---	-----------------------	-------------	---

This list of acronyms is intended as a reference for the reader to provide definitions that are not readily available away from the Hanford Site.

TERMS

AMB	Assistant Manager for Business and Financial Operations
AMMS	Assistant Manager for Mission Support
AMRP	Assistant Manager for River and Plateau
AMSE	Assistant Manager for Safety and Environment
BCR	Baseline Change Request
BO	Business Operations
CHPRC	CH2MHILL Plateau Remediation Company
CTD	Cost-to-Date
CV	Cost Variance
DART	Days Away Restricted Transferred
DLA	Direct Labor Adder
DOE	U.S. Department of Energy
ECOLOGY	State of Washington, Department of Ecology
EM	Office of Environmental Management
ES	Emergency Services
ESH&T	Environment, Safety, Health and Training
FY	Fiscal Year
FYTD	Fiscal Year to Date
HAMMER	Volpentest Hazardous Materials Management and
	Emergency Response Training and Education Center
HCAB	Hanford Contract Alignment Board
HLAN	Hanford Local Area Network
HQ	Headquarters
HRIP	Hanford Radiological Instrumentation Program
IH	Industrial Hygiene
IM	Information Management
IPL	Integrated Priority List
ISAP	Infrastructure and Services Alignment Plan
ISMS	Integrated Safety Management System
LMSI	Lockheed Martin Services, Inc.
MSA	Mission Support Alliance, LLC
MSC	Mission Support Contract
NEPA	National Environmental Policy Act

ACRONYMS LISTING

OCCB	Operational Change Control Reard
	Operational Change Control Board
ORP	Office of River Protection
PFM	Portfolio Management
PFP	Plutonium Finishing Plant
PMB	Performance Measurement Baseline
PMTO	Portfolio Management Task Order
PNNL	Pacific Northwest National Laboratory
PO	Presidents Office
POSP	Parent Organization Support Plan
PPE	Personal Protection Equipment
PTA	Patrol Training Academy
PW	Public Works
RHP	Risk Handling Plan
RL	Richland Operations Office
SAS	Safeguards & Security
SS&IM	Site Services and Interface Management
SV	Scheduled Variance
TRC	Total Recordable Case
UBS	Usage-Based Services
VoIP	Voice over Internet Protocol
VPP	Voluntary Protection Program
WBS	Work Breakdown Structure

1.0 INTRODUCTION

The Executive Overview section is intended to provide an executive-level performance overview. Included herein are descriptions of the Mission Support Alliance, LLC (MSA) significant accomplishments considered to have made the greatest contribution toward safe, environmentally sound, and cost-effective, mission-oriented services; progress against the contract with U.S. Department of Energy (DOE) Richland Operations Office (RL); project cost summary analysis; and overviews of safety. Unless otherwise noted, all data provided is through May 2015.

1.1 KEY ACCOMPLISHMENTS

MSA Replaces Heating, Ventilation and Air Conditioning (HVAC) – MSA is upgrading the HVAC system at building 2704HV for Washington River Protection Solutions (WRPS). The project consists of procuring and installing four 60-ton rooftop HVAC units, modifying 150 fan-powered terminals and installing a computer control center. The upgrade will replace four older 70-ton units.

Lifting Old Unit Off of 2704HV Roof

New Unit (Left) Installed On Roof at 2704HV

MSA Supports Tri-Parties Public Meeting – MSA supported RL, the DOE Office of River Protection (ORP), U.S. Environmental Protection Agency (EPA), and the Washington State Department of Ecology (Ecology) in coordinating a public meeting to discuss the fiscal years (FY) 2016 and 2017 Hanford budget and cleanup priorities. The meeting was held in conjunction with a 30-day public comment period.

Health & Safety Exposition (EXPO) – MSA served as the executive sponsor for the 21st Health & Safety EXPO that was held on May 12-13, 2015, at the Trade, Recreation and Agricultural Center (TRAC) Facility in Pasco, WA. Over 170 exhibitors were present to promote safety among Hanford workers and members of the community. The event

was organized by DOE, various Hanford Contractors, Hanford unions, and the Pacific Northwest National Laboratory (PNNL).

Inspection Support Provided – MSA supported the CH2M HILL Plateau Remediation Company (CHPRC), PNNL, and WRPS in Ecology inspections to determine dangerous waste regulation compliance. Inspection support included serving as the initial point of contact for regulatory agency notification, preparing and issuing the Site wide inspection announcement, and entering inspection results into the Regulatory Agency Inspection Database (RAID).

Water & Sewer Utilities (W&SU) Updates pH Probes -

MSA W&SU personnel removed, cleaned, and recalibrated a pH probe for the 3906C sewer system. The probe had been causing repeated alarms to be sent to the W&SU. Once the calibration was completed, they returned the system to service. W&SU also replaced the 283W eight inch pH analyzer. Completing the work package associated with this job was one of their top priorities.

Recalibrating pH probes for the 3906C sewer system

MSA Releases GeoVis Update Ahead of Schedule – MSA

released an update to the Geographic Visualization (GeoVis) application into production several weeks ahead of schedule. GeoVis is a web-based tool that displays site cleanup objects and remediation progress. This completes the RL-requested work plan deliverable of integrating subsequent units for individual development into GeoVis.

MSA Upgrades Services for WRPS Office – MSA supported WRPS with making the new mobile office (MO439) change trailer at the AY tank farm operational. The MSA's electrical utilities team upgraded the existing 25-kilovolt-ampere (kVA) transformer to a 50-kVA transformer and calibrated and installed a new solid-state kilowatt hour power meter.

MSA Samples Air at 200 East for Asbestos – MSA

performed asbestos air sampling in the 200 East Area

to help resolve WRPS employees' asbestos concerns in areas where their Radiological Control group performs routine transfer line radiological monitoring. Results have been communicated to MSA management and WRPS and Hanford Atomic Metals Trade Council safety representatives.

Upgrading a transformer for WRPS

Electrical Utilities (EU) Cleans Up More Waste Preparing for Shipment – Aligning with EU's goal of reducing backlog waste streams, containers for both Basin Disposal, Inc. (BDI), and the Environmental Restoration Disposal Facility (ERDF) were filled with EU's 253E Laydown Yard waste. Included was utility pole hardware, such as porcelain insulators, lead tipped pins, wire, glass, treated wood, wire, and general debris. In additional, to improve organization at the 253E Laydown Yard, areas were graveled and graded, storage boxes staged, and equipment and parts sorted.

Acting Assistant Secretary Tours HAMMER – In May, the Acting Assistant Secretary for the DOE Office of Environmental Management (EM), toured the Volpentest HAMMER Federal Training Center (HAMMER). Subject matter experts and worker-trainers spoke about Site standards as well as the Respiratory, Hazardous Waste Operations and Emergency Response, Radiological Safety and Lockout/Tagout training programs. Staff members showcased the work HAMMER is doing with the National Training Center reciprocity program.

Acting Assistant Secretary Tours HAMMER

Quarterly Environmental Radiological Survey Summary Issued – MSA completed and issued the contract deliverable *Environmental Radiological Survey Summary Calendar Year 2015 (First Quarter Hanford Site 100, 200, 300, and 600 Areas).* This quarterly report captures the number of scheduled radiological surveys performed by each contractor, along with contamination events and trending of vegetation and animal contamination events for the quarter.

MSA Supports Nuclear Weapons Exercise – MSA deployed a team to Silverdale, Washington, to support the Nuclear Weapons Accident Incident Exercise 2015. The Radiological Assistance Program (RAP) Region 8 team was recognized as an important contributor to the exercise's success. In addition to the deployed team, RAP Region 8 initiated a "home team" in Richland, Washington, to support the field operations. This first use of a "home team" proved helpful by improving communication coordination and information flow.

MSA Updates Integrated Technical Data-mart (ITD) Tools – MSA released the Assistant Manager for River and Plateau (AMRP) Monthly Project Status Report to production. The new ITD tool compiles a report based on user-entered data and current screen shots of project dashboards. The tool generates a single-document report and can be customized quickly to adapt to changing customer needs.

MSA also released Issue Tracker projects for an Image Report, Safety Report and Safety Report Administration into production. This work, which supports DOE and the ORP Assistant Manager for Technical and Regulatory Support (TRS) allows users to input safety data for the upcoming TRS dashboard.

MSA Installs Bird Screens at 182-D – MSA is preparing the 182-D raw water reservoir for full operation to meet expected increases in water demand, especially for the Waste Treatment Plant, tank farms, and 242-A Evaporator. As part of this effort, new bird screen panels were constructed and installed in the facility. The existing bird screens had deteriorated in the elements, enabling rock doves (pigeons), starlings and swallows to access the facility. The birds were nesting and roosting inside. Bringing 182-D back into operation will allow as needed maintenance to be performed on the 182-B reservoir, and will improve readiness and reliability of the Site's water supply.

New bird screens at 182-D

Hanford Site Public Tours Update – MSA conducted public tours 5 through 12 (of 40 planned for the year). To date, 700 visitors have participated in the 2015 Hanford Site Public tours, which is a 76% participation rate.

Tenth Annual Fire Ops 101 Successful – The *Fire Ops 101* course, taken by 27 participants and their firefighter shadows, was completed successfully in May. This was the tenth year *Fire Ops 101* has been held at the HAMMER.

Switching Station Maintenance Complete – MSA Electrical Utilities (EU) completed preventive and corrective maintenance at the 230kV Ashe Tap Switching Station located at the east end of Gable Mountain. EU cleaned, tested and replaced handcrank mechanisms, line switches and vacuum interrupters. This effort was completed quickly to minimize impacts to Energy Northwest during their refueling outage.

EU Crew Performing Maintenance at 230kV Ashe Tap Switching Station

Hanford Comprehensive Land Use Plan Supplement Analysis (SA) – MSA Real Estate Services (RES) has been working with RL to disposition DOE Headquarters (HQ) comments and finalize the SA document. The RL Site Manager approved the document on May 7, 2015, and the document will be readied for public release and final closeout. This completes a one-and-a-half year effort by MSA to prepare the draft and assist RL with finalizing the document. The next National Environmental Policy Administration (NEPA) five-year review will take place in 2020.

2.0 ANALYSIS OF FUNDS

Table 2-1. Mission Support Alliance, LLC Funds Management (dollars in thousands).

Funds Source PBS	Title	DOE Expected Funds	** Funds Received	FYTD Actuals	Remaining Available Funds from Funds Received
1000PD	Richland Program Direction	\$117.3	\$122.9	\$73.4	\$49.5
1000PD (HQ)	DOE-HQ Funding	\$105.5	\$106.2	\$80.9	\$25.3
ORP-0014	Radiological Liquid Tank Waste Stabilization and Disposition Operations	\$14,918.0	\$14,917.7	\$3,095.4	\$11,822.3
RL-0020	Safeguards & Security	\$69,208.8	\$68,651.7	\$41,366.6	\$27,285.1
RL-0030	Soil & Water Remediation – Groundwater Hanford		\$21.6	\$(0.8)	\$22.4
RL-0040	Reliability Projects/ HAMMER/ Inventory	\$15,714.5	\$16,319.4	\$4,217.2	\$12,102.2
RL-0041	B Reactor	\$6,906.9	\$6,961.0	\$1,377.9	\$5,583.1
SWS	Site-Wide Services	\$186,535.1	\$153,042.4	\$110,003.7	\$43,038.7
Total		\$293,506.1	\$260,142.9	\$160,214.3	\$99,928.6
HAMMER = Volper	ntest HAMMER Training and EAC =	Portfolio Managen Estimate at Compl Project Baseline Sui	etion.	SWS PD	= Site-Wide Services. = Project Development.

