### ATTACHMENT J-3.a Matrix

#### HANFORD SITE SERVICES AND INTERFACE REQUIREMENTS MATRIX

Services listed in the *Hanford Site Services and Interface Requirements Matrix* (Matrix) shall be performed in accordance with the Section H Clause entitled, *Hanford Site Services and Interface Requirements Matrix*.

All services are provided during the Hanford alternate work schedule (AWS) defined as 7:00 a.m. to 4:30 p.m. Monday through Thursday and 7:00 a.m. to 3:30 p.m. on standard Site Fridays unless otherwise noted. An additional AWS is defined as 6:00 a.m. to 4:30 p.m. Monday through Thursday (4x10 schedule) to align with the other Hanford Site contractors work schedule. Hanford Site contractors can request work outside of this schedule by providing a statement of work and requesting that scope as a usage-based service.

Legend for Matrix – The legend for the primary matrix users/providers is as follows:

HMESC	Hanford Mission Essential Services Contract
CPCC	Central Plateau Cleanup Contract
TOC	Tank Operations Contract
WTP	Waste Treatment and Immobilization Plant Contract

<b>Other Site Users</b> Examples include: Occupational Health Services Contractor (OHSC), Laboratory Analysis and Testing Services Contractor (LA&TS), Energy Savings Performance Contractor (ESPC), Pacific Northwest National Laboratory (PNNL) [activities located on the Hanford Site], Laundry Services Contractor, DOE, etc.
--

<b>Hanford Site Contractors</b> General term used to collectively refer to all the above users/providers.
---

Types of Interfaces –

1. Information: knowledge (data, facts, etc) gathered or supplied
2. Physical: systems in tangible contact (i.e., ‘pipe-to-pipe’), or a physical exchange of product or materials
3. Service: provision of work for another contractor

**Scope/Cost Allocation**

**Service Description**

Physical Security under this activity is for accountable quantities of nuclear and classified materials, including performance testing, intrusion detection, entry/access control, explosive detection, locksmith services, and engineering and maintenance of the physical security and access control systems.

- HMESC shall provide Security Representatives for facilities or groups of facilities where there are important safeguards and security (SAS) assets.
- HMESC shall develop, or assist in the development of facility asset protection requirements and conduct annual reviews of Asset Protection Agreements.
- HMESC shall design security system upgrades for existing facilities with changing requirements and design security systems for new facilities.
- HMESC shall provide locksmith support for installation, replacement, and maintenance of locks, keys, and access control systems for the protections of Government property and nuclear materials, including special nuclear materials, classified matter, new facilities and WTP turnover facilities to TOC, etc.
- Hanford Site contractors shall provide the HMESC information about SAS arrangements and/or changes prior to new operations commencing, or changing operations or configurations that might alter the performance of existing SAS systems; support the HMESC in the development of or update of facility *Asset Protection Agreements*, and requesting locksmith services.

**Usage-Based Services**

N/A

**Direct-Funded Services**

Funded through the HMESC; provided at no cost to Hanford Site contractors with the exception of physical security upgrades within the facility - these may be shared costs between the HMESC and the Hanford Site contractor that has responsibility for the facility.

**Scope/Cost Allocation**

**Service Description**

Site Safety Standards are to be used by Hanford Site contractors to ensure common processes for worker safety.

- HMESC shall obtain affected Hanford Site contractor approval and establish common safety processes on the Hanford Site as listed below.
- HMESC shall maintain a site-wide web-based system with input from other Hanford contractors for sharing operating experiences and lessons learned with a focus on preventing recurrence of safety or reliability events, and to share good work practices in accordance with DOE O 210.2.
- HMESC, CPCC, and TOC shall work collaboratively and build coalitions with Hanford Site contractors and workers to continue to build a strong and enduring safety culture. Based on input from Hanford Site contractors and workers, the HMESC with the CPCC and TOC shall identify DOE opportunities to enhance and measure the Hanford safety culture.
- HMESC shall manage and administer Hanford Site safety activities/initiatives, such as, Annual Safety Exposition, Hanford Worker Electrical Safety Board, etc., as approved by DOE.
- Affected Hanford Site contractors shall approve common safety standards and develop internal implementing procedures, and participate in Hanford Site safety activities/initiatives, where appropriate, as administered by HMESC.

**Common Safety Processes.**

1. Lockout/tagout of hazardous energy
2. Permit required confined space entry.
3. Chronic Beryllium Disease Prevention Program (CBDPP).
4. Respiratory protection program.
5. Hoisting and rigging
6. Fall protection.

