

ERDF Expansion and Upgrades

Recovery Act Work at the Environmental Restoration Disposal Facility

The photograph above illustrates expansion or upgrades underway or proposed using Recovery Act funds. Those highlighted in green are finished. Those highlighted in yellow are approved, and those in red are proposed.

ERDF Facts

- Super cell 9 & 10 expansion will increase capacity by 50 percent to 16.4 million tons.
- Workers will excavate about three million cubic yards of soil for super cells nine and ten.
- Each cell will have a capacity of about 2.8 million tons of contaminated material.
- Each day, ERDF receives about 300 containers of waste for disposal. Each container averages about 20 tons of material.
- Nearly 500 ARRA-related jobs (92 full-time equivalents) have been created by Washington Closure Hanford, and about 37 percent of those are related to ERDF.
- An estimated \$100 million will be spent on ERDF expansion and upgrades -- \$55 million on expansion and \$45 million on upgrades.
- Nine million tons of contaminated material have been disposed at ERDF since it opened in 1996.
- ERDF drivers log a total of about 1.3 million miles per year. They have logged nearly 14.4 million miles with only one at-fault accident since the facility opened.
