement, and revising the distribution of fee dollars.

I. CONTRACT TERMINATION

If the contract is terminated after the start of a fee evaluation period, the available fee for that period shall be prorated and the amount of fee earned by the Contractor shall be determined by the FDO using the fee evaluation process described in this PEMP.

ATTACHMENT J.9.1 - DETAILED FEE PLAN

Total Award Fee Available – Second Option Year – Months 37 through 49

Total Award Fee Available	\$233,619.37	2.5% of contract price for applicable period
---------------------------	--------------	--

Incentives Award Fee Allocation Table

Incentive	VALUE (%)	VALUE (\$)
1 - Delivery	20%	\$46,723.87
2 - Evaluations/Proficiency Tests	20%	\$46,723.87
3 - Maintain Holding Times	20%	\$46,723.87
4 - <u>Business Interfaces and Efficiency</u>	10%	\$23,361.94
5 - <u>Analytical Reporting and Data Quality</u>	10%	\$23,361.94
6 - <u>Environmental Stewardship and Compliance</u>	10%	\$23,361.94
7 - <u>Worker Safety, Health, and Safety Culture</u>	10%	\$23,361.94
Total <u>Award</u> Fee Available	100%	\$233,619.37

Descriptions and Evaluation Criteria for Incentives 1 through 3

<u>Incentive</u> 1 (See Section C.1.2.5)	Delivery	Due Date: 9/20/2019
		Value (%): 20%
		Value (\$):\$46,723.87
Performance Objective	The Contractor will provide at a minimum 95% on-time delivery of analytical deliverables due to customers during this evaluation period.	
Performance Measures/Surveillance Method	This incentive will be measured by dividing the number of on-time analytical deliverables by the total number of analytical deliverables due to customers during this evaluation period.	
Performance Target	Available <u>award</u> fee will be: Score % less than or equal to 95%, is not eligible for Fee	

	Score % greater than 95% and less than 97%, is eligible for 50% of Fee Score % greater than or equal to 97%, is eligible for 100% of Fee
--	---

Incentive 2 (See Section C.2.1.4)	Evaluations/Proficiency Tests	Due Date: 9/20/2019
		Value (%): 20%
		Value (\$): \$46,723.87
Performance Objective	The Contractor shall maintain an overall average score of at least 95% for proficiency tests performed during the evaluation period.	
Performance Measure/Surveillance Method	This incentive will be measured by the percent of acceptable performance evaluation results of the total number of performance evaluation analyses performed.	
Performance Target	Available award fee will be: Score % less than or equal to 95%, is not eligible for Fee Score % greater than 95% and less than 97%, is eligible for 50% of Fee Score % greater than or equal to 97%, is eligible for 100% of Fee	

Incentive 3 (See Section C.1.2.1)	Maintain Holding Times	Due Date:9/20/2019
		Value (%): 20%
		Value (\$): \$46,723.87
Performance Objective	The Contractor will maintain holding time performance at greater than or equal to 95% of all samples received during this evaluation period.	
Performance Measure/Surveillance Method	This incentive will be measured by dividing the number of holding times met by the total number of samples received by the laboratory during this evaluation period.	
Performance Target	Available <u>award</u> fee will be:	

	Score % less than or equal to 95%, is not eligible for Fee
	Score % greater than 95% and less than 97%, is eligible for 50% of Fee
	Score % greater than or equal to 97%, is eligible for 100% of Fee

Evaluation Methodology for Incentives 4 through 7

DOE will evaluate performance for Incentives 4 through 7 against the desired outcomes specified below. The evaluation will assign a Numerical Rating of 0 to 100 and associated adjectival rating. The numerical ratings shall correspond to the Percent of Available Fee Earned awarded to each of these incentives as shown in the Ratings and Description Chart below. Ratings shall take into account whether Contractor performance (as opposed to other factors and conditions) directly contributed to the desired outcome.

While Incentives 4 through 7 each have associated evaluation criteria and surveillance methods, DOE may consider other pertinent information in determining performance. DOE may not use all of the listed surveillance methods during any one evaluation period, but rather will select a subset of the listed surveillance methods appropriate to current priorities and concerns.

