DESCRIPTION OF AMENDMENT

This amendment is to incorporate the below answers to questions submitted:

1. Regarding Task 10, Pump Removal Mock Up, will there be an Owner Furnished location/facility that can be utilized to perform the Mock-up such as Cold Test Facility or other locations that the owner has already established? If so, what power is available? Are they equipped with Cranes? Does it require Ductwork Modifications?
   - The fabricator is responsible for providing the facility and any equipment, vacuum ducting, power, crane, etc. required to complete Task 10. No government owned facilities are available for this task.

2. Will the GFE Valves be supplied with extra gaskets?
   - The valves will not be shipped with extra gaskets, in the event that a gasket gets damaged or fails to meet the leakage criteria, a replacement gasket kit (QL-2) will be provided.

3. RPP-14541, sect 4.7.2.2 please identify which valves are to be used for double isolation?
   - All of the valves will be tested to the double valve isolation leak rate criteria.

4. What is the IPWS fuel consumption rate?
   - The fabricator should estimate that approximately 40 gallons of fuel will be needed to complete testing.

5. Pump removal mockup- what is desired negative pressure to simulate tank vacuum?
   - The Pump Removal Mock-up Exercise stats 2.5 inches of water with minimal leakage and 1.5 inches of water with an open 8 inch pipe vent.

6. Does prevailing wage apply to this RFP, if it does not, does it apply to work performed in the owner’s facility’s?
   - As noted in the General Provisions, FAR 52.222-20 Walsh-Healy Public Contracts Act (Dec 1996) applies to this subcontract.
7. Tasks missing drawings. Please provide the missing drawings.
