**The U.S. Department of Energy Issues Request for Proposal for Office of River Protection  
Hanford Site Technical Support Services**

**Richland** -- The U.S. Department of Energy Office of River Protection today issued a Request for Proposal seeking technical support services contractors to support the Government's management of the Hanford Site in Richland, Washington.

This required support includes all technical support activities involving engineering services, management consulting services, and hazardous waste collection and treatment. The objective of this acquisition is to award up to five Multi-Award, Indefinite Delivery, Indefinite Quantity contracts to contractors under the SBA 8(a) Program who can provide the high level contract support—as described above—for the restoration and remediation of a contaminated environment.

The announcement is posted on the Fedconnect website at: [www.fedconnect.net](http://www.fedconnect.net), Federal Business Opportunities website at: [www.fbo.gov](http://www.fbo.gov) and ORP internet site [www.hanford.gov](http://www.hanford.gov).