For Incentives 4 through 7, an adjectival rating below Good for total performance is a matter of concern to DOE-ORP. Although this rating represents satisfactory performance, it indicates significant room exists for improvement in quality of services delivered.

Descriptions and Evaluation Criteria for Incentives 4 through 7

<u>Incentive 4</u>	Business Interfaces and Efficiency	Due Date: 9/20/2019
		Value (%): 10%
		Value (\$):\$23,361.94
Performance Objective	The Contractor will maintain positive and effective relationships with DOE and interface partners	
Award fee evaluation criteria	<ul style="list-style-type: none"> • Service Level Agreements are implemented and updated in a timely manner to reflect changing customer baselines. • Customer (Non-TOC) costs associated with analytical work are calculated according to a clear and consistent documented basis. • Negotiations with interface partners are carried out in a spirit of cooperation and transparency, including timely submission of requests for additional data, timely counteroffers, conveying a positive and professional attitude. • Dispute resolution processes are robust, effective, and used appropriately. • The Contractor demonstrates sustainable reductions in use of government-furnished property, materials, and services. 	

	<ul style="list-style-type: none"> • Key personnel remain in their posts for the contractually required period.
Surveillance Method	<ul style="list-style-type: none"> • Check alignment between the sample receipt schedules shown in SLAs and the corresponding actuals. • Verify Contractor cost estimating procedures for reasonableness for Non-TOC customers. • Verify whether the Contractor’s cost estimating procedures were correctly used for Non-TOC customers. • Note the frequency with which inter-contractor disputes are elevated to DOE for resolution. • Check invoices submitted by TOC and MSC to see whether Contractor usage of their DOE direct funded services and materials is reasonable. • Validate Contractor claims of sustainable reductions in use of government-furnished property, materials, and services. • Consider any changes in key personnel.

<u>Incentive 5</u>	Analytical Reporting and Data Quality	Due Date: 9/20/2019
		Value (%): 10%
		Value (\$):\$23,361.94
Performance Objective	The Contractor will deliver a high-quality product that meets Customer needs and provides maximum value to the Hanford site cleanup mission.	
Award fee evaluation criteria	<ul style="list-style-type: none"> • Quality of reporting measured by issues identified through customer feedback which includes: review comment records, complaints, and requests for revised or corrected reports. • The number and seriousness of quality issues associated with analytical data and the effectiveness and speed with which they are resolved. • Appropriateness of sample archival and sample preservation activities to meet customer and site needs. • Effective implementation of compliant QA processes including a proactive QA assessment and evaluation program. 	
Surveillance Method	<ul style="list-style-type: none"> • Solicit input from customers on the quality of Contractor analytical services. • Consider review comment records, complaints, and requests for revised and corrected reports. • Check sample archiving to determine whether appropriate protocols are being observed for sample preservation. • Observe Laboratory activities and note any procedural non-compliances. 	

	<ul style="list-style-type: none"> • Audit the Contractor’s QA program.
--	--

<u>Incentive 6</u>	Environmental Stewardship and Compliance	Due Date: 9/20/2019
		Value (%): 10%
		Value (\$):\$23,361.94
Performance Objective	The Contractor will demonstrate sound Environmental Stewardship and Compliance	
Award fee evaluation criteria	<ul style="list-style-type: none"> • Contractor actions fully support the TOC and MSC in maintaining applicable environmental permits and implementing waste minimization and pollution prevention practices • Early identification of issues and concerns through a proactive assessment and evaluation program • Number and seriousness of any non-compliances, infractions, or violations and the timeliness and quality of related reporting and responses. • Compliance with requirements for management of chemicals. 	
Surveillance Method	<ul style="list-style-type: none"> • Solicit TOC input on the effectiveness of Contractor support in environmental stewardship and compliance. • Review Contractor self-assessments of environmental compliance and waste management activities. • Observe waste management practices and note any non-compliances with procedures and environmental regulations. • Note the number and seriousness of any non-compliances, infractions, or violations and the timeliness and quality of related reporting and responses. • Observe whether the Contractor’s chemical management practices are in compliance with procedures and environmental regulations. 	