DOE Expected Funds includes a funding increase of \$4,582K, per RL Letter 15-AMMS-0023, including: SWS \$877K, ORP14 (\$253K), RL20 (\$1,614K), RL30 (\$19K), RL40 \$5,607K, and RL41 (\$16K).

**Funds received through Contract Mod 462 dated June 3, 2015.

SWS Burn Rate – through August 20, 2015

RL20 Burn Rate – through October 26, 2015.

Total burn rate for remaining available funds would fund through October 15, 2015.

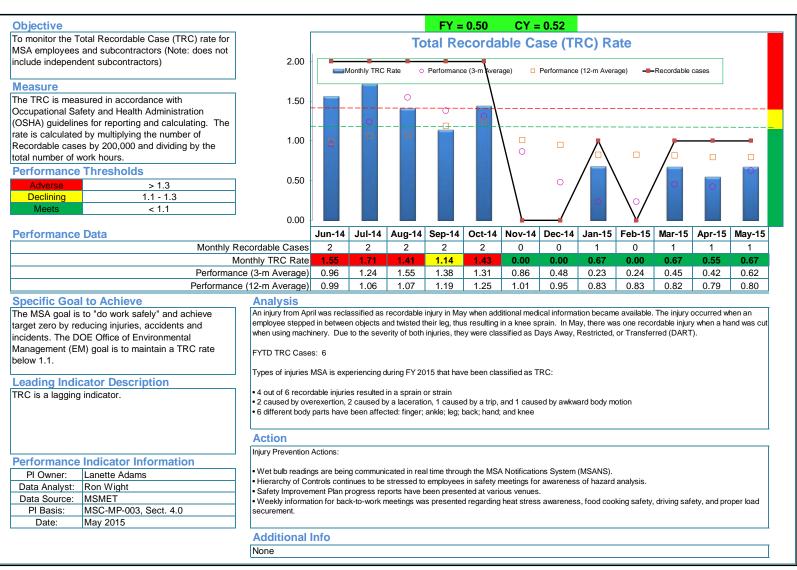

3.0 SAFETY PERFORMANCE

During the month of May, MSA had one "recordable" injury when an employee cut their hand when operating machinery. However, a first aid injury that occurred in April was reclassified to a recordable in May when additional medical information became available. Both injuries met the criteria of a days away, restricted or transferred (DART) classification. Therefore, the fiscal year total recordable case rate (TRC) is 0.50 and the DART rate is 0.42. The TRC and DART rates are below the DOE Office of Environmental Management (EM) goal of 1.1 and 0.60, respectively.

MSA continues to perform injury prevention actions that focus on hazard identification and the highest level of control practical by stressing the use of Hierarchy of Control for awareness of hazard analysis at various safety meetings. As environmental conditions change and the potential for heat related injuries increase, MSA is providing employees with timely communications on wet bulb globe temperature (WBGT) readings through the MSA Notification System (MSANS). MSA encouraged both onsite and offsite safety awareness by providing Weekly Safety Starts for back-to-work discussions on topics such as food cooking safety, heat stress awareness, driving safety, and proper load securement.

Table 3-1. Total Recordable Case Rate.

5. Evaluation

Explanation of Variance / Description of Problem:

Current Month Cost Variance:

During May 2015, a revision to how the budgets for the FY 2014 Labor Adder and Pension modifications (i.e., Contract Modifications 444 and 445) were allocated between the Performance Measurement Baseline (PMB) and non-PMB WBS elements was implemented. The purpose of this revision was to incorporate the necessary adjustments to the non-PMB revenue and liquidation WBS elements. The incorporation of this baseline change is the primary reason for the positive cost variance in the PMB and an offsetting negative cost variance in the non-PMB. Also during May, an approved adjustment to the Forward Pricing Rates for October 2014 through April 2015 was implemented as a passback, which reduced the costs and contributed to the cost variance.

Impacts – Current Month Cost Variance e:

As indicated above, the current month cost variance is primarily due to the re-spreading of the budget for Contract Modifications 444 and 445 between the PMB and the non-PMB and the October 2014 through April 2015 passback. There are no impacts associated with the current month cost variance.

Corrective Action – Current Month Cost Variance: N/A

Table 6-1, con	it. Format 5, DD Form 2	/34/5, Explanations and	l Problem Analysis.

Richland, WA 99352	c. Type d. Share Ratio		c. EVMS Acceptance	b. To (2015/5/24)

Cumulative Cost Variance:

During October of 2011, MSA completed re-aligning the baseline to the negotiated contract, and using the approved change control process, implemented the re-aligned baseline data for the start of FY 2012. RL provided approval of the baseline data for reporting progress, and also provided an approved and funded priority list of items for MSA work scope. The contract-to-date variance is primarily due to the RL approved funding and priority list scope being divergent from the baseline for FY 2013, FY 2014, and FY 2015.

After the original submittal of the FPR, it was determined that the MSA had incorrectly factored the cost of the Hanford Site Pension Plan (HSPP) and the Hanford Employee Welfare Trust (HEWT) into the labor rates. This was disclosed to the MSA in the Source Selection Evaluations Board's (SEB) Debrief of the Mission Support Contract (MSC) in May 2009. MSA received contract modifications associated with pension cost and labor adder adjustments for FY 2009 through FY 2014, which increased the contract value. At the request of RL, the labor and pension proposals are submitted annually at fiscal year-end. The FY 2015 variances associated with labor and pension will continue to grow during the fiscal year.

Impacts - Cumulative Cost Variance:

The contract to date cost variance is primarily due to the approved funding and priority list scope being divergent from the baseline during FY 2013 – FY 2015. Because the work scope is primarily level of effort, the cumulative cost variance is not a predictive indicator for future performance. The amount of support provided in the future will be dependent upon the RL approved funding and priority list scope.

MSC Monthly Performance DOE/RL-2009-113 Rev 68

Report

Table 6-1, cont. Format 5, DD Form 2734/5, Explanations and Problem Analysis.

1. Contractor	2. Contract		3. Program	4. Report Period
a. Name	a. Name		a. Name	a. From (2015/4/27)
b. Location (Address and Zip Code)	b. Number		b. Phase	h To (2015/5/24)
Richland, WA 99352	c. Type d. Share Ratio d		c. EVMS Acceptance	b. To (2015/5/24)

Corrective Action - Cumulative Cost Variance:

For FY 2009 – FY 2012, MSA has incorporated negotiated contract variance proposals into the contract baseline. For FY 2013 through FY 2015, MSA will continue to monitor the delta values between the contract baseline and RL funding values to determine if change proposals are warranted. Until then, the divergent data will continue.

Cumulative Schedule Variance:

Cumulative schedule variance is within threshold.

Impacts - Cumulative Schedule Variance:

None

MSC Monthly Performance DOE/RL-2009-113 Rev 68

Report

Corrective Action - Cumulative Schedule Variance:

Negotiated Contract Changes:

This reporting period the Negotiated Contract Cost increased by \$0.1M from \$3,376.5K to \$3,376.6K for May 2015. This increase is due to implementation of four Baseline Change Requests in May 2015 including: V1000HQ-15-001, "Mod 456, DOE-HQ Human Resource Staffing Process Structured Improvement Activities – Add Scope, Budget and Fee" for \$.021M, V1000PD-15-001 Rev 1, "Mod 457, PMTO 15-002 Development of Dashboard Solutions for ORP Phase 2 – Add Scope, Budget and Fee" for \$.082M, V1000PD-15-003, "Administrative BCR – Mod 459, PMTO 15-004 Nuclear Safety Division Safety Basis Review and Approval Process SIA – Place in Undistributed Budget" for \$.005M, and VMSA-15-012 Rev 1, "Administrative BCR – Re-Allocation of Budget for Mods 444 & 445, Definitization of FY 2014 Labor Adder & Pension Cost Variance Proposal" that was a \$0.0M change bottom line but resulted in change to PMB of \$2.8M and NonPMB of (\$2.8M) to correct liquidation of G&A and DLA accounts and distribute the budget appropriately.

Changes in Estimated Cost of Authorized / Unpriced Work:

There were no changes to Authorized Unpriced Work for May.

Changes in Estimated Price:

The Estimated Price of \$3,6794.0M is based on the Most Likely Management EAC (MEAC) of \$3,465.0M and fee of \$209.0M. The Most Likely MEAC reflects recognition of significant additional work scope in FY 2009 through FY 2011 related to *American Recovery and Reinvestment Act of 2009* (ARRA) support activities to site contractors, and other DOE-authorized activities beyond the original contract assumptions. Baseline Change Requests were implemented for the Cost Variance Contract Modifications received for FY 2009 thru FY 2012 in January 2015. Since FY 2013 and FY 2014 were within a 10% variance, proposals have not yet been processed to increase the Negotiated Contract Cost / Performance.

Table 6-1, cont. Format 5, DD Form 2734/5, Explanations and Problem Analysis.

Differences between Current Month and Prior Month EAC's [Format 1, Column (13) (e):

During May 2015, the EAC decreased from \$3,470.1M to \$3,465.0M by (\$5.1M), ((\$6.4M) in the PMB, and \$1.3M in the Non-PMB). Decreases in the PMB were primarily due to FY 2015 rate changes and passbacks reducing projected costs and a decrease to outyear Reliability Project costs. Increases in the Non-PMB were due to changes in the liquidation accounts (G&A, Variable Pools, and DLA). These increases were due to mid-year rate changes impacting liquidation of pools that were offset with reductions to rates for the non-PMB primarily for Work for Others accounts.

Changes in Undistributed Budget:

This reporting period the Undistributed Budget (UB) increased by \$.005 from \$1.3M to \$1.3M for BCR V1000PD-15-003, "Administrative BCR – Mod 459, PMTO 15-004 Nuclear Safety Division Safety Basis Review and Approval Process SIA – Place in Undistributed Budget".

Changes in Management Reserve:

The Management Reserve of \$0.083M did not change this reporting period.

Differences in the Performance Measurement Baseline:

This reporting period the Performance Measurement Baseline budget increased by \$2.9M from \$2,307.9M to \$2,310.8M. This increase is due to implementation of four Baseline Change Requests in May 2015 including: V1000HQ-15-001, "Mod 456, DOE-HQ Human Resource Staffing Process Structured Improvement Activities – Add Scope, Budget and Fee" for \$.021M, V1000PD-15-001 Rev 1, "Mod 457, PMTO 15-002 Development of Dashboard Solutions for ORP Phase 2 – Add Scope, Budget and Fee" for \$.082M, V1000PD-15-003, "Administrative BCR – Mod 459, PMTO 15-004 Nuclear Safety Division Safety Basis Review and Approval Process SIA – Place in Undistributed Budget" for \$.005M, and VMSA-15-012 Rev 1, "Administrative BCR – Re-Allocation of Budget for Mods 444 & 445, Definitization of FY 2014 Labor Adder & Pension Cost Variance Proposal" for \$2.8M to correct liquidation of G&A and DLA accounts and distribute the budget appropriately.

Differences in the Non - Performance Measurement Baseline:

This reporting period the Non-Performance Measurement Baseline budget decreased by (\$2.8M) from \$1,069.0M to \$1,066.2M. This decrease is due to implementation of one Baseline Change Request in May 2015 VMSA-15-012 Rev 1, "Administrative BCR – Re-Allocation of Budget for Mods 444 & 445, Definitization of FY 2014 Labor Adder & Pension Cost Variance Proposal" for (\$2.8M) to correct liquidation of G&A and DLA accounts and distribute the budget appropriately.