7. Electrical safety.
8. Industrial hygiene exposure records including the generation, common database, and storage.
9. Employee job task analysis (EJTA) as being implemented on the Hanford site at the present time.
10. Excavation permits with emphasis on the existing Hanford site system for obtaining excavation permits.
11. Hazardous Chemical Reporting: Community Right-to-Know with the HMESC responsible for obtaining data from other Hanford site contractors, compiling and submitting the required data.

32	<b>Radiological Site Services (RSS)</b>	Information / Service	Usage-Based	Mandatory	<b>Provide service</b> to site contractors	Receive service from HMESC			

**Scope/Cost Allocation**

Service Description

Radiological Site Services (RSS) is a documented set of comprehensive and integrated radiological support programs which provide the technical support, dosimetry, data, and records necessary to demonstrate compliance with required radiological monitoring and to verify the adequacy of Site radiological control programs in protecting the health and safety of workers, the public, and the environment. The RSS includes the Hanford External Dosimetry Program (HEDP), the Hanford Internal Dosimetry Program (HIDP), the Hanford Radiological Instrumentation Program (HRIP), and the Hanford Radiological Records Program (HRRP).

HMESC shall provide:

- DOELAP accredited external dosimetry services, including technical support, documentation, and dosimeter preparation and processing, based on the types and quantities of external dosimetry required by all key customers.
- DOELAP accredited internal dosimetry services, including technical support, documentation, and analyses, based on the types and quantities of internal dosimetry required by all key customers
- Calibration, maintenance, and repair services as defined in ANSI 323-1978 for a broad range of portable and semi-portable radiological instrumentation, including technical support and documentation, based on the types and quantities of portable and semi-portable radiological instrumentation calibration, maintenance, and repair services required by all key customers.
- Services to maintain, manage, and procure parts or replacements for the existing Hanford Site pool of radiological instruments, including developing processes for necessary replacement, as required by all key customers.
- Performance testing as defined in ANSI 323A-1997, or other standards as requested, to verify instruments continue to meet operational requirements.
- Management and preservation of current and former radiation monitoring records for DOE (and predecessor agencies) employees, Hanford contractors, sub-contractors, and visitors, including records of existing and past Hanford Site radiation dosimetry policies and practices.

On an as-requested basis, HMESC will provide dosimetry and bio-assay scheduling, dosimeter distribution, and other services commonly associated with "Dosimetry Operations." These services will be fully defined in the SOW and agreed upon by the requesting party and HMESC.

Hanford Site contractors shall request, and provide requirements for, service.

**Usage-Based Services**

Service as described above.

Motor Carrier Services provides a centralized pool of vehicles and drivers for the on-site or local transportation of freight including hazardous material at the Hanford Site, including radioactive materials and radioactive/mixed waste.

- HMESC shall:
- Manage, schedule, and conduct motor carrier services.
- Maintain and operate a centralized pool of vehicles and drivers for the on-site and limited local transportation of freight including hazardous and radioactive materials at the Hanford Site.
- Act as the Hanford Site motor carrier similar to a commercial motor carrier.
- Provide compressed gas shipments.
- Pick up at local vendors as directed by their customers.
- The Hanford Site contractor will prepare freight for shipment (packaging the freight) and provided associated documentation or direct a pick up of freight from a particular Site contractor or vendor.
- The preferred method for shipment of freight to other DOE site or to commercial vendor(s) is using a commercial motor carrier.
- Upon mutual agreement, the Contractor may provide a limited number of specialized vehicles to Other Hanford Site Contractors to support the efficient management of resources. Any vehicles provided by the HMESC will remain in the HMESC Fleet Maintenance Programs.
- Hanford Site contractors who are customers of this service prepare the waste for transport including shipper/receiver agreement documents, transportation documents for packaging, transportation and receipt by the receiving facility.

- Services are excluded from ERDF operations and 618-10 site remediation activities.

**Usage-Based Services**

Service as described above.

**Scope/Cost Allocation**

**Service Description**

Roads and Grounds consist of road maintenance, 24/7 snow removal, traffic management, and common grounds maintenance service for the Hanford Site.

**Usage-Based Services**

- Hanford Site contractors may request additional services for facility specific services, such as, snow removal on sidewalks.