<u>Incentive 7</u>	Worker Safety, Health, and Safety Culture	Due Date: 9/20/2019
		Value (%): 10%
		Value (\$):\$23,361.94
Performance Objective	Workers at the 222-S Laboratory are protected from health and safety hazards, and are encouraged to raise health and safety concerns without fear of retaliation.	
Award fee evaluation criteria	<ul style="list-style-type: none"> • Issue identification is encouraged, and tracked in an issues management system. Resolution is timely, effective, and prevents negative impact to personnel safety. 	

	<ul style="list-style-type: none"> • Clear, timely, and effective communication to workers about hazards and avenues available for raising safety and health concerns. • Actions and plans by Contractor management and its workforce to continuously improve worker safety, health, and safety culture. • Prompt and accurate reporting on work-related injuries, illnesses, and exposures among Contractor employees. • Effectiveness of processes defined in the Contractor’s Integrated Safety Management System.
Surveillance Method	<ul style="list-style-type: none"> • Review the Contractor’s VPP/Safety Improvement Plan, Performance Objectives, Measures, and Commitments (POMC), and their completion status. • Monitor the Contractor’s issue management system and other activities to identify and correct safety and health issues. • Monitor Management response to and reporting of worker injuries, illnesses, and exposures, including any corrective actions. • Monitor Contractor compliance with safety and health regulations. • Review the results of any safety culture surveys and assessments (internal and external) of Contractor staff performed during the evaluation period. • Observe communications with workers to see whether safety messages are consistent and effective.

Ratings and Definitions Chart

Assigned Numerical Rating	Adjectival Rating <i>(corresponding to Numerical Rating)</i>	Definition	Percentage of Award Fee Earned
91 to 100	Excellent	Contractor has exceeded almost all of the significant award-fee criteria and has met overall cost, schedule, and technical performance requirements of the contract in the aggregate as defined and measured against the criteria in the award-fee plan for the award-fee evaluation period. Contractor's work is highly professional. Contractor solves problems with very little, if any, Government involvement. Contractor is proactive and takes an aggressive approach in identifying problems and their resolution, including those identified in the risk management process, with a substantial emphasis on performing quality work in a safe manner within cost/schedule requirements. No significant rework.	91% to 100%
76 to 90	Very Good	Contractor has exceeded many of the significant award-fee criteria and has met overall cost, schedule, and technical performance requirements of the contract in the aggregate as defined and measured against the criteria in the award-fee plan for the award-fee evaluation period. Contractor solves problems with minimal Government involvement. Contractor is usually proactive and demonstrates an aggressive approach in identifying problems and their resolution, including those identified in the risk management process, with an emphasis on performing quality work in a safe manner within cost/schedule requirements. Problems are usually self-identified and resolution is self-initiated. Some limited, low-impact rework within normal expectations.	25% to 50%

51 to 75	Good	Contractor has exceeded some of the significant award-fee criteria and has met overall cost, schedule, and technical performance requirements of the contract in the aggregate as defined and measured against the award-fee plan for the award-fee evaluation period. Contractor is able to solve basic problems with adequate emphasis on performing quality work in a safe manner within cost/schedule objectives. The rating within this range will be determined by level of necessary Government involvement in problem resolution, including those problems identified in the risk management process, and extent to which the performance problem is self-identified vs. Government-identified. Some re-work required that unfavorably impacted cost and/or schedule.	0%

CONTRACTOR PERFORMANCE EVALUATION REPORT

Calculations: For Incentives 1 through 3, percent of fee earned is calculated according to the instructions provided in each incentive’s description and applied to the corresponding value in the Incentives Award Fee Allocation table. For Incentives 4 through 7, the assigned rating is converted to a percent according to the Ratings and Definitions Chart and then multiplied by the value provided in the Incentives Award Fee Allocation Table. Fees for the seven incentives are summed to produce the total fee earned. A sample evaluation form is shown on the next page.