Best/Worst/Most Likely Management Estimate at Completion (MEAC):

The Best Case Management Estimate at Completion (EAC) assumes the completion of approved negotiated workscope, management reserve and undistributed budget consistent with the Contract Budget Base. The Most Likely Management EAC reflects the Estimate at Completion including management reserve. The Worst Case Scenario assumes a 5% increase to the Most Likely EAC case scenario.

MSC Monthly Performance Report DOE/RL-2009-113 Rev 68

7.0 USAGE-BASED SERVICES / DIRECT LABOR ADDER SUMMARY

The Direct Labor Adder (DLA) (motor carrier, facilities and janitorial) collects the cost of centralized management, support from other, craft indirect time, and non-labor cost like facilities maintenance. These costs are distributed via a rate on direct labor. Usage-Based Services (UBS) are services liquidated to customers (internal and external). The UBS cost is associated with a service and distributed on a unit rate to the customer based upon requests ("pay by the drink").

Table 7-1. Usage-Based Services / Direct Labor Adder Summary (dollars in thousands)).

Table 7-1, cont. Usage-Based Services / Direct Labor Adder Summary (dollars in thousands).

ACWP = Actual Cost of Work Performed. BCWP = Budgeted Cost of Work Performed. CV = Cost Variance

BCWS = Budgeted Cost of Work Scheduled.

Cost Variance (+\$78.4M) – Facility Maintenance costs (i.e., Crane & Rigging, Fleet, Facility Services) are being incurred at a significantly higher level than plan due to the deterioration of aging facilities. In addition, service levels for maintenance and transportation support to Site contractors are running higher than base proposal assumptions. Radiological Site Services (RSS) activities are costing less than planned due to 1) reduced service levels from Site contractors, and 2) efficiencies implemented in executing the RSS program.

During January, MSA completed the detail planning of the definitized cost growth proposals for FY 2009 -FY 2012, and FY 2013 Public Safety & Resource Protection (PSRP) and Waste Sampling and Characterization Facility (WSCF) Ready to Serve. These cost variance proposals were implemented as current period point

MSA

adjustments during January 2015 which generated a large spike of BCWS and BCWP and resulted in a large positive cost variance for the current month and fiscal year to date. Although this large cost variance distorts the January 2015 monthly performance and year-to-date performance, the cumulative to date variances are now aligned with the implementation of the prior year cost variance proposals.

8.0 RELIABILITY PROJECT STATUS

Activity in May was centered on continuing progress on projects carried over from FY 2014. (See table 10-1 below.) For further information concerning accomplishments and issues related to the Reliability Projects, refer to the Public Works Service Area section of this report.

8.0 RELIABILITY STATUS, CONT.

Variance Explanations

Contract to Date (CTD) Schedule Variance – Project L-780, 200E 13.8kV ED Sys Mods: The schedule was statused at 70% for the Ecological and Cultural Reviews, but the work scope was completed in May. The schedule and cost variances are due to understating the amount of work performed, and will be offset in the June 2015 reporting period.

Project L-858, 200E 13.8kV ED Design & Base Service Load Reconfiguration: The unfavorable schedule variance is due to slow submittals of pre-construction documents. This is impacting mobilization and construction initiation activities. The Technical Baseline schedule was originally resource-loaded based on construction beginning in May 2015.

CTD Cost Variance – Project L-867, *North Loop Transition Line Road Access*: The cost variance is due to only a limited amount of gravel being applied at this time, along with efficiencies regarding crew type and size; support performed by Plant engineers instead of M020 managers; and also significant Construction Manager field involvement, improving project efficiencies regarding field walks and field preparation activities. Additionally, the project has been able to take advantage of ecological and cultural reviews performed by a previous project in the same geographical area.

Project L-858, 200E 13.8kV ED Design & Base Service Load Reconfiguration: The positive cost variance is due to taking advantage of preliminary design and planning conducted as part of the Integrated Reliability Project Priority List (IRRPL), and normal processes in project planning and estimating that were performed in FY 2013 and FY 2014. For example, the preliminary conceptual design was done in FY 2013 as part of the IRRPL process, and this was used to produce a Statement of Work. As a result, the design contract was awarded early, and with significantly less labor than planned. Ecological and cultural reviews required less effort because the construction is in a previously disturbed area, and falls under the Tank Farms Environmental Impact Statement. Planning meetings held in

FY 2013 and FY 2014 with ORP and WRPS on this project enabled activities that normally are more labor-intensive to be accomplished more quickly and with less cost. The project is under budget but some resources needed for

the construction phase may have been underestimated, and design resources were overestimated. As a result, the variance is expected to be corrected during construction.

Project L-761, *Replace RFAR Phase 2*: Project is complete. The final cost variance is due to efficiencies in developing the design.

Project HSPD-12, *Logical Access Control:* The cost variance is primarily due to budget value not being aligned with available funding.

CTD Variance at Completion (VAC) – Project L-525, 24-*Inch Line Replacement, 200E*: VAC is due to cost savings from utilization of previously unavailable internal engineering resources for design production.

Project L-840, 24-Inch Line Replacement, 200W: The VAC is due to cost savings from utilization of previously unavailable internal engineering resources for design production.

Project HSPD-12, Logical Access Control: The VAC is primarily due to being provided an additional \$50K in FY 2014 for continuation of this work scope without the associated budget. MSA is working with RL to submit a new proposal based on a revised execution plan for the remainder of the HSPD-12 work scope.

Remaining Work
Baseline

MSC - Reliability Projects Summary Schedule Data Date: 24-May-15

9.0 BASELINE CHANGE REQUEST LOG

Nine Baseline Change Requests (BCRs) were processed in May.

Two BCRs incorporated Contract Modifications:

- V1000HQ-15-001 Mod 456, DOE-HQ Human Resource Staffing Process Structured Improvement Activities – Add Scope, Budget and Fee
- V1000PD-15-001 Rev 1 Mod 457, PMTO 15-002 Development of Dashboard Solutions for ORP Phase 2 Add Scope, Budget and Fee

Seven BCRs were Administrative in Nature:

- VMSA-15-012 Rev 1 Administrative BCR Re-Allocation of Budget for Mods 444 & 445, Definitization of FY 2014 Labor Adder & Pension Cost Variance Proposal
- VMSA-15-013 Create Two Level Four & Two Level Five WBSs and Move Budget within Human Resources due to HR Reorganization
- V1000PD-15-003 Administrative BCR Mod 459, PMTO 15-004 Nuclear Safety Division Safety Basis Review and Approval Process SIA – Place in Undistributed Budget
- VRL40RP-15-010 Administrative BCR Move the Remaining Budget for EC28 Crane Procurement from FY 2016 to FY 2015 and Earn Performance as a Point Adjustment
- VSWS-15-022 Administrative BCR Create Two Level Five WBSs within IR/CM Facility Management, Move Associated Budget (FY 2015 – FY 2019) and Change Title of Existing Level Five WBS
- VSWS-15-023 Administrative BCR Create Three Level Five WBSs within Hanford Site Emergency Alerting System and Move Associated Budget (FY 2015 – FY 2019)
- VUBS-15-001 Administrative BCR Create Three Level Five WBSs within Government Owned Facilities and Move Associated Budget (FY 2015 FY 2019)

MAY 2015 29

NOTE: The following BCR remains in Undistributed Budget and will be detailed planned in the COBRA in the coming months. VMSA-13-012 Rev 2 Allocation of Undistributed Budget for Contract Modification 238 and 245, Labor and Pension Cost Growth (\$1,316.9K is left in SWS and will be reinstated as work is definitized).

V1000PD-15-003 Administrative BCR - Mod 459, PMTO 15-004 Nuchlear Safety Divisioin Safety Basis Review and Approval Process SIA - Place in Undistributed Budget (\$4,784 workscope, \$383 fee - both in whole dollars).

EXECUTIVE OVERVIEW

10.0 RISK MANAGEMENT

May risk management efforts, aiding in completing the overall MSA risk determination, include the following:

- Risk Profiles and Risk Handling Plans (RHPs) were updated:
 - Risk Profiles include: top risks, an expected management reserve requirement, and a heat map, which displays the department risks in accordance to their risk scoring.
 - RHPs are mandatory for risks with a priority score of a 4 or 5. The RHPs were reviewed and updated as appropriate.
- Project Risks were reviewed and updated as appropriate.
- The Risk Management Board Meeting is scheduled to be held at the end of June, 2015
- Risk Management reviewed the schedule and scope assumptions for the contract proposals s ensure risks were adequately bound.

90-Day Look Ahead

• Review of Risk Management Plan

June 2015 Contract Deliverables

NOTE: Areas shaded in gray indicate delivery to DOE, and when the "Date Approved by DOE" is shaded, approval has been received in return. "Review" responses from DOE are not documented with dates, but shaded when complete.

IAMIT = Interagency Management Integration Team. TPA = Tri-Party Agreement.

N/A = no action.

12.1 GOVERNMENT-FURNISHED SERVICES/INFORMATION AND DOE DECISIONS

There are two GFS/I items due to MSA in 2015:

- GF049, due June 1, 2015: *DOE to provide a Hanford "planning case" budget to prepare the updated Hanford Lifecycle Scope, Schedule, and Cost Report.* On-time delivery of this item is anticipated.
- GF050, due October 31, 2015: *DOE Approval of the DRAFT Hanford Lifecycle Scope, Schedule, and Cost Report.* On-time delivery of this item is anticipated.

13.0 Self-Performed Work

Table 15-1. Mission Support Contract Socioeconomic Reporting.

Plan Category	MSA Goal	FY15 Actual TD	Cumulative %	Trend
Small Business	50.0%	37.4%	49.4%	$\hat{\mathbf{U}}$
Small Disadvantaged Business	10.0%	3.4%	14.3%	$\hat{\mathbf{U}}$
Small Women-Owned Business	6.8%	14.2%	8.8%	
HubZone	2.7%	2.0%	2.4%	
Small Disadvantaged, Veteran- Owned Business	2.0%	3.7%	3.0%	$\hat{\mathbf{U}}$
Veteran-Owned Small Business	2.0%	3.3%	5.3%	Û

Prime Contract Targets:

- At least 40% contracted out beyond MSA = 47% (\$1,112M / \$2,387M)
- Small Business 25% of Total MSC Value = 23% (\$549M / \$2,387M)

Note: Potential fee reduction based on cumulative at Year 7 of the MSA contract.

This page intentionally left blank.

INTRODUCTION

The Business Operations organization supports the Mission Support Alliance, LLC (MSA) by providing required business administration activities including internal management, human resources, contract and subcontract administration, and financial controls to effectively manage the Mission Support Contract (MSC). Business Operations is responsible for activities that include Human Resources, Finance and Accounting, Program Controls, and Contracts. Human Resources (HR) promotes competitive compensation, benefits, and development opportunities for the MSA and its teaming partners, enabling them to provide distinctive service to customers. HR is also responsible for developing and implementing personnel policies; offering creative staffing solutions; facilitating positive interaction and employee relations; and making cost-effective, value-based decisions. Finance and Accounting includes accounts payable, accounts receivable, general ledger reconciliation, payroll and all payroll services for nine companies, pricing and cost estimating, and validating the timekeeping system. Program Controls includes scope, schedule, and cost baseline management, planning, baseline change, work integration and control, earned value management, and performance reporting. Contracts includes acting as the primary point of contact for the MSA in all contractual matters with the U.S. Department of Energy (DOE), Richland Operations Office (RL); supports all MSA functional areas by providing contract administration and management; monitors all aspects of contract performance; provides subcontracting and purchasing support to accomplish the MSC mission and support the Hanford Site; reviews incoming correspondence for contractual impacts; and assigns and tracks all open action items to completion.