**Direct-Funded Services**

- HMESC shall maintain primary and secondary Hanford Site roadways, to include patching/paving, striping, and other services; perform maintenance of common grounds; and make recommendations to restrict access and make the appropriate notifications of restricted access or closure to DOE and other Hanford Site contractors in the event that roads are unsafe for travel. HMESC shall remove snow at primary and secondary roads and at designated facilities, parking lots, and walkways (per the Hanford Snow Removal Plan).
- Maintain the common grounds to ensure public/worker safety and environmental integrity within the 200, 300, and 600 Areas. Activities in this area include perimeter fence/sign maintenance at the Site boundaries; lawn and landscape care; annual inspection and maintenance of gravel pits; general area cleanup; sweeping sidewalks; washing buildings; sweeping general purpose facility parking lots and repairing bumper blocks.

<b>Scope/Cost Allocation</b>									
<p><u>Service Description</u></p> <p>The Water System function is a water utility service (the geographic areas to be served are the 100B/C, 200, 300, and 600 Areas).</p> <ul style="list-style-type: none"> <li>• HMESC shall manage the water system in accordance with agreements negotiated with the Hanford Site contractor being served and in accordance with guidance documents cited in state regulations for water systems; and maintain the existing <i>Water System Master Plan</i>. The Plan shall document a strategy for managing repairs, life extensions, replacements, and deactivations for facilities and equipment for the water systems within the scope of this contract over a ten year planning horizon.</li> <li>• HMESC shall provide a “purveyor” (per the Washington Administrative Code and other state regulations) for HMESC-managed water systems.</li> <li>• HMESC shall be responsible for all aspects of the water distribution system only up to and including the first off-valve or demarcation point outside the customer’s facility or complex of facilities. The customer or facility maintains all responsibility for lines downstream of this agreed-upon point. On side-by-side multiple valve isolations and backflow assemblies, the facility assumes responsibility from the discharge side of the downstream isolation valve. For WTP, the demarcation point is the premise isolation backflow prevention at the fence line. For PFP, the demarcation point is the premise isolation backflow assemblies.</li> <li>• HMESC shall perform, as requested, backflow preventer testing, water system contaminant monitoring management, and pipeline sanitization for other Hanford Site contractors (e.g., water systems outside of HMESC):</li> <li>• Hanford Site contractors shall input to the <i>Water System Master Plan</i> and negotiate agreements for water utility service.</li> </ul>									

- CPCC shall identify priority water line upgrades which would prevent further ground water degradation; HMESC shall perform priority water line upgrades to prevent further ground water degradation.

Note:

- The 100K Area and 400 Area Water Systems will be operated and maintained by the CPCC.
- The 300 Area Water System will be operated and maintained by PNNL, by agreement between DOE-RL and Pacific Northwest Site Office (PNSO).

**Usage-Based Services**

Direct, mission-related upgrade projects are paid for by the Site contractor requiring the upgrade. For water systems outside of the HMESC, water system contaminant monitoring management is a usage-based service reimbursed by the user. Water permits for Hanford Site contractors' new facilities is a usage-based service.

**Direct-Funded Services**

Hanford Site-wide water upgrades and Basic Service are funded through HMESC; provided at no cost to site contractors.

43	Sewer Systems	Physical Service	Combination of Usage-Based and Direct-Funded	Mandatory	Provide service to site contractors	Receive service from and provide input to HMESC	Receive service from and provide input to HMESC	Optional	Receive service from and provide input to HMESC

**Scope/Cost Allocation**

**Service Description**

- Sewer system operations provide sewer pumper truck services and collection of sewage through piping for treatment and disposal in subsurface soil absorption systems, as the 200W Lagoon. The geographic areas to be served are the 100B/C, 200, 300, and 600 Areas. HMESC shall operate the Hanford Site sanitary sewer systems, including compliance sampling; maintenance of support structures, systems, and components; and performance of sewer administration duties in accordance with the State of Washington sanitary sewer regulations.
- HMESC shall update the existing *Sewer System Master Plan*. The Plan shall document a strategy for managing repairs, life extensions, replacements, and deactivations for facilities and equipment for the sewer systems within the scope of this contract over a ten year planning horizon and shall be updated every two (2) years.
- Hanford Site contractors shall provide input to the *Sewer System Master Plan*.
- Legacy facilities that are returned to service will be treated as a base, unless special circumstances require facility upgrades.

**Notes:**

- The 100K Area, 200 Area ERDF, and 400 Area sanitary sewer systems will be operated and maintained by the CPCC.
- The 300 Area sanitary sewer system will be operated and maintained by PNNL, by agreement between DOE-RL and PNSO.