PEMP EVALUATION SCORE CARD EXAMPLE

ATTACHMENT J.10 - EXECUTED PERFORMANCE GUARANTEE AGREEMENT

[Not Applicable]

ATTACHMENT J.11 - ACRONYM LIST

Acronym	Description
ABCASH	Automated Bar Coding of All Samples at Hanford
ADR	Alternative Dispute Resolution
AEA	Alpha Energy Analyzers
AFB	Award Fee Board
ASME	American Society of Mechanical Engineers
ASTC	Analytical Services Testing Contractor (Same as Laboratory Analytical Services and Testing Contractor (LAS&T))
BMS-OTM	Overtime Management System
CAIRS	Computerized Accident/Incident Reporting System
CCR	Central Contractor Registration
CERCLA	Comprehensive Environmental Response Compensation and Liability Act
CFR	Code of Federal Regulations
CLIN	Contract Line Item Number
CIAC	Cyber Incident Advisory Capability
CITS	Chemical Inventory Tracking System
CO	Contracting Officer
COR	Contracting Officer Representative
CPARS	Contractor Performance Assessment Reporting System
CRD	Contractor Requirements Document
DEAR	Department of Energy Acquisition Regulation
DOE	Department of Energy
DOL	Department of Labor
DPLH	Direct Productive Labor Hours
DSA	Documented Safety Analysis
DSC	Differential Scanning Calorimeters
EEO	Equal Employment Opportunity
EEOICPA	Energy Employees Occupational Illness Compensation Program Act
ECP	Employee Concerns Program
EFT	Electronic Funds Transfer
EMS	Environmental Management System

EMCBC	Environmental Management Consolidated Business Center
EJTA	Employee Job Task Analysis
EPA	Environmental Protection Agency
ERISA	Employee Retirement income Security Act
FAPIIS	Federal Awardee Performance and Integrity Information System
FAR	Federal Acquisition Regulation
FDO	Fee Determining Official
FP	Fixed Price
FOCI	Foreign Ownership, Control, or Influence
FNVA	Foreign National Visits and Assignments
GAO	Government Accountability Office
GC/MS	Gas Chromatograph/Mass Spectrometers
GEA	Gamma Energy Analyzers
GFE	Government Furnished Equipment
GFP	Government Furnished Property
GSA	General Services Administration
GSP	Graded Security Protection
HAZQARD	Hanford Analytical Services Quality Assurance Requirements Document
HEIS	Hanford Environmental Information System
HEWT	Hanford Employee Welfare Trust
HGET	Hanford General Employee Training
HISI	Hanford Information Systems Inventory
HLAN	Hanford Large Area Network
HSPP	Hanford Site Pension Plan
HSSP	Hanford Site Savings Plans
HTML	Hyper Text Markup Language
IC	Ion Chromatographs
IDMS	Integrated Document Management System
ICD	Interface Control Documents
IG	Inspector General
IH	Industrial Hygiene
ICP/MS	Inductively Coupled Plasma/Mass Spectrometer systems
Inc.	Incorporated
ISAP	Infrastructure and Services Alignment Plan
ISO	International Organization for Standardization

ITEM	Integrated Training Electronic Matrix
JV	Joint Venture
LA&TS	Laboratory Analysis and Testing Services
LAS&T	Laboratory Analytical Services and Testing Contractor
LIMS	Laboratory Information Management System
LLC	Limited Liability Corporation
LTS2	Laboratory Training System 2
MC&A	Material Control and Accountability
MBA	Material Balance Area
MOA	Memoranda of Agreement
MOU	Memoranda of Understanding
MSC	Mission Support Contractor
MSDS	Material Safety Data Sheets
NAICS	North American Industrial Classification System
NEPA	National Environmental Policy Act
NIOSH	National Institute for Occupational Safety and Health
NIST	National Institute of Standards and Technology
NQA	Nuclear Quality Assurance
NTP	Notice to Proceed
OCI	Organizational Conflict of Interest
OpEx	Operating Experience
OPEXShare	OPERating EXperience Sharing
OPSEC	Operations Security
ORFSC	Oak Ridge Financial Service Center
ORP	Office of River Protection
OSHA	Occupational Safety and Health Administration
OUO	Official Use Only
PE	Performance Evaluation
PEMP	Performance Evaluation Measurement Plan
PDF	Portable Document Format
PIDS	Property Information Data System
PIV	Personal Identity Verification
PMP	Pension Management Plan
PNNL	Pacific Northwest National Laboratory