KEY ACCOMPLISHMENTS

PROGRAM CONTROLS

Fiscal Year (FY) 2016 Usage-Based Service (UBS) Forecast – On May 11, 2015, MSA Interface Management, working with Program Controls, issued a request to Washington River Protection Solutions (WRPS) and CH2M HILL Plateau Remediation Company (CHPRC) for service forecasts of UBS for FY 2016. This activity is the initial action required in development of MSA resource planning and associated service rates to deliver right-sized services to site contractors. Service requests are due from site contractors by June 15, 2015, with anticipated preliminary UBS rates available to site contractors and DOE by mid-July. A service forecast request may also be made of Washington Closure Hanford, LLC (WCH) pending clarification on potential contract extension and the need for continuing UBS.

CONTRACTS

Contract Modifications (Mods) – MSA received the following:

- Mod 457 definitizing Portfolio Management Task Order (PMTO) 15-002, Phase 2A Dashboard Support to DOE Office of River Protection (ORP).
- RL definitized Mod 458 incorporating the Transition and Turnover portions only, for two Long-Term Storage (LTS) transfer areas (100K and 100F IU2/IU6 & Segment 4A) into the J-2.
- Mod 459, incorporating Portfolio Management Task Order (PMTO) 15-004, Nuclear Safety Division Structured Improvement Activity.

206.1 DOE Privacy Program Rough Order of Magnitude (ROM) Cost Estimate – RL responded to MSA's 206.1 DOE Privacy Program ROM with questions. The scope involves the protection and reporting of personal information on MSA's 17 Systems of Record. MSA's response to RL's questions was submitted May 7, 2015.

Homeland Security Presidential Directive (HSPD)-12 – MSA delivered to RL the requested, updated implementation plan and ROM for HSPD-12 on May 28, 2015. MSA expects a request for proposal after the updated plan is approved.

MSA Assistance to Lift Stop Work at WRPS – MSA Materials was able to support an emergency procurement of outrigging materials in order to lift a stop work at WRPS. The order was requested April 30, 2015, placed on the same day, and shipped out from Iowa. The materials were received on site May 4, 2015. The materials allowed WRPS engineering to move forward with closing the stop work order.

HUMAN RESOURCES

Hanford Site Pension and Savings Committee – The Hanford Site Pension and Savings Committee met on May 14, 2015. Pension and Savings Plans' investment performance was reviewed, investment pricing methodology was discussed, and preliminary actuarial valuation information was presented. The committee also discussed the status of on-line fiduciary training, potential topics for a committee educational session, and administrative budget performance.

DOE Benefit Plan Metrics – MSA coordinated efforts with various Hanford Site contractors to complete the DOE Benefit Plan Metrics deliverable. The Benefit Plan Metrics assignment is composed of various worksheets containing summary plan data for the Hanford Site Pension and Savings, and Hanford Employee Welfare Trust Benefit Plans. All Site contractors submitted information through the I-Benefits system by the May 18, 2015, commitment date.

FINANCE AND ACCOUNTING

Rate Development – MSA Business Operations transmitted an electronic bulletin to Site users regarding the FY 2015 Rev 1 Forward-Pricing Rates for labor, absence, continuity of service, and continuity of pension rates.

MSA also publicized the FY 2015 updated UBS rates for Fleet Service Center, Crane and Rigging, Training and Hanford Radiological Instrumentation Program (HRIP). MSA developed the FY 2016 Preliminary Labor Rates for 2016 planning.

Support to Ongoing Audits -

- MSA gathered support for the FY 2012 KPMG Incurred Cost Submittal (ICS) audit specific to the preselect adders including the monthly credit invoice, the subcontractor invoice reconciliation and variance analysis, and gathering the transaction detail to support the costing. The FY 2012 ICS audit responses are substantially complete. Additionally, cost transactions for the Parent Organization Support Process were gathered as well as the DOE Approval letters. Inventory change transactions were supported.
- MSA continues to provide timely and accurate responses to the FY 2013 ICS audit inquiries.
- KPMG's audit of the Property System is on-going. KPMG is scheduled for field testing on June 15, 2015.
- KPMG kicked off the FY 2015 Procurement System audit on May 11, 2015, and all information required to date has been provided.
- For the FY 2015 Disclosure Statement Review, KPMG audited the May Disclosure Statement in conjunction with May accounting changes.

LOOK AHEAD

None to report.

MAJOR ISSUES

None to report.

SAFETY PERFORMANCE

No Occupational Safety and Health Administration (OSHA) injuries or First Aid cases were reported for Business Operations in May 2015.

BASELINE PERFORMANCE

Fund Type		Ν	May 2015			Contract-to-Date						
Fund Type	BCWS	BCWP	ACWP	SV	CV	BCWS	BCWP	ACWP	SV	CV		
FY 2009 Transition Cost	\$0.0	\$0.0	\$0.0	\$0.0	\$0.0	\$5.9	\$5.9	\$5.9	\$0.0	\$0.0		
Site-wide Services	\$0.5	\$0.5	\$0.4	\$0.0	\$0.1	\$42.6	\$42.6	\$45.5	\$0.0	(\$2.9)		
Subtotal	\$0.5	\$0.5	\$0.4	\$0.0	\$0.1	\$48.5	\$48.5	\$51.4	\$0.0	(\$2.9)		

Table BO-1. Business Operations Cost/Schedule Performance (dollars in millions).

ACWP = Actual Cost of Work Performed.

BCWP = Budgeted Cost of Work Performed.

BCWS = Budgeted Cost of Work Scheduled.

BAC = Budget at Completion.

= cost variance.

CV

SV

FYTD = fiscal year to date.

= schedule variance.

BASELINE PERFORMANCE VARIANCE

Current Month Cost Variance (+\$0.1M) – The positive cost variance was primarily due to a mid-year FY 2015 retroactive adjustment (reductions) to the MSA labor adders and General and Administrative (G&A) rate.

Contract-to-Date (CTD) Cost Variance (-\$2.9M) – The unfavorable CTD variance is attributable to an increased level of support required for Performance Reporting. Additional efforts were associated with Program Controls system administration; technical baseline support; and change control. The Centralized Procurement Card (P-Card) Purchasing program was added, as well as additional staff support for Labor Relations and the Hanford Employee Welfare Trust. This variance will continue to increase as the number of resources needed to complete this work scope exceeds the number of resources from the original contract bid. In addition, Site Wide Services severance costs in FY 2013 and FY 2014 were not assumed in the baseline, and are contributing to the unfavorable CTD variance.

MISSION SUPPORT ALLIANCE

"WE WILL MEASURE OUR SUCCESS BY OUR CUSTOMERS' SUCCESS"

Emergency Services

Craig Walton, Vice President

Monthly Performance Report

May 2015

Hanford Fire Department staff (with guests) at the 2015 Safety Exposition (EXPO)

This page intentionally left blank

INTRODUCTION

The Emergency Services (ES) organization supports the site environmental clean-up missions by providing protective forces, physical security systems, information security, personnel security, nuclear materials control and accountability (MC&A), cyber security, program management, fire and emergency response services, and emergency operations.

KEY ACCOMPLISHMENTS

2015 Health & Safety Exposition (EXPO) Kids' Choice Award – Hanford Patrol along with Hanford Fire Department (HFD) participated in the 2015 Health and Safety Expo, May 12-13, 2015, together sharing the "Kids Choice" booths award. HFD members staffed the First Aid Booth, the Exit Drills in the Home (E.D.I.T.H.) display, Sparky the Fire Dog, the exhibit of HFD emergency response vehicles, and the Vehicle Accident Demonstration. Hanford Patrol and their sponsored Explorers manned two booths: Driving Safety and Firearms Safety. Using driving simulation software and a vehicle housed in a trailer, visitors had the opportunity to "drive" a car while avoiding obstacles and distractions. Firearms Safety offered a one-on-one interaction between personnel and visitors. Patrol and the Explorers presented a bicycle safety demonstration for children as well.

EMERGENCY MANAGEMENT PROGRAM (EMP)

Radiological Assistance Program (RAP) Region 8 Support

- RAP Region 8 deployed a team to the Nuclear Weapons Accident Incident Exercise on May 4-8, 2015, in Silverdale, Washington
- RAP Region 8 and the Mobile Detection Deployment Unit (MDDU) program supported the Indianapolis 500 Race May 20-26, 2015

HANFORD FIRE DEPARTMENT (HFD)

HFD Testing and Logistics – HFD Testing and Logistics continued to aggressively work the backlogged testing packages associated with a CH2M HILL Plateau Remediation Company (CHPRC) Technical Safety Requirement (TSR) violation occurrence earlier this year. This effort has resulted in a reduction of backlogged activities and increased the completion percentage of fire system testing packages from 62.5% to 96.3%.

HFD Significant Responses – On May 6, 2015, HFD crews were dispatched to a power pole fire at the old Hanford Irrigation Pumphouse at the Camp Hanford Area. While

the electrical utility was contacted to de-energize the line, extinguishing foam was applied to the ground surrounding the power pole. Once de-energized the extinguishing foam was also applied to the pole.

SAFEGUARDS AND SECURITY (SAS)

Homeland Security Presidential Directive-12 (HSPD-12) – SAS personnel submitted the HPSD-12 Implementation Plan on May 28, 2015 to the U.S. Department of Energy (DOE) Richland Operations Office (RL) and DOE Office of River Protection (ORP).

National Security System Quarterly Report – On May 14, 2015, SAS submitted the National Security System Quarterly Status Report per Contractor Requirement Document (CRD), O 205.1A (Supplemented Rev. 3), (*DOE Cyber Security Management*).

Impact Analysis and Implementation Plan Submitted – SAS submitted to RL an impact analysis and Implementation Plan for CRD O 474.2, *Nuclear Material Control and Accountability*, on May 14, 2015.

Joint Conflict and Tactical Simulation Network System Security Plan – On May 28, 2015, SAS received approval from RL for the Joint Conflict and Tactical Simulation Network System Security Plan (JCATS).

LOOK AHEAD		
Nothing to report.		
MAJOR ISSUES		
Nothing to report.		

SAFETY PERFORMANCE

Emergency Services reported no Occupational Safety and Health Administration (OSHA) Recordables in May. One minor First Aid injury was reported involving an employee who received a small abrasion to the arm while opening a valve. One Vehicle Accident was reported during a mutual aid response, when Ladder Truck 1923 backed into the Richland Fire Station, and its ladder contacted the overhang on the roll-up door. Minor damage was incurred.

BASELINE PERFORMANCE

Fund Tune			May 201	5		Contract-to-Date						
Fund Type	BCWS	BCWP	ACWP	SV	CV	BCWS	BCWP	ACWP	SV	CV		
RL-0020 - Safeguards & Security	\$4.9	\$4.9	\$3.8	\$0.0	\$1.1	\$331.1	\$331.1	\$340.5	\$0.0	(\$9.4)		
Site-wide Services	\$2.4	\$2.4	\$2.2	\$0.0	\$0.2	\$150.3	\$150.3	\$155.4	\$0.0	(\$5.1)		
Subtotal	\$7.3	\$7.3	\$6.0	\$0.0	\$1.3	\$481.4	\$481.4	\$495.9	\$0.0	(\$14.5)

BCWS = Budgeted	Budgeted Cost of Work Scheduled EAC = Estimate at Completion											

Table ES-1. Emergency Services Cost/Schedule Performance (dollars in millions).