**Usage-Based Services**

Direct, mission-related upgrade projects are paid for by the Hanford Site contractor requiring the upgrade. Hanford Site contractors are responsible for facility-specific upgrades or new facilities sewer tie-ins under their control. Sewer permits for Hanford Site contractor new construction or project upgrades are a usage-based service.

**Direct-Funded Services**

Hanford Site-wide sewer upgrades and basic service are funded through HMESC; provided at no cost to Hanford Site contractors.

**Scope/Cost Allocation**

**Service Description**

Long-term stewardship (LTS) includes all engineered and non-engineered institutional controls designed to contain or to prevent exposures to any potential residual contamination and waste, such as surveillance activities, record-keeping activities, inspections, groundwater monitoring, ongoing pump and treat activities, cap repair, maintenance of entombed buildings or facilities, maintenance of other barriers and containment structures, access control, and posting signs.

- Other prime contractors' role is to provide input to the HMESC by preparing an LTS Transition and Turnover Package (TTP) in accordance with the approved TTP template.
- HMESC shall provide for integrated planning of LTS for the entirety of the Hanford Site.
- HMESC shall prepare and maintain the *Hanford Long-Term Stewardship Program Plan and Long-Term Surveillance and Maintenance Plans*.
- HMESC shall coordinate with DOE-RL and Hanford Site contractors to compile the results of the annual Hanford Site-wide institutional controls assessment, and to conduct the Hanford Site-wide *Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) 5-year reviews* including comment response, interim documentation, and lessons learned.
- HMESC shall execute LTS for those portions of the Site assigned to the HMESC.
- Hanford Site contractors provide information for the *Hanford Long-Term Stewardship Program Plan, Long-Term Stewardship Surveillance and Maintenance Plans, Annual NEPA Mitigation Action Plan Accomplishments, IC Plan, CERCLA 5-year reviews, Site Transition Plans, and annual site-wide institutional controls assessment*.
- Hanford Site contractors will coordinate with the Hanford LTS Program Plan and provide input to the LTS Transition and Turnover Packages for a given parcel or segment of land to DOE and concurrently to the HMESC.

- Hanford Site contractors shall coordinate with the HMESC in development of CERCLA RODs including institutional controls to achieve consistency with the LTS Plan.
- Hanford Site contractors shall provide information for the Hanford Site Institutional Controls Plan (ICP) in accordance with Hanford Site CERCLA Records of Decision, Hanford Site RCRA post closure plans, and RCRA Permit Corrective Action Modifications.

**Usage-Based Services**

**Scope/Cost Allocation**

**Service Description**

Multi-media Services provides for the development, production, or acquisition of photos, videotapes, movies, audio productions, and other similar types of media.

- HMESC multi-media organization shall be a centralized resource for the Hanford Site. The contractor shall establish the standards and written procedures that shall be used by all Hanford Site contractors and DOE to inventory photographs, videos, etc, identified as records. The standards/procedures shall direct that all photos, videos, etc. taken or acquired are indexed, and that the images/photos are merged into a Hanford Site archive or clearinghouse.
- HMESC shall conduct aerial photography of the Hanford Site (e.g., monthly), as directed by DOE.
- Whether using HMESC, or procuring outside services, Hanford Site contractors shall:
- Comply with Hanford Site multi-media standards
- Provide multi-media records to the HMESC.

Receives waste from site users.</b>	Package and deliver TRU to CPCC	N/A	Except DOE, package and deliver TRU to CPCC.

**Scope/Cost Allocation**

**Service Description**

This activity provides for TRU and TRUM certification and loading waste for shipment to the Waste isolation Pilot Plant (WIPP).

- CPCC shall receive waste from contractors, provides interim storage if required, certifies waste for shipment, prepares payloads, and loads waste for shipment to WIPP or other DOE Sites.
- Hanford Site contractors shall conduct and budget for packaging (if required by WAC) and transporting waste to CPCC, and certify for WIPP and load waste for shipment to WIPP or other DOE Sites.
- CCP will provide, operate, and maintain RTR equipment, drum assay equipment, large box NDE/NDA equipment (if needed), and mobile loading equipment.
- CCP will operate and maintain the Hanford Super-HENC equipment for Standard Waste Box (SWB) assay.
- CCP will operate the Shipping and Receiving Bay within WRAP for TRUPACT loading. CPCC will operate and maintain the balance of the WRAP facility.
- CCP will provide the equipment for and perform head space gas sampling (HSGS) and analysis.