POMS	Performance Objectives, Measurements, and Commitments
PPA	Pension Protection Act
PPIRS	Past Performance Information Retrieval System
PRC	Plateau Remediation Contractor
PROTRAX-ATL	Procedure Status Tracking
Pu	Plutonium
PWS	Performance Work Statement
RCW	Washington Revised Code
RFP	Request for Proposal
QA	Quality Assurance
QAP	Quality Assurance Program
QC	Quality Control
RCCC	River Corridor Closure Contract(or)
RCRA	Resource Conservation and Recovery Act
RL	Richland Operations Office
SAA	Satellite Accumulation Areas
SAM	System for Award Management
SAMS	Sunflower Asset Management System
SAS	Safety and Security
SBA	Small Business Administration
SCR	System Change Request
SEB	Source Evaluation Board
SECON	Security Conditions
SEM	Scanning Electron Microscopes
SES	Security and Emergency Services
SF	Standard Form
SLA	Service Level Agreement
SSO	Source Selection Official
Sr	Strontium
TFMSS	Tank Farms Material Service System
TGA	Thermal Gravimetric Analyzers
T&M	Time-and-Materials
TOC	Tank Operations Contractor
TPA	Third Party Administrator or Tri-Party Agreement
TRAINTRAX-222-S	Training Tracking System
TSR	Technical Safety Requirements

U.S.C	United States Code
VIPERS	Vendor Inquiry Payment Electronic Reporting System
WRPS	Washington River Protection Solutions
WASP	Workplace Substance Abuse Programs
WSCF	Waste Sampling and Characterization Facility
WSHP	Worker Safety and Health Plan
WTP	Waste Treatment Plant
90DAAs	90-Day Accumulation Areas

ATTACHMENT J.12 STAFFING PLAN

ATTACHMENT J.13 - HANFORD SITE DATA SYSTEMS

- Automated Bar Coding of All Samples at Hanford (ABCASH) system: Site wide application used to track sample data for air filters, soil samples and vegetation samples.
- Laboratory Training System 2 (LTS2): A training record database management tool for laboratory managers.
- Tank Farms Material Service System (TFMSS): Provides automated collection, statusing and reporting of materials utilized for projects by the TOC on the Hanford Site.
- Procedure Status Tracking (PROTRAX-ATL): Tracks the status of procedures, operator aids and standing orders for the 222-S Laboratory analytical services provider.
- Training Tracking System (TRAINTRAX-222-S): A training tracking system used by the 222-S Laboratory to interface with the ITEM database and track qualification cards.
- Overtime Management System (BMS-OTM): A business management system which tracks overtime hours for the Contractor's bargaining union personnel.
- Hanford Environmental Information System (HEIS): A site wide repository of environmental data and information collected during environmental monitoring.
- Chemical Inventory Tracking System (CITS): Site wide database that keeps track of all hazardous chemicals, their locations and quantities.
- OmniLIMS™: A laboratory information management system that accumulates analytical data directly from instruments and from manual input. It also includes tools for data reduction, conversion to proper electronic formats and report generation.
- OPEXShare (OPERating EXperience Sharing): This Web site contains Hanford related operating experience articles including Lessons Learned, Safety Bulletins, Recalls, and other types of information that can be used for preventing recurrence of events, and sharing of good work practices.
- Hanford Information Systems Inventory (HISI): Site wide database tracking controlled software that is safety significant.
- Integrated Document Management System (IDMS): Hanford Site approved electronic records management tool.
- Integrated Training Electronic Matrix (ITEM): Site-wide system used to track training.

- Material Safety Data Sheets (MSDS) System: Site wide database used for retrieving Material safety data sheets for chemicals used by Hanford contracts.
- System Change Request (SCR): The SCR system maintains and stores work records for system development efforts.
- Sunflower Asset Management System (SAMS) Property Management Database.
- Computerized Accident/Incident Reporting System (CAIRS): a database for recording incidents involving injuries or requiring first aid.