BASELINE PERFORMANCE VARIANCE

Current Month Cost Variance (CV) (+\$1.3M) – The positive cost variance was due to FY 2015 mid-year adjustments (reductions) to labor rate adders and cost credits for over liquidated Unit Billed Service pools.

Contract-to-Date Cost Variance (CV) (-\$14.5M) – The primary drivers for the negative cost variance are implementation of the Graded Security Policy, which was subsequent to the MSA baseline proposal and implementation, and a baseline budgeting omission for platoon shift hours in the HFD. This activity is working to RL-directed contract baseline re-alignment guidance that provides for a higher spending target than the baseline; no mitigating actions are in place at this time to reduce the overall cost overrun.

This page intentionally left blank

Environmental, Safety, Health & Training

Mike Wilson, Vice President

Monthly Performance Report

May 2015

This page intentionally left blank.

INTRODUCTION

The Environmental, Safety, Health, & Training (ESH&T) organization includes Radiological Site Services (RSS), Environmental Integration, Public Safety and Resource Protection, Safety & Health, Nuclear/Radiation Safety, Hanford Atomic Metal Trades Council (HAMTC) Safety Representatives, Safety Culture, and Volpentest Hazardous Materials Management and Emergency Response Training and Education Center (HAMMER). This team ensures that all environmental, safety, health, and training requirements are met so that Mission Support Alliance, LLC (MSA) provides its services in a safe and environmentally sound manner. The ESH&T organization develops, implements, and improves Integrated Safety Management (ISM), worker safety and health, radiation safety, and quality assurance policies and procedures that govern work performed by MSA.

The primary mission of HAMMER is to provide realistic, hands-on, standardized safety and health training to Hanford Site workers, enabling them to perform work in a safe and compliant manner. HAMMER leverages its training expertise to support national and international agencies by providing training for emergency responders and homeland security personnel, helping strengthen the safety and security envelope around the world. HAMMER also performs a critical role for the U.S. Department of Energy (DOE) to ensure energy restoration actions are managed promptly in the wake of natural disasters. Throughout all of these roles, HAMMER holds true to the core value of bringing workers and managers together with a single focus on worker safety.

KEY ACCOMPLISHMENTS

DOE Laboratory Accreditation Program (DOELAP) – The DOELAP for RSS direct and indirect radiobioassay programs was conducted on May 19 -20, 2015. The audit resulted in no deficiencies, no concerns and seven observations. The observations are recommendations for improvement or noteworthy practices, and do not require a corrective action plan or response to DOELAP. Two of the observations were noteworthy practices. Re-accreditation without additional MSA action is expected in the fall.

Relocation of RSS Complete – Hanford External Dosimetry and Hanford Radiological Instrument Programs (HRIP) completed their planned relocation from the 318 facility to the 6266 Building in May. Currently, HRIP is still relying on the well room at 318 one day per week for certain calibrations. The move consisted of the relocation of approximately 18 employees, computer enclaves, and thousands of pieces of equipment. The relocation was implemented with no significant impacts to the

customers, or the departments' ability to meet turnaround time requests/Performance Incentive requirements.

Health & Safety Exposition (EXPO) – MSA served as the executive sponsor for the 21st Health & Safety EXPO that was held on May 12-13, 2015, at the Trade, Recreation and Agricultural Center (TRAC) Facility in Pasco, WA. Over 170 exhibitors were present to promote safety among Hanford workers and members of the community. The event was organized by DOE, various Hanford Contractors, Hanford unions, and the Pacific Northwest National Laboratory (PNNL).

Subcontract for Professional Curatorial and Archival Services Awarded – The MSA Curation Services Program has awarded a subcontract to Washington State University Tri-Cities (WSU-TC). This subcontract is for providing professional curatorial and archival services for the management, conservation, and interpretation of the Hanford Collection, consisting of artifacts, documents, photographs, videos, and films relating to the Manhattan Project and Cold War Era. In addition to public outreach and education, WSU-TC will provide a repository for the collection that meets the requirements for the Curation of Federally Owned and Administered Archaeological Collections (36 CFR 79) including protecting these resources from theft, fire, breakage or deterioration.

Nuclear Forensics Methodologies Course Offered to Representatives from nine Countries – From May 11-22, 2015, the International Atomic Energy Agency (IAEA) and the National Nuclear Security Administration's Office of Nonproliferation and International Security co-sponsored a Nuclear Forensics Methodologies Course at the HAMMER Facility for 21 students representing nine countries.

HAMMER Staff Participate in National Exercise – HAMMER staff deployed in support of Federal Emergency Management Agency's (FEMA) 2015 capstone National Level Southern California Earthquake Exercise. The exercise simulated the massive destruction wrought upon Southern California following a 7.8 magnitude earthquake along the San Andres fault line. HAMMER personnel served as exercise controllers at the Master Control cell in Sacramento, California, and virtually from the HAMMER complex. HAMMER staff also participated as players for the Emergency Support Function #12 - Energy (ESF#12) mission at the FEMA National Response Coordination Center in Washington, DC. ESF#12 Headquarter staff and Regional Coordinators also participated as players for their respective areas. Exercise participation was complicated by the real-world activation and deployment of ESF#12 personnel in support of Typhoon Dolphin.

LOOK AHEAD

MSA Safety Culture Survey – On August 3-21, 2015, MSA will be conducting a safety culture survey using a platform provided by an independent subcontractor. The survey will include a standard set of safety-related questions along with a few MSA-specific questions. This activity aligns with commitments contained in MSAs 2014 Safety Culture Sustainment Plan. The goal is to use survey results in conjunction with data collected from other assessment activities to pinpoint what is working well and what may need improvement.

MAJOR ISSUES

Worker-Trainers – HAMMER staff met with representatives from CH2M HILL Plateau Remediation Company (CHPRC) and Washington River Protection Solutions LLC (WRPS) regarding the need for more worker-trainers. This positive, proactive meeting identified the level of support needed to meet current training demands. A lack of instructors resulted in the cancellation of a Beryllium Postings, Assessment, Characterization/Verification class that was scheduled in May 2015. When instructors are not available, training classes cannot be offered as scheduled. HAMMER is still seeking worker-trainers and subject matter expert instructors for several programs.

SAFETY PERFORMANCE

ESH&T had no Occupational Safety and Health Administration recordable injuries in May.

BASELINE PERFORMANCE

Fund Type		Ν	/lay 2015			FY 2015 to Date

Total ESH&T	\$2.9	\$2.9	\$2.5	\$0.0	\$0.4	\$201.1	\$201.1	\$209.3	\$0.0	(\$8.2)	

Table ESH&T-1. ESH&T Cost/Schedule Performance (dollars in millions).

ACWP = Actual Cost of Work Performed

BCWP = Budgeted Cost of Work Performed

BCWS = Budgeted Cost of Work Scheduled

BAC = Budget at Completion

```
CV = cost variance
FYTD = fiscal year to date
SV = schedule variance
EAC = Estimate at Completion
```

FYTD BASELINE PERFORMANCE VARIANCE

RL-40

Current Month Cost Variance (CV) (-\$0.1M) – The unfavorable current month variance is predominantly due to the assumption that less Environmental Management (EM) funding would be required because HAMMER could self-fund itself by performing enough services for non-Hanford entities. This assumption has been proven wrong. As a result of this inaccurate assumption, the EM budget will remain lower than the EM funds authorized. This divergent situation will remain and continue to increase the FY 2015 cost variance. Services delivered at HAMMER will not be adversely affected because the services are executed consistent with the approved Integrated Priority List (IPL) scope. No other potential contributing performance issues were identified.

Contract-to-Date Cost Variance (CV) (-\$3.7M) – The unfavorable contract-to-date variance is predominantly due to the assumption that less EM funding would be required because HAMMER could self-fund itself by performing enough services for non-Hanford entities. This assumption has been proven wrong. As a result of this inaccurate assumption, the EM budget will remain lower than the EM funds authorized. This divergent situation will remain and continue to increase the contract-to-date cost variance. Services delivered at HAMMER will not be adversely affected

because the services are executed consistent with the approved IPL scope. No other potential contributing performance issues were identified.

SWS - Radiological Site Services (RSS) Cost Variance

Current Month Cost Variance (CV) (\$0.0M) – The favorable current month variance is within variance thresholds.

Contract-to-Date Cost Variance (CV) (-\$0.6M) – The unfavorable contract-to-date variance is predominantly due to the RSS move to the 200 West Area. 200 West Area facility repairs were not expected when the move funding was established. These unexpected facility repairs included a roof leak repair, a broken motor mount was repaired, and the heating, ventilation, and air conditioning (HVAC) failed. Because nitrogen gas needs out-pace individual bottle racks, a nitrogen gas supply system is being designed and will be installed this summer, along with replacement electrical breakers. This overrun will continue.

SWS – Energy and Environmental Services Cost Variance

Current Month Cost Variance (CV) (+\$0.8M) – The favorable current month variance is primarily due to the approved IPL funding and work scope occurring at a lower level of support than the contract baseline. Expenditures will remain in accordance with approved funding and IPL scope.

Contract-to-Date Cost Variance (CV) (+\$10.6M) – The favorable contract-to-date variance is due to FY 2013-2014 IPL scope and approved funding reductions, resulting in FY 2014 staffing reductions. Most IPL scope, funding and staff were restored in FY 2015. The contract-to-date variance will continue and expenditures will be in accordance with approved funding and IPL scope.

SWS – Safety and Health Cost Variance

Current Month Cost Variance (CV) (-\$0.3M) – The unfavorable current month variance is primarily due to the approved IPL funding and work scope increases in Beryllium. The approved IPL funding and work scope continue at a higher level of support than the contract baseline assumed. No other potential contributing performance issues were identified.

Contract-to-Date Cost Variance (CV) (-\$14.5M) – The unfavorable contract-to-date variance is primarily due to IPL scope and approved funding increases in the Radiation Protection (-\$3.8M), Worker Safety and Health (-\$5.6M), and Beryllium (-\$4.6M) accounts. The approved IPL funding and work scope continue at a higher level of

support than the contract baseline assumed. No other potential contributing performance issues were identified.

MISSION SUPPORT ALLIANCE

"WE WILL MEASURE OUR SUCCESS BY OUR CUSTOMERS' SUCCESS"

Information Management

Todd Eckman, Vice President

Monthly Performance Report

May 2015

2506E2 Facility Pacification and Consolidation, Before..... and After

This page intentionally left blank.

INTRODUCTION

Mission Support Alliance, LLC's (MSA's) Information Management (IM) organization brings best-in-class IM services to the Hanford Site. A variety of infrastructure, services, and applications are provided that include support to safety, security, site infrastructure, and cleanup missions; administrative support systems and processes; telecommunications and network infrastructure; records, document, and content management; cyber security; network operations and security center; desktop services; Information Support Services including reproduction services; site forms; multi-media services; geospatial information management and site mapping services; and the Mission Service Desk; Property and Warehouse Management including inventory management; asset disposition; store delivery; courier; property management and warehouse operations. IM's goal is to ensure technology, solutions, and innovations are supporting every project's success in the Hanford Site cleanup mission. IM's goal is achieved by confirming that top quality services and solutions are delivered in a professional and timely manner.