- CCP will establish and implement appropriate ESH&Q programs to support CCP activities.
- CPCC will perform initial (in-field) assay of retrieved waste, as necessary, to segregate TRU from non-TRU waste.
- CPCC will perform all waste repackaging activities.
- CPCC will provide facility records, packaging records, and other documents necessary for CCP to prepare waste certification packages.
- CPCC will provide the necessary public release clearances for CCP generated documents.
- CPCC will provide the infrastructure to support installation and operation of the CCP-provided RTR equipment, drum assay equipment, and mobile loading equipment.
- CPCC will provide the facility and infrastructure to support the installation and operation of the large box NDE/NDA equipment, if needed.
- CPCC will provide mobile crane and crane operator support for CCP mobile loading equipment.
- CPCC shall receive TRU waste from other site users and provide interim storage if required.
- CPCC will identify ESH&Q interfaces with CCP.
- Other Hanford Generators of TRU waste will provide TRU waste to CPCC that complies with WIPP waste acceptance criteria.

**Usage-Based Services**

Waste generators provide funding to CPCC for the increment of work resulting from their waste.

**Direct-Funded Services**

CPCC provides ready-to-serve capability for TRU waste receipt, storage, and repackaging.

**Scope/Cost Allocation**

**Service Description**

This activity provides for maintenance, configuration control, and upgrading of key Hanford Site environmental assessment databases.

- The CPCC shall serve as Data Manager for the following information systems:
  - Hanford Environmental Information System (HEIS);
  - Sample Data Tracking (SDT) System;
  - Hanford Well Information System (HWIS);
  - Waste Information Data System (WIDS).
- The Hanford Site contractors shall provide data and support to the CPCC, for the Hanford Sites contractor’s facilities and activities, to support maintenance of the above listed Hanford-wide environmental databases. Hanford Site contractors supplying information/ data are responsible for data quality.

**Usage-Based Services**

N/A

**Direct-Funded Services**

CPCC bears the cost burden of program administration. Hanford Site contractors bear internal implementation costs.

**Scope/Cost Allocation**

**Service Description**

*Tank Closure and Waste Management EIS and ROD* is a regulatory requirement supporting Hanford Site closure activities. DOE is currently preparing the Tank Closure and Waste Management (TC & WM) Environmental Impact Statement (EIS). The TC & WM EIS is evaluating options for managing and disposing of waste, supplemental treatment, tank closure and establishing final end states for the Fast Flux Test Facility (FFTF) at Hanford. These decisions are expected to be applied to the related programs after 2009.

- DOE-ORP will develop the *Tank Closure and Waste Management EIS and ROD*.
- Hanford Site contractors shall provide input to the *Tank Closure and Waste Management EIS and ROD*.

**Scope/Cost Allocation**

**Service Description**

CPC shall assume ownership of the Hanford Sitewide Transportation Safety Document (TSD), effective with DOE-RL approval of DOE/RL-2001-36, Hanford Sitewide Transportation Safety Document, Revision 2, and is to perform maintenance of the TSD through the duration of the CPC period of performance.

- CPC shall act in the role of the TSD Configuration Manager (i.e., TSD Section 4.4). The responsibilities of the TSD Configuration Manager include:
  - Ensure notifications of potential inadequacies in the safety analyses are appropriately distributed to the contractor Transportation & Packaging (T&P) points-of-contact.
  - Ensure new Packaging Safety Documents and tiedowns are distributed to the contractor T&P points-of-contact.
  - Ensure unreviewed safety question for transportation determinations (USQTDs) are appropriately distributed to the contractor T&P point-of-contact. Maintain configuration control of the TSD.
  - Prepare, submit to DOE-RL for approval, and implement the TSD annual update.
  - Maintain the safety basis current as required by DOE O 460.1D (or current version shown in Attachment J.2) and 10 CFR 830.
  - Organize and conduct contractor interface meetings.
- CPC shall also control and maintain the TSD Configuration Manager website to include all authorized Packaging Safety Documents, Special Packaging Authorization Shipment Evaluation Checklist, and tiedown/internal load securement plans.
- Affected Hanford Site contractors shall participate in the TSD annual update and perform to the responsibilities set forth in TSD Section 4.3.
- DOE will evaluate contractor/user input on the TSD annual update prior to approval. The TSD annual update will be approved by DOE.

**Usage-Based Services**
