Ms. Susan Leckband, Chair
Hanford Advisory Board
ProSidian Hanford Project Office
713 Jadwin Ave., Suite 4
Richland, Washington 99352

Dear Ms. Leckband:

**HANFORD ADVISORY BOARD (HAB) ADVICE #296, 100-B/C REMEDIAL
INVESTIGATION/FEASIBILITY STUDY DRAFT REPORT**

The U.S. Department of Energy and U.S. Environmental Protection Agency would like to thank the HAB for providing consensus advice #296 on the Draft Remedial Investigation/Feasibility Study for the 100-B/C Area.

These documents are currently being revised based on discussions between the agencies, and with the Washington State Department of Ecology. The current HAB advice is being considered throughout these discussions.

When the finalized Proposed Plan is issued for public comment, the HAB will have the opportunity to review and issue advice on the document during the public comment period. Your advice, along with public comments received on the Proposed Plan, will be considered before the Record of Decision (ROD) is issued. The ROD will contain a responsiveness summary that addresses substantive comments received during the public comment period.

Thank you again for your advice on this subject. If you have any questions, you may contact Kristen Holmes at (509) 376-5803.

Doug S. Shoop, Manager
U.S. Department of Energy
Richland Operations Office

David Einan, Unit Manager
U. S. Environmental Protection Agency