KEY ACCOMPLISHMENTS

INFRASTRUCTURE SYSTEMS

Project L-761, Radio Fire Alarm Reporter (RFAR) Phase 2 Communication System Installation – MSA IM completed the installation of two antennas on the Federal Building. Two antennas were installed for redundancy, and a backup power rack was also installed. The antennas will provide future RFAR services to the North.

2506E2 Facility Pacification and Consolidation Cutover Complete – As part of the Site facility pacification project, the cutover of building 2506E2 was completed successfully on May 15, 2015. The pacification included removing all Hanford Local Area Network (HLAN) electronics from the 2506E2 building, and converting to a passive fiber optic cross-connect facility. All transition work was completed on the same day to reflect the changes to infrastructure, telecommunications and networking.

SourceFire/ESX Server Implemented – During the week ending May 24, 2015, MSA Cyber Engineering resolved issues with the FirePower module in the core firewall. This allowed implementation incident responders to begin monitoring internal traffic for cyber threats. The SourceFire sensors were also replaced, eliminating some aging hardware.

Move to Skype for Business®¹ **Improves Security** – On May 22, 2015, the Skype for Business 2015 user interface replaced the Lync®² 2013 user interface. This change was introduced as part of a critical security patch for the client software and was communicated in a general delivery message.

CONTENT & RECORDS MANAGEMENT

Integrated Document Management System (IDMS) Support – The MSA IM, Records Information Management (RIM) team received numerous information data requests for processing. Team members conducted database searches for key phrases and names, and provided responsive documents once concurrence was received from the appropriate Site contractor record officers.

Records Management Access Portal (RMAP) Records Transfer Form (RTF) Enhancements/Virtual Box (VBR) Module in Production – The Records Management Access Portal (RMAP) Records Transfer Form (RTF) enhancements and the new Virtual Box module were moved to production on May 12, 2015. This functionality allows users to search, run reports and revise RTFs. Users can create a virtual box from the RTF module for new RTFs or create a virtual box request for boxes already in storage. The VBR will identify whether the records or VBR are sensitive, and identify who should have access to the records. The VBR also ensures that virtual boxes are scheduled according to the Hanford Integrated Records Schedules (HIRS)-approved schedules.

INFORMATION SYSTEMS

Enterprise Driven Geospatial Engine (EDGE)®³ Kicked off – MSA-IM officially kicked off work on the EDGE implementation project. EDGE is a usable, efficient, and enduring geospatial application development framework that supports existing and emerging mapping requirements as needed. The development environment is installed and functional. EDGE is scheduled to be implemented in production by fiscal year end. EDGE is the configurable and extendible commercial off-the-shelf (COTS) product selected to replace the Hanford application Qmap. It is a reusable, efficient, and enduring geospatial application development framework that supports existing and emerging mapping requirements.

¹ Registered trademark to Microsoft Corporation

² Registered trademark to Microsoft Corporation

³ Registered trademark to Latitude Geographic Company

LOOK AHEAD

Server 2003 Retirement Project (Web Server Administrators) – With support ending for Microsoft® Windows Server 2003⁴, all affected applications either must be migrated to newer host servers or retired. This effort requires engaging and coordinating with application owners, developers, web server administrators, and other stakeholders. CH2M HILL Plateau Remediation Company (CHPRC) has 30 applications currently in production status. To date, three applications are set to be retired or are being replaced, six have been migrated to new development and test servers, and most others are scheduled. All applications will be moved to new hosts by early May, and all applications will be on new production servers before June 14, 2015.

U.S. Department of Energy (DOE) Records Management Support to Office of River Protection (ORP) – An IM Record Management specialist met with DOE Richland Operations Office (RL) representatives and the RL Correspondence Control (RLCC) manager to discuss the relocation project that is starting at the ORP. Once the ORP correspondence control group is trained, they will start the hard-copy-to-electroniccopy process that RLCC is performing by permanently taking the retired boxes out of storage, reviewing the hard copy images, verifying them in the IDMS "Reference to Hard Copy" area, making any updated process changes, and moving the files into electronic format. This will reduce the number of boxes being stored, and help ORP meet its "going green" goal.

Washington River Protection Solutions LLC (WRPS) Waste Transfer Road Map (WTRP) Development Started – MSA IM started work on the requirements gathering and design development for the Waste Transfer Road Map (WTRM) project. This project will define and document a design for implementing an electronic interactive map for waste transfer planning.

MAJOR ISSUES

No issues identified.

SAFETY PERFORMANCE

There were no Occupational Safety and Health Administration recordable injuries. There were two minor First Aid injuries. One injury involved a worker with a strained arm, and the other a strained shoulder. There were no Vehicle Accidents reported in May.

⁴ Registered to Microsoft Corporation

BASELINE PERFORMANCE

Table IM-1. Information Management Cost/Schedule Performance (dollars in millions).

Fund Types	May 2015						Contract-to-Date					
runu rypes	BCWS	BCWP	ACWP	SV	CV	BCWS	BCWP	ACWP	SV	CV		
RL-0020 - Safeguards & Security	\$0.2	\$0.2	\$0.2	\$0.0	\$0.0	\$9.2	\$9.2	\$11.8	\$0.0	(\$2.6)		
RL-0040 - Nuc. Fac. D&D - Remainder Hanford	\$0.0	\$0.0	\$0.0	\$0.0	\$0.0	\$2.1	\$2.1	\$1.7	\$0.0	\$0.4

ACWP = Actual Cost of Work Performed

BCWP = Budgeted Cost of Work Performed

BCWS = Budgeted Cost of Work Scheduled

BAC = Budget at Completion

CV = cost variance

FYTD = fiscal year to date

SV = schedule variance

EAC = Estimate at Completion

BASELINE PERFORMANCE VARIANCE

CURRENT MONTH BASELINE PERFORMANCE VARIANCE

Cost Variance (+\$1.0M) – MSA completed re-aligning the baseline to the negotiated contract, and using the approved change control process, implemented the re-aligned baseline data. RL provided approval of the baseline data for reporting progress, and also provided an approved and funded priority list of items for MSA work scope.

The majority of the variances in these accounts are due to the approved funding and Integrated Priority List (IPL) scope being divergent from the baseline. FYTD variances will continue and expenditures will be in accordance with approved funding and IPL scope. Near the end of the fiscal year, MSA will assess any potential need for a cost growth proposal, and if deemed necessary, will develop and submit a proposal.

CONTRACT-TO-DATE BASELINE PERFORMANCE VARIANCE

Cost Variance (+\$3.1M) – MSA completed re-aligning the baseline to the negotiated contract, and using the approved change control process, implemented the re-aligned baseline data. RL provided approval of the baseline data for reporting progress, and also provided an approved and funded priority list of items for MSA work scope.

The majority of the contract-to-date variances in these accounts are due to the approved funding and IPL scope being divergent from the baseline. CTD variances will continue and expenditures will be in accordance with approved funding and IPL scope. Near the end of the fiscal year, MSA will assess any potential need for a cost growth proposal, and if deemed necessary, will develop and submit a proposal.

This page intentionally left blank.

Portfolio Management

Steve Young, Vice President

Monthly Performance Report May 2015

INTRODUCTION

The Mission Support Alliance, LLC (MSA) Portfolio Management (PFM) functional area delivers an integrated approach that allows the U.S. Department of Energy (DOE) Richland Operations Office (RL) to make informed decisions on cleanup efforts through alignment and integration of contractor data across government and contracting entities responsible for environmental cleanup at the Hanford Site. Through this integration, MSA PFM provides the technical support and expertise in project, portfolio, and enterprise management that allows continual optimization of the cleanup mission lifecycle, and enables DOE to successfully achieve the Hanford End State Vision. The MSA PFM organization includes: Lifecycle Planning; Work Planning, Change Control and Reporting; Mission Support; Budget Planning and Analytical Tools; and Project Interface. MSA PFM is organized to provide analytical and unbiased recommendations to enable DOE to apply its resources in the best way possible to meet mission objectives and optimize operations.

KEY ACCOMPLISHMENTS

Fiscal Year (FY) 2017-2021 Budget Formulation – With the successful upload of the FY 2017-2021 RL budget request from the Hanford Ranked Integrated Priority List (RIPL) to the DOE Office of Environmental Management (EM) Budget Prioritization Module (BPM), MSA and DOE have identified suggested improvements for RIPL. These improvements will increase functionality and speed, as well as better align the data for future uploads to EM. MSA will begin incorporating these enhancements as agreed to with RL.

PFM completed a comparative analysis of the data in RIPL, BPM and Integrated Planning, Accountability, and Budgeting System (IPABS) to ensure consistency and traceability. Milestone differences were due to timing or limitations in BPM. All results were documented and delivered to the DOE Assistant Manager for Business and Finance (AMB). The documentation will enable rapid response to questions and facilitate any changes to BPM if it is reopened.

Decision Management (Hanford Contract Alignment Board [HCAB]/ Energy Systems Acquisitions Advisory Board-Equivalent [ESAAB-E]) – PFM closed and completed the Disposition Notification for eight Decision Summary Forms (DSFs) that were approved during the last Decision Management, HCAB/ESAAB-E board meeting, and completed Disposition Notifications for each one.

The next Integration Support Team (IST) meeting is scheduled for June 18, 2015 and will include representation from the DOE Office of River Protection (ORP).

Hanford Lifecycle Scope, Schedule and Cost Report (Lifecycle Report) – PFM prepared draft dispositions to comments received on the 2015 Lifecycle Report for consideration in revising the 2016 Lifecycle Report. After considering the ongoing Tri-Party Agreement (TPA) milestone negotiations and the requirement to present a compliant planning case in the report, PFM developed and reviewed options for preparing the RL planning case to be presented in the 2016 Lifecycle Report and the draft report schedule.

Analytical Tools – MSA released an update to the Geographic Visualization (GeoVis) application into production seven weeks ahead of schedule. GeoVis is a web-based tool that displays site cleanup objects and remediation progress. This completes the RL-requested work plan deliverable of integrating subsequent units for individual development into GeoVis.

The new DOE Assistant Manager for River and Plateau (AMRP) Monthly Project Status Report was deployed on May 29, 2015 with the purpose to generate, save, and retrieve project monthly status reports by Project Breakdown Structure (PBS) and activity. This completes a FY 2015 work plan deliverable.

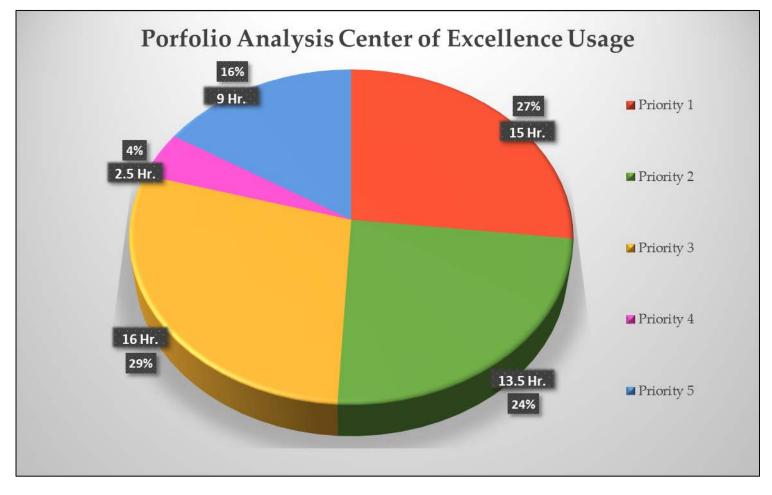

Issue Tracker projects for the ORP Assistant Manager for Technical and Regulatory Support (TRS) Image Report, Safety Report and Safety Report Administration were deployed to production on May 28, 2015. These projects modules will allow users to input safety data for the upcoming TRS dashboard.

