Hanford Advisory Board Seeking New Members

RICHLAND, Wash. – The Hanford Advisory Board (HAB) is seeking volunteer members to provide advice to federal and state agencies on the ongoing nuclear cleanup of the Hanford Site in southeast Washington.

The HAB is a nonpartisan board of volunteers chartered in 1994, with a mission to provide informed recommendations and advice to the U.S. Department of Energy, Washington State Department of Ecology, and the U.S. Environmental Protection Agency on major policy issues related to the Hanford cleanup mission.

Members of the board are expected to attend quarterly board meetings and have the option to join topic-specific committees that also meet on a quarterly basis. A majority of full board and committee meetings offer a hybrid attendance option.

Interested applicants should submit a resume or brief bio that includes their name, address, phone number and email address to HABMembership@rl.gov no later than February 6, 2026. Membership terms will begin on Oct. 1, 2026, and run for two years.

HAB members are not paid but may receive reimbursement for certain travel expenses.

The HAB is one of eight Department of Energy Office of Environmental Management Site Specific Advisory Boards in the nation. More information about the HAB can be found at <https://www.hanford.gov/page.cfm/hab>
