

APPROVED BALLOTS

DOE/RL-92-36, *Hanford Site Hoisting and Rigging Manual, Rev. 2*

Release No.	Ballot Number/ Chapters Affected	Impact Statement	Approval Date	Implementation Date
0	250 Reorganizing HSHRM All Chapters	This ballot is to approve reorganizing the entire Hanford Site Hoisting & Rigging Manual to align chapter numbers with the ASME B30 series of standards for ease of use. To accomplish this, the Manual will be organized in the following multi-part, modular order: Administrative Requirements, ASME B30 Requirements, and Other Requirements. If the Hanford Site has adopted a standard but a Hanford-specific chapter is not required, the chapter is listed as “Reserved.” Other changes included editorial corrections and updates to callouts. Each committee member shall evaluate impacts to their programs. When the ballot is approved, the changes will become effective at the time of electronic publication.	07/24/24	09/09/24
