## Hanford's Security Organization Hits 1.1 Million Safe Work Hours

RICHLAND, Wash. – Department of Energy Richland Operations Office (RL) contractor Mission Support Alliance's Safeguards and Security organization recently hit over 1.1 million safe work hours without a lost workday injury. The Safeguards and Security team consists of security operations, Hanford Patrol, security analysis and safeguards for the entire Hanford Site.

"This is a major accomplishment considering some of the high-risk activities our men and women perform," said Corey Low, director of RL's security, emergency services, and information management division.

The organization performs high-risk activities in all types of weather conditions, day and night. These activities include extensive protective force training; performance testing of personnel; maintenance and function testing of security systems; and physical material inventories in hazardous environments.

"I am very proud of the organization's commitment to their own safety and the safety of others around them," said Monty Giulio, Safeguards and Security director.

Officials said the organization's commitment to holding monthly facility inspections, safety summits, and annual injury reviews to identify issues, trends and corrective actions contributed to reaching the safety milestone.
