Hanford Site to Host Free Virtual Career Fair on March 2

RICHLAND, Wash. – The U.S. Department of Energy Richland Operations Office and Office of River Protection, along with Hanford Site contactors, Columbia Basin College, Washington State University Tri-Cities and WorkSource Columbia Basin, will host a One Hanford Virtual Career Fair on Wednesday, March 2 from 10 a.m. to 2 p.m.

DOE will be joined by Hanford Site contractors Bechtel National Inc., Central Plateau Cleanup Company, Hanford Laboratory Management and Integration, Hanford Mission Integration Solutions, HPMC Corporation and Washington River Protection Solutions in this first ever One Hanford virtual event.

During the fair, attendees will have the opportunity to chat one-on-one with DOE and contractor representatives during individual virtual sessions.

Available employment opportunities include:

- Contract Specialists
- Data Analysts
- Engineers
- Finance professionals
- Firefighters
- Health Physicists
- Internships
- Journeyman Lineworkers
- Project Controls
- Project Management
- Registered Nurses
- Truck Drivers
- And more!

Individuals interested in attending the One Hanford Virtual Career Fair can register here:

The Department of Energy (DOE) is engaged in one of the great public works of this century at the Hanford Site near Richland, Washington. Responsible for the federal government's cleanup of the legacy of more than 40 years of producing plutonium through the 1980s, DOE is transforming the site back into a 24/7 operations mode to treat tank waste from the production era. The DOE Office of River Protection (ORP) is responsible for the safe and efficient retrieval, treatment and disposal of the 56 million gallons of chemical and radioactive waste stored in Hanford's 177 underground tanks. The mission includes building and commissioning the world's largest radioactive waste treatment plant, which will immobilize the legacy tank waste through vitrification. The DOE Richland Operations Office is responsible for all remaining Hanford cleanup and is currently focused on stabilizing and demolishing former plutonium production structures, excavating and disposing of

contaminated soil and waste, treating contaminated groundwater, and configuring Hanford Site infrastructure for the future, with an emphasis on supporting the tank waste mission. Hanford Site work is conducted by a federal and contractor workforce of approximately 10,000 personnel. Visit www.hanford.gov for more information about the Hanford Site.