Dashboards – Revisions to the ORP overall dashboard were deployed on May 29, 2015 per customer requirements to refine the focus areas, incorporate additional reports, and integrate links to other systems.

PFM met with the Deputy Project Manager and contract management staff for Washington River Protection Solutions (WRPS). A demonstration of the Portfolio Analysis Center of Excellence (PACE), dashboards and the GeoVis application were provided. The primary interest was on dashboards and how Portfolio Management can assist in streamlining project metrics and reporting.

Portfolio Analysis Center of Excellence (PACE) – Metrics for the PACE are provided in hours of usage via a dashboard. For the month of May the metrics are as follows:

MSA completed installing the new three-wall workstation in the PACE and replaced the audio receiver to eliminate speaker distortion. The new machine is noticeably faster and initial comments on its performance have been positive.

PFM supported Hanford Day for the Leadership Tri-Cities class by coordinating presentations by the RL Manager, the ORP Deputy Manager, and leadership for each site prime contractor. Overviews of the Hanford cleanup mission were provided as well as leadership best practices.

LOOK AHEAD

Nothing to report.

MAJOR ISSUES

None to report.

SAFETY PERFORMANCE

There were no Occupational Safety and Health Administration recordable or First Aid injuries reported for PFM in May 2015.

BASELINE PERFORMANCE

Subtotal	\$1.2	\$1.2	\$0.5	\$0.0	\$0.7	\$42.9	\$42.9	\$41.0	\$0.0	\$1.9

Table PFM-1.	Portfolio Management	Cost/Schedule Performance	(dollars in millions).

ACWP = Actual Cost of Work Performed

CV = cost variance

BCWP = Budgeted Cost of Work Performed

FYTD = fiscal year to date

BCWS = Budgeted Cost of Work Scheduled

BAC = Budget at Completion

SV = schedule variance

EAC = Estimate at Completion

BASELINE PERFORMANCE VARIANCE

Current Month Cost Variance (CV) (+\$0.7M) – A Baseline Change Request (BCR) was implemented for FY 2014 pension and labor adders in the current period.

Contract-to-Date (CTD) Cost Variance (CV) (+\$1.9M) – The positive CTD variance is primarily due to activity in FY 2013 Site-Wide Services: less Portfolio Management professional support was required than assumed and less consulting subcontract support was utilized. The positive variance is partially offset by additional Information Technology subcontract resources.

President's Office

W. K. Johnson, President R. E. Wilkinson, Chief Operations Officer

Monthly Performance Report

May 2015

INTRODUCTION

The President's Office (PO) is comprised of site-wide services consisting of the Communications & External Affairs (C&EA) and Quality & Performance Assurance (Q&PA).

The C&EA department provides a myriad of communication functions for U.S. Department of Energy (DOE), Hanford Site contractors, employees, and the public. The group supports DOE's Richland Operations Office (RL), addressing specific contractual objectives, commitments and milestones, and manages the Hanford Speakers Bureau and Hanford Public Tour programs. Communication efforts are facilitated internally through General Delivery Messages (GDM) and the Mission Support Alliance, LLC (MSA) internal newsletter, *Streamline*, and externally to the public through news releases, public presentations, and assisting in corporate involvement in area organizations. The C&EA function also facilitates community outreach on behalf of MSA and its employees.

The scope of the Quality & Performance Assurance (Q&PA) organization is twofold. First, Q&PA establishes quality requirements for MSA and its subcontractors. Second, Q&PA provides MSA Management with the information to evaluate and improve all aspects of the organization and the structure to formulate effective corrective actions.

KEY ACCOMPLISHMENTS

COMMUNICATIONS

Support to RL Tour Groups – MSA provided supported to RL for four separate groups tour groups in May.

- Leadership Tri-Cities (LTC) Class 20 visited Hanford, with facility briefings at the Waste Treatment Plant, the Environmental Restoration Disposal Facility (ERDF), and the Cold Test Facility, as well as a briefing near the base of Gable Mountain. MSA developed and distributed the tour agenda, secured facility briefers and tour guide, coordinated efforts for safe access around the base of Gable Mountain, and provided emergency response radio and other tour materials.
- The State and Tribal Government Working Group (STGWG) also visited Hanford in May. MSA procured two tour guides for the tour group, delivered 60 lunches to the site, assisted with departure and return of the tour group, and provided logistics support throughout the day for one of the two tour buses.

 MSA additionally coordinated two college tours for RL that took place in May, one from Western Washington University, Environmental Toxicology and Chemistry class, and one from Oregon State University, Nuclear Engineering and Health Physics class. Support included communicating with college professors; providing information on Identification (ID) requirements for Hanford Site access and Hanford security and safety guidelines; obtaining visitor names and submitting to Visitor Control for badging; securing tour guides and facility briefers; preparing information for tour guides; ordering transportation; developing and distributing tour agendas; supplying emergency radios and emergency response procedures; and assisting at the departure and return of each tour.

Hanford Site Public Tours Update – MSA conducted public tours 5 through 12 (out of 40 total planned for the year). To date, 700 visitors have participated in the 2015 Hanford Site Public tours, which is a 76% participation rate.

QUALITY & PERFORMANCE ASSURANCE

Supplier Evaluations/Source Inspections/Audits – There were several Source Inspections and Audits performed during the reporting period in support of other Hanford contractors, including Washington River Protection Solutions LLC (WRPS), and CH2M HILL Plateau Remediation Company (CHPRC).

Source Inspection activities performed during the reporting period included:

- Material Handling Facility (MHF) Services for CHPRC. Inspection activities on 7A containers include welding, pre-paint, thread engagement, and configuration control.
- American Geological Institute (AGI) Engineering for WRPS. Inspections included testing and preventive maintenance activities for the Standard and Extended Reach Sluicers.
- First Article Source Inspection activities at American Boiler Works for CHPRC. Source Inspection activities included configuration control, pre-weld and welding operations for the Sludge Treatment Storage Containers.
- Hydro Testing Source Inspection activities at Columbia Energy & Environmental Services on the UX302 Pumping Equipment for WRPS.
- Ion Exchange Modules at Orbit Industries for CHPRC. Source Inspection activities included weld inspections, fabrication configuration control, and hydro testing.

Audit activities performed during the reporting period included:

- Pacific Northwest National Laboratory's (PNNL) Rad Con Calibration Services for MSA Radiological Site Services.
- PNNL's Nondestructive Assay Services for CHPRC.
- Supplier Evaluation of PNNL's Analytical Support Operations (ASO) Group for CHPRC.

LOOK AHEAD

None identified.

MAJOR ISSUES

None identified.

SAFETY PERFORMANCE

In May, the President's Office reported no Occupational Safety and Health Administration (OSHA) Recordable injury or First Aid injury cases.

President's Office

Table PO-1. President's Office Cost/Schedule Performance (dollars in millions).

BASELINE PERFORMANCE VARIANCE

Current Month Cost Variance (+\$0.1) – The positive cost variance was primarily due to a mid-year FY 2015 retroactive adjustment (reductions) to the MSA labor adders and General and Administrative (G&A) rate.

Contract-to-Date (CTD) Cost Variance (-\$2.1M) – The unfavorable CTD variance is due to increased Mission Support Contract (MSC) Strategy work scope that wasn't assumed in the baseline. In addition, through the annual Integrated Priority List (IPL) process, the Quality Assurance organization has been authorized/funded to perform more work than planned in the baseline. The unfavorable variance is partially offset by a lower than planned volume of support requests for External Reviews.

Public Works

Lori Fritz, Vice President

Monthly Performance Report

May 2015

Switching Station Preventative Maintenance by Electrical Utilities Crew

PUBLIC WORKS

INTRODUCTION

The Mission Support Alliance, LLC (MSA) Public Works (PW) function provides a myriad of services to support a broad base of customers performing their respective Hanford Site missions. PW provides best-in-class operations and support services within a culture of safety, customer service and fiscal responsibility. PW services include: Strategic Planning and Reliability Projects (Infrastructure and Services Alignment Plan [ISAP]), Ten Year Site Plan and Reliability Projects, Site Infrastructure Services (Electrical Utilities, Water Utilities, B Reactor, Roads and Grounds, and Biological Controls), Facilities Management (Work Management, Operations & Maintenance and Custodial Services), Real Property & Projects, and Compliance & Risk Mitigation. PW's goal is to provide cost-effective and timely services that are centered on customer needs in support of the Hanford environmental cleanup objectives.

KEY ACCOMPLISHMENTS

Electrical Utilities (EU) Cleans Up More Waste Preparing for Shipment – Aligning with EU's goal of reducing backlog waste streams, containers for both Basin Disposal, Inc. (BDI), and the Environmental Restoration Disposal Facility (ERDF) were filled with EU's 253E Laydown Yard waste. Included was utility pole hardware, such as porcelain insulators, lead tipped pins, wire, glass, treated wood, wire, and general debris. In additional, to improve organization at the 253E Laydown Yard, areas were graveled and graded, storage boxes staged, and equipment and parts sorted.

Laydown Yard Graded Following Removal of Surplus Equipment

Waste Treatment Plant (WTP) Switching Support – EU provided switching support on the WTP temporary construction service. This switch allowed Bechtel National Inc. to perform their annual electrical maintenance activities.

EU Crew at Electrical Switch at WTP

Maintenance at 230kV Ashe Tap Switching Station – EU completed preventive and corrective maintenance at the 230kV Ashe Tap Switching Station. EU cleaned, tested, and replaced several items including hand-crank mechanisms, line switches, and vacuum interrupters. This effort was completed in a short timeframe to minimize impacts to the Energy Northwest refueling outage.

EU Crew Performing Maintenance at 230kV Ashe Tap Switching Station

Lift Station 12 Repair for the 331 Aquatics Laboratory Facility – The sewer infrastructure transports wastewater from various 300 Area facilities to the collection system flowing to the City of Richland (WA) Wastewater Treatment Plant. In May, one of the primary lift stations, LS-12, experienced a failure of one of the two pumps. This lift station is critical in supporting the operations of the 331 Aquatics Laboratory, operated by Pacific Northwest National Laboratories (PNNL). MSA Maintenance Services developed the necessary planning documents to execute a pump replacement

PUBLIC WORKS

for the lift station. This effort was coordinated with PNNL so that operations of the Aquatics Lab were not impacted. Follow on corrective actions were taken to meet current established electrical codes. Lift Station 12 was placed back into operation May 20, 2015, to provide reliable wastewater service to the 331 facility.

Acquisition of Compactor Truck – MSA acquired a new compactor truck that will be used to assist with tumbleweed removal across the Hanford Site, disposing of both regulated and non-regulated tumbleweeds. Currently, three refuse trucks are in use; however, these vehicles are over 20 years old with mechanical issues limiting the amount of time they are available for use. The new compactor truck will help alleviate the workload, downtime, and provide a more reliable vehicle in support of MSA Biological Controls' many customers.

New Biological Controls Compactor Truck

Hanford Comprehensive Land Use Plan Supplement Analysis (SA) – MSA Real Estate Services (RES) has been working with U.S. Department of Energy (DOE) Richland Operations Office (RL) to disposition DOE Headquarters (HQ) comments and finalize the SA document. The RL Site Manager approved the document on May 7, 2015, and the document will be readied for public release and final closeout. This completes a one-and-a-half year effort by MSA to prepare the draft and assist RL with finalizing the document. The next National Environmental Policy Administration (NEPA) five-year review will take place in 2020.

LOOK AHEAD

Nothing to report.

MAJOR ISSUES

350 Sewage Lift Station Repair and Componentry Replacement – On April 20, 2015, during daily monitoring rounds, Water & Sewer Utilities (W&SU) Stationary Operating Engineers (SOEs) discovered that the 350 Sewage Lift Station had experienced system failure. The SOEs immediately informed W&SU Management, who made the

PUBLIC WORKS

appropriate notifications to RL, MSA, and PNNL, whose maintenance shop and two support buildings rely on the 350 Sewage Lift Station. Early identification of the failure prevented an upset condition; however, water had to be shut off to the lift station and three adjoining PNNL buildings to perform an investigation and subsequent repairs. W&SU provided drinking water, portable restrooms, and hand wash stations to avoid disruption to PNNL operations. Investigation revealed two nearly 20-year-old pumps that had outlived their design life cycle, a float tree that needed to be replaced, piping that required a confined space entry, and wiring that was not up to current code. In coordination with MSA Site Services and Interface Management, crews completed all work during a weekend shift; service was restored on May 10, 2015.

Pump Repairs Made at 350 Sewage Lift Station

SAFETY PERFORMANCE

During the month of May, there were no Occupational Safety and Health Administration recordable injuries reported within Public Works. There were two minor First Aid cases reported: an employee reported leg soreness after extensive walking in desert terrain, and another employee reported wrist and hand pain and numbness from repetitive work.

BASELINE PERFORMANCE

Table PW-1. Public Works Cost/Schedule Performance (dollars in millions).

ACWP = Actual Cost of Work Performed.							CV = cost variance.					
BCWP = Budgeted Cost of Work Performed.							FYTD = fiscal year to date.					
BCWS = Budgeted Cost of Work Scheduled.							SV = schedule variance.					
BAC = Budget at Completion. EAC = Estimate at Completion												

BASELINE PERFORMANCE VARIANCE

Current Month Schedule Variance (SV) (-\$0.5M) – Within threshold.

Current Month Cost Variance (CV) (+\$0.7M) -

RL-40 (+\$1.0M) – The positive cost variance (+\$0.8M) was due to a point adjustment made in May to move BCWS from FY 2016 to FY 2015 and earn full BCWP for crane purchases that occurred in FY 2010 per MSA Baseline Change Request (BCR) VRL40RP-15-010 dated 4/30/15.

Contract-to-Date Schedule Variance (SV) (-\$0.5M) – Within threshold.

Contract-to-Date Cost Variance (CV) (-\$18.0M) – The cumulative variances are due to the approved funding and priority list scope being divergent from the baseline. The key drivers to this variance are as follows:

SWS (-\$11.1M) includes:

- Electrical Utilities More material procurements were made due to new requirements that were not included in the baseline. These new requirements were the disposal of Power/Telecommunications lines to the Environmental Restoration Disposal Facility, a trailer mounted load center, bushings to replace the A-9 Transformer (needed for an unplanned outage), spare parts from a vendor who is going out of business, an infrared camera, and an analyzer. In addition, the baseline was not adequate for a number of maintenance items that needed to be replaced due to the aging life of the infrastructure on the Hanford site. An Enhanced Maintenance Program has been established to better predict future system failures and Predictive Maintenance is replacing the Preventative Maintenance method. Electrical Services is significantly divergent from the baseline. Contract to date variance (-\$12.8M) is primarily due to repairs relating to an aging infrastructure and upgraded staffing requirements for the labor force.
- 2) Water & Sewer Utilities Staffing levels are currently higher than the baseline due to the maintenance activities required to keep the water and sewer distribution system maintained. The system has degraded across the site due to age. W&SU is also part of the Enhanced Maintenance Program, and has compliance issues that have increased the cost to the program. Water & Sewer Utilities is significantly divergent from the baseline. Contract to date variance (-\$14.5M) is principally due to extensive infrastructure repairs and implementation of a preventative maintenance program.
- 3) Other significant SWS contract to date variances include Waste Sampling and Characterization Facility (WSCF) (+\$2.5M), Roads & Grounds (+\$2.2M), Sanitary Waste Management and Disposal (+\$0.8M), Traffic Management (+\$1.6M), Site Infrastructure and Logistics Program Management (-\$1.5M), Work Management (-\$1.4M), Land and Facilities Management (+\$2.7M), and Central Engineering (+\$9.1M), all of which have been previously reported.

RL-40 (-\$6.9M) includes variances from several prior year Infrastructure Reliability Projects that have also been previously reported. Those projects include: L-449, Mortar Line 12-inch Water Line – Baltimore Ave. (+\$0.9M), L-399, *T-Plant Potable & Raw Water Line* (+\$1.5M), L-311, 200W *Raw Water Reservoir Refurbish* (+\$4.0M), L-691, *Construct Sewer Lagoon in 200 West* (-\$3.0M), L-506, Upgrade RTUs & SLAN – CE (-\$1.4M), L-683, 251W Facility Mods for Dispatch Center (-\$1.5M), L-753, Maintenance Shelters for Crane & *Rigging* (+\$1.1M), Reliability Project Spares Inventory Change (-\$2.2M), ET-51, HLAN

PUBLIC WORKS

Network Upgrade - Phase 2 (-\$1.1M), L-713, *Records Storage Facility* (-\$2.2M), and ET60, *Enterprise Voice over Internet Protocol (VoIP) Solution, Implementation* (-\$2.5M).

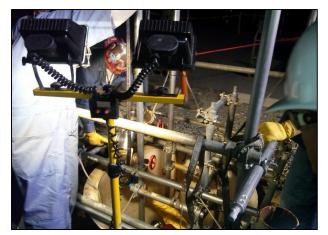

Site Services & Interface Management

P.K. Brockman, Vice President

Monthly Performance Report May 2015

Crews Work in Confined Space to Repair Sewer Lift Station

INTRODUCTION

The Mission Support Alliance, LLC (MSA) Site Services & Interface Management (SS&IM) function provides a myriad of services to support a broad base of customers performing their respective Hanford Site missions. SS&IM provides operations, support, and maintenance services within a culture of safety, customer service, and fiscal responsibility. SS&IM services include: Program Support/Waste Treatment Plant (WTP) Liaison, Interface Management/Customer Service, Crane & Rigging (C&R), Fleet Services, Motor Carrier Services, and Maintenance Services. SS&IM's goal is to provide effective and timely services that are centered on customer needs in support of the Hanford environmental cleanup objectives.

KEY ACCOMPLISHMENTS

300 Area Sewer Lift Station Repair – On Saturday, May 9, 2015, Maintenance Services completed repairs and testing of the 350 sewer lift station. This was a critical project for Water & Sewer Utilities (W&SU) as it enabled sewer service to be restored to a Pacific Northwest National Laboratory (PNNL) facility in the 300 Area. The team included resources from MSA's Maintenance Services, Motor Carrier Services, C&R, W&SU, Safety & Health, and Washington River Protection Solutions LLC (WRPS) Nuclear Chemical Operators.

Workers Lift Old Equipment Out of 350 Building Sewer Lift Station

Photo Shows Congestion and Confined Space That Workers Had To Work In

MSA Replaces Heating, Ventilation, and Air Conditioning (HVAC) at 2704HV – MSA is upgrading the HVAC system at building 2704HV for WRPS. The project consists of procuring and installing four 60-ton rooftop HVAC units, modifying 150 fan-powered

terminals and installing a computer control center. The upgrade will replace four older 70-ton units.

Lifting Old Unit Off the Roof of 2704HV New Unit (Left) Installed On the Roof at 2704HV

Service Catalog Activities – As a result of customer comments on a customer satisfaction survey, the telephone services form is being revised to integrate the associated Site form. Previously, the customer was required to perform a separate activity to fill out and attach the Site form when submitting a catalog request for Telephone Services. Testing of the new form was completed, and the new form was moved to production on May 13, 2015. In addition, the video teleconference information page and request form was redesigned to provide additional information for customers and collect needed data in the request. The new informational page was published on May 12, 2015, and testing on the revised request form was completed on May 13, 2015. The form was moved to production on May 18, 2015.

Updated Service Delivery Documents – The following Service Delivery Documents (SDDs) were updated in May:

- SDD J3-19 (Fire and Emergency Response)
- SDD J3-20 (Fire and Emergency Response Services System Maintenance)
- SDD J3-21 (Emergency Operations Center)
- SDD J3-22 (Emergency Operations Event Reporting), SDD J3-23 (Site Safety Standards)
- SDD J3-24 (Radiological Assistance Program).

LOOK AHEAD

New Administrative Interface Agreement (AIA) with WRPS on Waste Management Services – On May 26, 2015, MSA Interface Management and MSA Compliance and Risk Mitigation met with representatives from WRPS Waste Services and WRPS Interface Management to discuss the new draft AIA for Waste Management Services (HNF-58866, Rev. 0). This new draft AIA outlines the roles and responsibilities for WRPS in providing waste designation and shipment support for MSA. During the meeting, review comments were discussed and changes proposed to the document. The final draft AIA is being routed through WRPS.

Proposed Cancellation of Pit-9 Operations AIA –MSA and Washington Closure Hanford (WCH) have expressed interest in cancelling HNF-52291, Rev. 1, the AIA between WCH, Bechtel National (BNI) and MSA, which describes the roles and responsibilities for delivering and removing borrow material at Pit-9. Because BNI has not yet removed any of the borrow material at Pit 9, which was the original purpose of the AIA, MSA and WCH believe the AIA is obsolete. However, BNI has expressed reservations in cancelling the AIA. Going forward, MSA will work with BNI to determine whether or not to cancel the AIA.

Upcoming Contract Interface Board (CIB) Meeting – MSA Interface Management will host the upcoming CIB meeting on June 25, 2015.

MAJOR ISSUES

Nothing to report.

SAFETY PERFORMANCE

During the month of May, there was one Occupational Safety and Health Administration recordable injury reported within SS&IM. An employee received a serious hand laceration after striking a wire rope anchor. In addition, there were three minor First Aid cases: an employee received a cut to the forearm while moving stainless steel sheeting; an employee experienced a shock while ringing a door buzzer, and an employee received a head contusion after being stuck by a freight elevator gate.

BASELINE PERFORMANCE

Table SS&IM-1. Site Services & Interface Management Cost/Schedule Performance (dollars in millions).

Fund Type							Contract-to-Date					
runu rype	BCWS BCWP ACWP SV CV				BCWS	BCWP	ACWP	SV	CV

Subtotal	\$0.2	\$0.2 \$0.2 \$0.2 \$0.0 \$0.0					\$30.6	\$33.5	\$0.0	(\$2.9)		
ACWP = Actual Cost of Work Performed. BCWP = Budgeted Cost of Work Performed. BCWS = Budgeted Cost of Work Scheduled. BAC = Budget at Completion.							= Fiscal = Schedu	ariance. Year to Da ule Varian ate at Con	ce.	<u> </u>		

BASELINE PERFORMANCE VARIANCE

Current Month Cost Variance (CV) (+\$0.0M) – Variance is within threshold.

Contract-to-Date Cost Variance (CV) (-\$2.9M) – The Contract-to-Date cost variance is due to the differences between the contract baseline and the approved and funded priority list (IPL) of items for MSA work scope for FY 2013 - FY 2015. These items include increased support required for Interface Management, including additional staff and support for Liaison Services.
